## TPSODL Observes Founder's Day on 187th Birth Anniversary of Jamsetji Nusserwanji Tata

**Berhampur, March:** TP Southern Odisha Distribution Limited (TPSODL) observed the 187th birth anniversary of Jamsetji Nusserwanji Tata along with its Foundation Day at its Corporate Office in Berhampur. The occasion was marked with reverence and reflection, celebrating the enduring legacy, vision, and values of the founder whose principles continue to guide the organisation. The day also marked the successful conclusion of the week-long Ethics Week 2026.

The observance brought employees together to reaffirm their commitment to integrity, transparency, and responsible governance. Throughout the week, a series of awareness sessions, pledge-taking ceremonies, and interactive discussions were organised across offices, encouraging employees to uphold the highest standards of professional conduct.

Employees actively participated in discussions around real-life workplace scenarios and principled decision-making. The sessions created an open platform for dialogue and reflection, strengthening the culture of accountability and mutual trust within the organisation. The enthusiastic participation across departments reflected TPSODL's strong ethical foundation.

The concluding ceremony was led by Mr. Amit Kumar Garg, CEO, TPSODL, who paid tribute to the visionary founder and highlighted the relevance of ethics in modern corporate functioning. Addressing the employees, he said, "Ethics is not confined to policies or documents; it is demonstrated through our daily actions. At TPSODL, every decision we take must reinforce trust among consumers and stakeholders. Performance is important, but principles define our long-term success."

On the occasion, TPSODL also launched Tata Volunteering Week 24, which will now continue as a month-long initiative across Southern Odisha. Employees will engage in community-driven activities focused on education, environmental sustainability, and social wellbeing, further strengthening the organisation's connect with the communities it serves and carrying forward the founder's vision of nation-building through responsible enterprise.

The inauguration event was graced by senior officials and colleagues.

# TPSODL observes Founder's Day on 187th birth anniversary of Jamsetji Nusserwanji Tata

**PBD BUREAU**

**BERHAMPUR, MAR 5**

TP Southern Odisha Distribution Limited (TPSODL) observed the 187th birth anniversary of Jamsetji Nusserwanji Tata along with its foundation day at its corporate office here.

The occasion was also marked by the conclusion of the week-long Ethics Week 2026, during which employees participated in a series of activities promoting integrity, transparency and responsible governance, the company said.

Awareness sessions,

pledge-taking ceremonies and interactive discussions were organised across offices during the week to encourage employees to uphold high standards of professional conduct.

Employees also took part in discussions on real-life workplace situations and principled decision-making, providing a platform for dialogue and

reflection on ethical practices in professional life.

The concluding ceremony was led by TPSODL CEO Amit Kumar Garg, who paid tribute to the founder and emphasised the importance of ethics in corporate functioning.

"Ethics is not confined to policies or documents; it is demonstrated through our daily actions. At

TPSODL, every decision we take must reinforce trust among consumers and stakeholders. Performance is important, but principles define our long-term success," Garg said while addressing employees.

On the occasion, TPSODL also launched Tata Volunteering Week 24, which will continue as a month-long initiative across southern Odisha.

Employees will participate in community-focused activities related to education, environmental sustainability and social wellbeing as part of the initiative, the company added.

**PRESS RELEASE****TPSODL Celebrates Lineman Diwas****Launches 55th National Safety Month across Southern Odisha**

Berhampur, March: TP Southern Odisha Distribution Limited (TPSODL) celebrated Lineman Diwas, honouring the dedication, courage and service of its frontline workforce. The occasion also marked the inauguration of the 55th National Safety Day and the launch of National Safety Month initiatives across its operational areas.

Linemen from various divisions of participated in the programme with pride and enthusiasm. The highlight of the event was the felicitation of around 75 linemen whose commitment ensures safe, reliable and resilient power supply across the region. Working in harsh weather, remote terrains and time-bound situations, they continue to embody the true spirit of service.

Addressing the gathering, Mr. Amit Kumar Garg, CEO, TPSODL, appreciated the relentless efforts of the field teams. He said, "Our linemen are the backbone of the organisation. They work in challenging conditions to keep power supply uninterrupted. Their dedication and discipline keep the network strong. Safety must always remain our top priority. Every employee should return home safely." He also reiterated TPSODL's Zero Harm Mission, emphasising that safety is not merely a rulebook, but a shared responsibility.

The event featured the administration of a safety oath, reaffirming collective commitment to strict adherence to safety protocols. A specially curated video showcasing the journey, challenges and achievements of linemen was screened, followed by interactions where field staff shared their experiences from the ground.

Aligned with this year's theme, "Engage, Educate and Empower People to Enhance Safety," TPSODL announced a series of safety competitions and awareness activities to be conducted throughout the month. Similar programmes are planned across all six circles to ensure wider participation and reinforce a strong safety culture across the organisation.

The ceremony was attended by senior officials and colleagues from across the organisation.

## 75 लाइनमैन को समर्पण और सेवा भावना के लिए किया गया सम्मानित

दक्षिण ओडिशा में 55वें राष्ट्रीय सुरक्षा महीने पर 75 लाइनमैन का किया गया सम्मान।

**जगरण संवाददाता, भुवनेश्वर :** टीपी साउthern ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने लाइनमैन दिवस के अवसर पर अपने फ्रंटलाइन कर्मचारियों के समर्पण, साहस और सेवा भावना का सम्मान किया। इस मौके पर 55वें राष्ट्रीय सुरक्षा दिवस का उद्घाटन भी किया गया तथा संगठन के संरक्षण क्षेत्रों में राष्ट्रीय सुरक्षा महीने की गतिविधियों की शुरुआत की गई। कार्यक्रम में विभिन्न डिब्बेजनों के

लाइनमैन वरसाह और रातों के साथ शामिल हुए। इस अवसर का मुख्य आकर्षण करीब 75 लाइनमैन को सम्मानित किया जाना रहा, जिन्होंने मेहनत और प्रतिबद्धता पूरे क्षेत्र में सुरक्षा, विश्वसनीय और मजबूत बिजली आपूर्ति सुनिश्चित कराते हैं। कठिन मौसम, दूर-दराज के इलाकों और चुनौतीपूर्ण परिस्थितियों में कार्य करते हुए ये कर्मचारी सेवा की सच्ची भावना का परिचय देते हैं।

कार्यक्रम को संबोधित करते हुए टीपीएसओडीएल के सीईओ अमित कुमार गर्ग ने फील्ड टीमों के अथक प्रयासों की सराहना की। उन्होंने कहा कि लाइनमैन संगठन की रीढ़ हैं, जो चुनौतीपूर्ण परिस्थितियों में काम करते हुए बिजली आपूर्ति को निरंतर बनाए रखते हैं। इस दौरान कर्मचारियों को सुरक्षा शपथ दिलाई गई और 'जीरो हार्म मिशन' के तहत सुरक्षा मानकों के पालन पर जोर दिया गया।

PRESS RELEASE

## Tata Power Led Southern Odisha DISCOM Reaches thousands with Menstrual Health Drive

**Berhampur, March:** Reinforcing its commitment towards community health, adolescent well-being and gender equity, TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and the Government of Odisha, has successfully implemented a large-scale Menstrual Health and Hygiene (MHH) Awareness Program across southern Odisha. The program covered eight districts and reached more than 10 thousand adolescent girls and women. The initiative focused on spreading awareness on menstrual health, promoting hygienic practices, dispelling myths and taboos surrounding menstruation and improving access to menstrual hygiene products while encouraging open and scientific discussions on the subject.

Menstrual health education remains a crucial component of adolescent health and social development, particularly in rural and semi-urban areas where limited awareness, social stigma and inadequate access to hygienic menstrual products often affect the physical health, confidence and school attendance of adolescent girls. Recognising these challenges, TPSODL designed the initiative to empower adolescent girls with accurate knowledge about menstruation, encourage safe hygienic practices and promote open conversations around menstrual health within families and communities so that girls can manage menstruation safely and with dignity.

The initiative was implemented across eight districts of southern Odisha – Ganjam, Gajapati, Koraput, Boudh, Kandhamal, Malkangiri, Rayagada and Nabarangpur. These districts are characterised by difficult terrain with large stretches of hills, forests and remote habitations, and many areas are predominantly inhabited by tribal communities. Considering the scattered settlements and connectivity challenges, awareness sessions were organised at government and private schools, community halls, Anganwadi centres, community health centres and village-level community spaces to ensure wider outreach.

In total, 77 sessions were organised, with Ganjam recording the highest number at 12, followed by Koraput with 11 and Malkangiri with 10 sessions. Gajapati, Kandhamal, Nabarangpur and Rayagada hosted 9 sessions each, while Boudh conducted 8 sessions, reflecting balanced coverage across operational areas.

The sessions were facilitated by trained professionals including doctors, Auxiliary Nurse Midwives (ANMs), nurses, NGO representatives and community health workers. Doctors from Berhampur, Bhubaneswar and different districts of southern Odisha actively participated and interacted with the girls, explaining menstrual health, hygiene practices and reproductive health in a simple and scientific manner while addressing their questions.

Several community-based sessions were also organised to reach out-of-school girls and women with the support of Gram Panchayat Level Federations (GPLFs), Self Help Groups,

Community Resource Persons (CRPs) and Master Book Keepers (MBKs). The initiative included 12 exclusive sessions for women across districts including Ganjam, Koraput, Kandhamal, Malkangiri, Boudh and Nabarangpur, with participation ranging between 99 and 159 women per session.

To reinforce hygienic practices, menstrual hygiene materials were distributed during the sessions. The kits included reusable sanitary pads with covers, hand towels, liquid soap or sanitizer and informational leaflets, while disposable sanitary pads were distributed to participants and complete kits were provided to actively participating students.

The program recorded 10,110 participants. Ganjam reported the highest attendance with 1,530 participants, followed by Malkangiri with 1,429 and Koraput with 1,398. Kandhamal recorded 1,259 participants, while Rayagada and Nabarangpur reported 1,220 and 1,197 respectively, and Boudh and Gajapati recorded 1,049 and 1,028 participants.

TPSODL CEO Mr. Amit Kumar Garg said, “Menstrual health awareness is essential for ensuring the health, dignity and confidence of adolescent girls and women. Through such initiatives, TPSODL aims to encourage informed discussions and promote safe menstrual practices among communities. We are committed to reaching even the most remote and tribal regions so that young girls receive the knowledge, support and resources they need to manage menstruation with confidence and dignity.”

Tata Power led southern Odisha DISCOM reaches thousands with menstrual health drive

PRD BUREAU  
Bhubaneswar, 24/01/19

Bhubaneswar: An awareness drive to educate women about menstrual health, adolescent well-being and gender equity, TP Southern Odisha Distribution Limited (TPSODL) a joint venture between Tata Power and the Government of Odisha, has successfully implemented a large-scale Menstrual Health and Hygiene (MHH) Awareness Program across southern Odisha.

The program covered eight districts and reached more than 27 thousand adolescent girls and women. The initiative focused on spreading awareness about menstrual health, promoting hygiene practices, dispelling myths and misconceptions, and improving access to menstrual hygiene products while encouraging open and scientific discussions on the subject.

Menstrual health education remains a crucial component of adolescent health and social development, particularly in rural and semi-urban areas where limited economic social capital

and business assets in typical rural areas. The program also addressed the physical health, confidence and school attendance of adolescent girls. Encountering these challenges, TPSODL designed the initiative to empower adolescent girls with accurate knowledge about menstruation, encourage safe hygiene practices and promote open conversations around menstrual health within families and communities so that girls can manage menstruation safely and with dignity.

The initiative was implemented across eight districts of southern Odisha – Ganjam, Gajapati, Kejari, Boudh, Kandhamal, Malkangiri, Rayagada and Subarnapur.

These districts are characterised by difficult terrain with

large stretches of hills, forests and remote habitations, and many girls are predominantly uneducated.

Considering the scattered settlements and connectivity challenges, awareness sessions were organised at government and private schools, community halls, Anganwadis centres, community health centres and village-level community centres where water is available.

In total, 77 sessions were organised, with Ganjam recording the highest number at 22, followed by Kejari with 11 and Malkangiri with 10 sessions. Gajapati, Kandhamal, Subarnapur and Rayagada hosted 4 sessions each, while Boudh conducted 3 sessions, offering tailored messages across operational areas.

The sessions were facilitated by trained professionals including nurses, counsellors from Mahatma Jyoti Bapu NGO, representatives and community health workers. Demos from

Bhubaneswar, Bhubaneswar and different districts of southern Odisha actively participated and interacted with the girls, explaining menstrual health, hygiene practices and reproductive health in a simple and accessible manner while addressing their queries.

Several community-based workers were also appointed to reach out-of-school girls, and receive additional support (CGO, Panchayat Level, Panchayat, ICLEP, Self Help Groups, Community Resource Persons, SHGs and Village Health Karyaks).

Initiative included 22 vehicle-mounted or women-aided displays including Ganjam, Kejari, Kandhamal, Malkangiri, Boudh, Subarnapur, with participation ranging between 54 and 126 women per session.

To enhance hygiene practices, improved hygiene materials were distributed during the sessions. The kit included reusable sanitary pads with proper hand wash, hand soap or sanitizer and disinfectant solution, child disposable sanitary

pads were distributed to participants and sanitary kits were provided to actively participating students.

The program received 10,110 participants. Ganjam reported the highest attendance with 1,738 participants, followed by Malkangiri with 1,425 and Kejari with 1,398. Kandhamal recorded 1,254 participants, while Boudh and Subarnapur reported 1,229 and 1,197 respectively and Boudh and Ganjam recorded 1,180 and 1,128 participants.

TPSODL CEO Anil Kumar Ganguli said, "Menstrual health awareness is essential for ensuring the health, dignity and well-being of adolescent girls and women. Through such initiatives, TPSODL aims to encourage informed decisions and promote safe menstrual practices among communities. We are committed to reaching every far-flung area and rural region so that young girls across the knowledge, support and resources they need to manage menstruation with confidence and dignity."

मासिक धर्म स्वच्छता अभियान जारी, 10 हजार लाभान्वित

मासिक धर्म पर महिलाओं के बीच जागरूकता कार्यक्रम © जागरण

जागरण संवाददाता, भुवनेश्वर : टीपीएसओडीएल लिमिटेड (टीपीएसओडीएल) ने दक्षिण ओडिशा के आठ जिलों में मासिक धर्म स्वच्छता जागरूकता अभियान चलाया। इस अभियान के तहत 10,110 महिलाओं और किशोरियों को स्वच्छता किट वितरित किए गए और स्वास्थ्य-संबंधी जानकारी दी गई। कंपनी ने बताया कि ग्रामीण और जनजातीय क्षेत्रों में मासिक धर्म को लेकर कई धारितियां आज भी मौजूद हैं, जिससे लड़कियों को पढ़ाई और स्वास्थ्य प्रभावित होता है। इसे ध्यान में रखते हुए स्कूल, आंगनवाड़ी केंद्र, सामुदायिक भवन और स्वास्थ्य केंद्रों में 77 विशेष सत्र आयोजित किए गए। इन सत्रों में डॉक्टर, एनएन, नर्स और सामाजिक संगठन की टीमों ने किशोरियों को मासिक

धर्म स्वच्छता, पोषण और स्वास्थ्य संबंधी जानकारी दी। साथ ही पुनः उपयोग योग्य सैनिटरी पैड, सातुन, तैलिय और जानकारी पुस्तिकाओं वाले किट भी वितरित किए गए। टीपीएसओडीएल के मुख्य कार्यकारी अधिकारी अमित कुमार गर्ग ने कहा कि महिलाओं के स्वास्थ्य और सम्मान के लिए इस तरह के जागरूकता कार्यक्रम निरंतर चलाए जाएंगे।

# 10,000 Women Participate In TPSODL's Menstrual Health & Hygiene Awareness Programme In Southern Odisha

**The AI-powered study finds**  
Bhubaneswar: The Southern Odisha Districts (TPSODL), a joint venture between Tata Power and Odisha government, has successfully implemented a large-scale menstrual health and hygiene (MHH) awareness programme across southern Odisha under its CSR scheme.

The initiative, aimed at addressing menstrual health, adolescent well-being and gender equity, reached eight lakh women and reached more than 10,000 adolescent girls and women, mostly in areas predominantly inhabited by tribal communities.

Indians over 65 are switching from hearing aids to this new device

The programme focused on spreading awareness on menstrual health, promoting hygiene practices, opening up to menstrual health and supporting women and equipping them to overcome hygiene and menstrual health challenges.

The initiative was implemented across five districts of Odisha: Gajapati, Keonjhar, Boudh, Kandhamal, Malkangiri, Nayagarh and Nuapada, which are characterised by difficult terrain with large stretches of hills, forests and remote habitations.

The initiative was supported at all community levels. Anganwadis, ASHA workers and community health workers were trained to support the programme.

A total of 77 sessions were organised across Odisha with 10 in Malkangiri.

Of the 10,110 participants, Gajapati recorded the highest attendance with 1,630, followed by Malkangiri (1,420) and Nayagarh (1,200).

Trained professionals including the ASHA workers, ANM, community health workers conducted the sessions.

Doctors from Bhubaneswar, Odisha and other Odisha hospitals with the hygiene and reproductive health were invited to conduct the sessions.

Several community-based activities were also organised to reach out to women and girls with the support of gram panchayats and women's groups, community welfare groups (CWGs) and women's self-help groups (WSHGs). The initiative included 10 exclusive sessions for women across districts Gajapati, Keonjhar, Kandhamal, Malkangiri, Boudh and Nuapada, with participation ranging between 50 and 100 women per session.

Menstrual hygiene material was distributed during the sessions with the kits including an article, a soap, a cloth, a pad, a tampon, a menstrual cup, a tampon applicator and informational leaflets, while disposable sanitary pads were distributed to participants and complete kits were provided to actively participating students.

The initiative focused on awareness programs on menstrual health, menstrual cycle and hygiene products, menstrual health and social development, particularly in rural and semi-urban areas where limited awareness, social stigma and inadequate access to hygiene products, especially affect the physical health, confidence and social inclusion of adolescent girls.

Recognizing these challenges, TPSODL designed the initiative to empower adolescent girls with accurate knowledge about menstruation, encourage safe hygiene practices and promote their awareness about menstrual health and social development in their own communities and workplaces. The initiative was implemented across eight districts of southern Odisha – Bargarh, Boudh, Kandhamal, Malkangiri, Nayagarh and Nuapada.

These districts are characterized by difficult terrain with large stretches of hills, forests and remote habitations, and many areas are predominantly inhabited by tribal communities.

Considering the status of education and literacy of government and private schools, community groups and religious institutions, special measures were taken to ensure the program reached the largest number of tribal women.

Sessions, workshops, awareness and health camps were organized, involving experts of menstrual health and hygiene professionals including doctors, Auxiliary W and community health workers.

Doctors from Government, Private and ayurvedic and hospitals with the program sessions provided a consult and advisory service while educating the women about menstrual health and access with the support of Gram Panchayat and Mahila Aikya Kendra, Self Help Groups, Community Resource Persons (CRPs) and Master Skill Trainers (MSTs).

The initiative included 10 exclusive sessions for women across districts including Bargarh, Kandhamal, Malkangiri, Boudh and Nayagarh with participation ranging between 44 and 122 across all sessions. It provided hygiene products, menstrual hygiene materials, and educational kits for sessions.

The initiative also provided sanitary pads and other health kits. Sanitary pads were distributed to participants and complete kits were provided to tribal, participating students. The program covered 10,000 participants.

Women reported the highest awareness with 1000 participants followed by Malkangiri with 1400 and Boudh with 1200.

Kandhamal received 1250 participants, while Boudh and Malkangiri received 1220 and 1200 respectively, and Bargarh and Nayagarh received 1100 and 1000 participants. TPSODL CEO Amit Kumar Singh said, "Menstrual health awareness is essential for ensuring the health, dignity and confidence of adolescent girls and women."

Through such initiatives, TPSODL aims to empower women and improve their quality of life.

We are committed to providing the best health, knowledge, support and resources they need to thrive.

## National Lok Adalat and special camps Across TPSODL Areas on 14th March

**Berhampur:** TP Southern Odisha Distribution Limited (TPSODL) will organise the 4th National Lok Adalat and Enforcement Settlement Camp on Saturday, March 14, across its entire operational region. The initiative aims to offer consumers a simple and accessible platform to settle cases related to unauthorised electricity usage, and electricity theft, ensuring timely resolution of pending enforcement matters.

The Lok Adalat and settlement camps will be held simultaneously at TPSODL Divisions, Sub-Divisions, Section Offices, Enforcement offices and designated Court premises covering the districts of Gajapati, Kandhamal, Boudh, Koraput, Rayagada, Malkangiri and Nabarangapur. As part of this initiative, Special Enforcement and Settlement Camps will be organised exclusively across the Ganjam district to enable consumers to resolve pending enforcement matters in a convenient and transparent manner.

The initiative aims to provide consumers with a simple platform to settle enforcement-related cases and regularise their electricity connections. Dedicated teams comprising enforcement officials, legal representatives and consumer service personnel will be present at the camps to assist consumers with documentation, explain procedures and facilitate quick case resolution.

As this is the last Lok Adalat of the current financial year, TPSODL encourages consumers with pending enforcement cases to utilise this opportunity and resolve their matters in a timely manner.

TPSODL to organise Lok Adalat for settlement of power enforcement cases

BERHAMPUR, MAR 11

TP Southern Odisha Distribution Ltd (TPSODL) will organise the fourth National Lok Adalat and Enforcement Settlement Camp on March 14 across its operational areas to facilitate settlement of cases related to unauthorised electricity usage, malpractice and power theft.

The Lok Adalat will be held simultaneously across TPSODL divisions, sub-divisions, section offices and designated court premises in the districts of Ganjam, Gajapati, Kandhamal, Boudh, Koraput, Rayagada, Malkangiri and Nabarangapur.

The camps will remain open from 9 am to 5 pm, an official said.

Special teams comprising enforcement officers, legal experts and consumer-support personnel will be deployed at each location to assist consumers with documentation, clarify procedures and facilitate settlement of cases.

Information regarding district-wise arrangements, categories of eligible cases and related procedures has been made available at TPSODL division, sub-division and section offices. Consumers may also contact their nearest TPSODL office or customer care centre for assistance, the official added.

Consumers with pending enforcement matters have been encouraged to avail the opportunity to settle their cases during the Lok Adalat, the official said.

# Lok Adalat Across TPSODL Areas on 14th March

**Berhampur (Correspondent):** TP Southern Odisha Distribution Limited (TPSODL) will organise the 4th National Lok Adalat and Enforcement Settlement Camp on Saturday, March 14, across its entire operational region. The initiative aims to offer consumers a simple and accessible platform to settle cases related to unauthorised electricity usage, malpractice, and electricity theft, ensuring timely resolution of pending enforcement matters. The Lok Adalat will be held simultaneously across all TPSODL Divisions, Sub-Divisions, Section Offices, and designated Court premises

covering the districts of Ganjam, Gajapati, Kandhamal, Boudh, Koraput, Rayagada, Malkangiri and Nabarangapur. The camps will remain open from 9:00 AM to 5:00 PM, enabling consumers to avail full-day guidance and support. This initiative is part of TPSODL's ongoing efforts to strengthen compliance, promote responsible electricity usage, and streamline the settlement of enforcement-related cases. By providing a structured, consumer-friendly mechanism for dispute resolution, the Lok Adalat is expected to help consumers regularise their electricity usage and prevent future

complications. Special teams consisting of enforcement officers, legal experts and consumer-support personnel will be deployed at each location to assist with documentation, clarify procedures and facilitate smooth case settlement. Comprehensive information on the Lok Adalat—including district-wise arrangements, categories of cases eligible for settlement and step-by-step guidance—is available at all TPSODL Division, Sub-Division and Section Offices. Consumers may also reach out to their nearest TPSODL office or Customer Care

Centre for additional support. As this is the last Lok Adalat of this financial year, TPSODL encourages all consumers with unresolved enforcement matters to take advantage of this opportunity to close their cases in a timely manner. Early settlement will help ensure quality electricity services and contribute to a safer and more compliant power ecosystem across Southern Odisha. TPSODL remains committed to providing transparent, customer-focused services and fostering a culture of lawful electricity usage through initiatives such as this district-wide Lok Adalat.

**TPSODL reaches thousands with menstrual health drive**

Posted by IW News Service | Mar 11, 2025 | Business

**TP SOUTHERN ODISHA DISTRIBUTION LIMITED**

**Joint Venture of Tata Power and Government of Odisha)**

Berhampur: TP Southern Odisha Distribution Limited (TPSODL) has successfully implemented a large-scale Menstrual Health and Hygiene (MHH) Awareness Program across southern Odisha. The program covered eight districts and reached more than 10 thousand adolescent girls and women.

The initiative was implemented across eight districts – Ganjam, Gajapati, Koraput, Boudh, Kandhamal, Malkangiri, Rayagada and Nabarangpur. In total 77 sessions were organized, with Ganjam recording the highest number at 12, followed by Koraput with 11 and Malkangiri with 10 sessions. Gajapati, Kandhamal, Nabarangpur and Rayagada hosted 8 sessions each, while Boudh conducted 8 sessions, reflecting balanced coverage across operational areas. The sessions were facilitated by trained professionals including doctors, Auxiliary Nurse Midwives (ANMs), nurses, NGO representatives and community health workers.

Several community-based sessions were also organized to reach out to school girls and women with the support of Gram Panchayat Level Federations (GPLF), Self Help Groups, Community Resource Persons (CRPs) and Master Book Keepers (MBKs).

To reinforce hygiene practices, menstrual hygiene materials were distributed during the sessions. The kits included reusable sanitary pads with covers, hand sanitizers, liquid soap sachets and informational leaflets, while disposable sanitary pads were distributed to participants and complete kits were provided to actively participating students. The program recorded 10,110 participants.

TPSODL CEO Anil Kumar Gogoi said, "Through such initiatives, TPSODL aims to encourage informed discussions and promote safe menstrual practices among communities. We are committed to reaching even the most remote and tribal regions so that young girls receive the knowledge, support and resources they need to manage menstruation with confidence and dignity."

## National Lok Adalat and special camps across TPSODL areas on March 14

Berhampur/11/03/2026: TP Southern Odisha Distribution Limited (TPSODL) will organise the 4th National Lok Adalat and Enforcement Settlement Camp on Saturday, March 14, across its entire operational region.

The initiative aims to offer consumers a simple and accessible platform to settle cases related to unauthorised electricity usage, and electricity theft, ensuring timely resolution of pending enforcement matters.

The Lok Adalat and settlement camps will be held simultaneously at TPSODL Divisions, Sub-Divisions, Section Offices, Enforcement offices and designated Court premises covering the districts of Gajapati, Kandhamal, Boudh, Koraput, Rayagada, Malkangiri and Nabarangapur.

As part of this initiative, Special Enforcement and Settlement Camps will be organised exclusively across the Ganjam district to enable consumers to resolve pending enforcement matters in a convenient and transparent manner. The initiative aims to provide consumers with a simple platform to settle enforcement-related cases and regularise their electricity connections.

Dedicated teams comprising enforcement officials, legal representatives and consumer service personnel will be present at the camps to assist consumers with documentation, explain procedures and facilitate quick case resolution. As this is the last Lok Adalat of the current financial year, TPSODL encourages consumers with pending enforcement cases to utilise this opportunity and resolve their matters in a timely manner.

**PRESS RELEASE**

## **TPSODL Warns Against Unauthorized and Illegal Electricity Re-Connections; Cases Reported to Police**

**Berhampur:** TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and Government of Odisha, has detected multiple incidents of unauthorized and illegal electricity reconnections in Nabarangpur district. The utility has reported the matter to the police and initiated action against those involved in such unlawful activities. TPSODL has urged consumers to refrain from such practices and follow legal procedures for restoration of electricity supply.

On 12 March 2026, TPSODL staff of the Nabarangpur Electrical Division under Jeypore Circle detected an incident in Kerla village under Kosagumuda Police Station, where an individual was allegedly carrying out unauthorized reconnection of electricity supply for consumers whose connections had earlier been disconnected due to non-payment of electricity dues. The matter has been formally reported to the police along with photographic and video evidence for investigation.

On 14 March 2026, another incident was reported in Ladhupada village under Chandahandi Police Station, where a person was found carrying out unauthorized and illegal reconnection activities for disconnected consumers. As per available information, the suspected individual has been identified as Gobardhan Gauda of Ladhupada village. A case has been registered and details, including evidence, have been shared with the police, who have assured necessary action.

In a separate case, TPSODL also detected large-scale illegal reconnections in Koilari village under Dabugaon Police Station, where around 40 disconnected electricity connections were reportedly reconnected illegally. Complaints have been lodged and evidence submitted for legal action against the suspected persons.

TPSODL strongly condemns such unauthorized and illegal activities, which not only result in financial loss to the utility but also disrupt lawful recovery processes and pose serious safety risks. Unauthorized handling of electrical infrastructure can lead to electrocution, accidents, and danger to public safety.

TPSODL has reiterated that tampering with electricity lines or illegally reconnecting disconnected power supply is a punishable offence under the Electricity Act. Assisting or facilitating such activities also attracts legal action under provisions related to electricity theft and unauthorized use of electricity. Consumers involved may face penalties, recovery of dues, and other charges, along with possible criminal proceedings.

The utility has urged consumers to clear pending dues through official channels and approach TPSODL offices for authorized restoration of supply. Consumers are also advised not to engage unauthorized persons for electricity-related work.

TPSODL remains committed to ensuring safe, reliable, and lawful electricity supply and appeals to the public to cooperate in preventing such illegal and unsafe practices.

## TPSODL flags Illegal power reconnections in Nabarangpur, files police cases

**STATESMAN NEWS SERVICE**  
*Berhampur, 18 March*

TP Southern Odisha Distribution Limited (TPSODL) has detected multiple instances of unauthorized electricity reconnections in Odisha's Nabarangpur district and lodged complaints with the police, warning consumers against engaging in illegal practices.

According to the utility, the incidents were reported from different parts of the district under the Jeypore Electrical Circle. On March 12, TPSODL officials detected an unauthorized reconnection operation in Kerla village under Kosagumuda police limits, where an individual was allegedly restoring power supply to consumers whose connections had been disconnected for non-payment of dues. The matter was reported to police with photographic and video evidence.

In another case on March 14, a similar incident was

reported in Ladhupada village under Chandahandi police station. The suspected individual, identified as Gobardhan Gauda, was allegedly involved in illegally reconnecting power supply. A case has been registered and evidence submitted for further investigation.

Officials also uncovered a large-scale violation in Koilari village under Dabugaon police limits, where around 40 disconnected connections were reportedly restored illegally. Complaints have been filed and legal action initiated against those involved.

The company reiterated that tampering with power infrastructure and illegal reconnections are punishable offences under the Electricity Act, attracting penalties, recovery of dues and possible criminal proceedings. Consumers have been advised to clear outstanding bills through official channels and seek authorized restoration of supply.

## TPSODL warns against unauthorized and illegal electricity reconnections; Cases reported to police

**BERHAMPUR, MARCH 18**

TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and Government of Odisha, has detected multiple incidents of unauthorized and illegal electricity reconnections in Nabarangpur district. The utility has reported the matter to the police and initiated action against those involved in such unlawful activities. TPSODL has urged consumers to refrain from such practices and follow legal procedures for restoration of electricity supply.

On 12 March 2026, TPSODL staff of the Nabarangpur Electrical Division under Jeypore Circle detected an incident in Kerla village under Kosagumuda Police Station, where an individual was allegedly carrying out unauthorized reconnection of electricity supply for consumers whose connections had earlier been disconnected due to non-

payment of electricity dues. The matter has been formally reported to the police along with photographic and video evidence for investigation.

On 14 March 2026, another incident was reported in Ladhupada village under Chandahandi Police Station, where a person was found carrying out unauthorized and illegal reconnection activities for disconnected consumers. As per available information, the suspected

individual has been identified as Gobardhan Gauda of Ladhupada village. A case has been registered and details, including evidence, have been shared with the police, who have assured necessary action.

In a separate case, TPSODL also detected large-scale illegal reconnections in Koilari village under Dabugaon Police Station, where around 40 disconnected electricity connections were reportedly reconnected illegally. Complaints have been lodged and evidence submitted for legal action against the suspected persons.

TPSODL strongly condemns such unauthorized and illegal activities, which not only result in financial loss to the utility but also disrupt lawful recovery processes and pose serious safety risks. Unauthorized handling of electrical infrastructure can lead to electrocution, accidents, and danger to public safety.

TPSODL has reiterated that tampering with electricity lines or illegally reconnecting disconnected power supply is a punishable offence under the Electricity Act. Assisting or facilitating such activities also attracts legal action under provisions related to electricity theft and unauthorized use of electricity. Consumers involved may face penalties, recovery of dues, and other charges, along with possible criminal proceedings.

The utility has urged consumers to clear pending dues through official channels and approach TPSODL offices for authorized restoration of supply. Consumers are also advised not to engage unauthorized persons for electricity-related work.

TPSODL remains committed to ensuring safe, reliable, and lawful electricity supply and appeals to the public to cooperate in preventing such illegal and unsafe practices.

# TPSODL Warns Against Unauthorised Electricity Reconnections In Odisha Villages

By **TPSODL** - News - 15 March 2023 - 10:00 AM

Get AI to find and recommend you

Berhampur: TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and the Odisha government, has issued a strong warning to consumers in Nimapur district against unauthorised and illegal reconnections of electricity supply.

[Odisha Policy Update](#)

The utility has reported the matter to the police and initiated action against those involved in such unlawful activities. TPSODL has also urged consumers to refrain from such practices and follow legal procedures for restoration of electricity supply.

15 March 2023

On March 12, TPSODL staff from the Nimapur Electric Division (under Jajpur Circle) detected an unauthorised reconnection in Korla village under Kotasaguda police limits. The individual involved was allegedly restoring power to consumers whose supplies had been disconnected for non-payment of dues. TPSODL promptly lodged a complaint with the police, supported by photographic and video evidence.

Just two days later, another incident came to light in Ladhupada village under Chandabandi police limits. A suspect, identified as Goardhan Gauda from the same village, was found illegally reconnecting disconnected lines. A formal case has been registered and relevant evidence has been handed over to police, who have initiated necessary action.

Additionally, TPSODL identified large-scale illegal reconnections in Kolan village under Dabugagan police limits, where around 40 disconnected connections were reportedly restored unlawfully. Complaints have been filed, and evidence submitted for legal action against the suspected persons.

TPSODL condemns these activities, noting that they cause significant financial losses to the company, undermine legitimate recovery efforts, and create substantial risks to public safety. Unauthorised interference with electrical infrastructure can result in electrocution, fires, accidents, and broader dangers.

The company stressed that tampering with power lines or illegally reconnecting disconnected supplies constitutes a punishable offence under the Electricity Act. Those who assist or enable such acts may also face charges related to electricity theft and unauthorised usage, potentially leading to fines, recovery of outstanding dues, additional penalties, and criminal prosecution.

TPSODL urged consumers to clear pending dues and authorised restoration of supply by approaching company offices directly. The utility advised against hiring unauthorised individuals for any electricity-related work.

**TPSODL Warns Against Unauthorized and Illegal Electricity Re-connections; Cases Reported to Police**

**Bhubaneswar:** TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and Government of Odisha, has detected multiple incidents of unauthorized and illegal electricity re-connections in Nabarangpur district. The utility has reported the matter to the police and initiated action against those involved in such unlawful activities.

**On March 12, 2026,** TPSODL staff of the Nabarangpur Electrical Division under Jaypara Circle detected an incident in Karia village under Khasagumuda Police Station, where an individual was allegedly carrying out unauthorized reconnection of electricity supply for consumers whose connections had earlier been disconnected due to non-payment of electricity dues.

**The matter has been formally reported to the police along with photographic and video evidence for investigation.** On March 14, 2026, another incident was reported in Ledhupada village under Chandahandi Police Station, where a person was found carrying out unauthorized and illegal reconnection activities for disconnected consumers.

**As per available information, the suspected individual has been identified as Gobardhan Gaud of Ledhupada village.**

**A case has been registered and details, including evidence, have been shared with the police, who have assured necessary action. In a separate case, TPSODL also detected large-scale illegal reconnections in Kolar village under Dabuguan Police Station, where around 40 disconnected electricity connections were reportedly reconnected illegally.**

**Complaints have been lodged and evidence submitted for legal action against the suspected persons. TPSODL strongly condemns such unauthorized and illegal activities, which not only result in financial loss to the utility but also disrupt lawful recovery processes and pose serious safety risks.**

**Unauthorized handling of electrical infrastructure can lead to electrocution, accidents, and danger to public safety. TPSODL has reiterated that tampering with electricity lines or illegally reconnecting disconnected power supply is a punishable offence under the Electricity Act.**

**Assisting or facilitating such activities also attracts legal action under provisions related to electricity theft and unauthorized use of electricity.**

**Consumers involved may face penalties, recovery of dues, and other charges, along with possible criminal proceedings. The utility has urged consumers to clear pending dues through official channels and approach TPSODL offices for authorized restoration of supply.**

**Consumers are also advised not to engage unauthorized persons for electricity-related work. TPSODL remains committed to ensuring safe, reliable, and lawful electricity supply and appeals to the public to cooperate in preventing such illegal and unsafe practices.**

**TPSODL warns against unauthorized and illegal electricity re-connections; cases reported to police**

**Bhubaneswar (17/03/2026),** TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and Government of Odisha, has detected multiple incidents of unauthorized and illegal electricity re-connections in Nabarangpur district.

The utility has reported the matter to the police and initiated action against those involved in such unlawful activities.

TPSODL has urged consumers to refrain from such practices and follow legal procedures for restoration of electricity supply. On March 12, 2026, TPSODL staff of the Nabarangpur Electrical Division under Jaypara Circle detected an incident in Karia village under Khasagumuda Police Station, where an individual was allegedly carrying out unauthorized reconnection of electricity supply for consumers whose connections had earlier been disconnected due to non-payment of electricity dues.

The matter has been formally reported to the police along with photographic and video evidence for investigation. On March 14, 2026, another incident was reported in Ledhupada village under Chandahandi Police Station, where a person was found carrying out unauthorized and illegal reconnection activities for disconnected consumers.

As per available information, the suspected individual has been identified as Gobardhan Gaud of Ledhupada village.

A case has been registered and details, including evidence, have been shared with the police, who have assured necessary action. In a separate case, TPSODL also detected large-scale illegal reconnections in Kolar village under Dabuguan Police Station, where around 40 disconnected electricity connections were reportedly reconnected illegally.

Complaints have been lodged and evidence submitted for legal action against the suspected persons. TPSODL strongly condemns such unauthorized and illegal activities, which not only result in financial loss to the utility but also disrupt lawful recovery processes and pose serious safety risks.

Unauthorized handling of electrical infrastructure can lead to electrocution, accidents, and danger to public safety. TPSODL has reiterated that tampering with electricity lines or illegally reconnecting disconnected power supply is a punishable offence under the Electricity Act.

Assisting or facilitating such activities also attracts legal action under provisions related to electricity theft and unauthorized use of electricity.

Consumers involved may face penalties, recovery of dues, and other charges, along with possible criminal proceedings. The utility has urged consumers to clear pending dues through official channels and approach TPSODL offices for authorized restoration of supply.

Consumers are also advised not to engage unauthorized persons for electricity-related work. TPSODL remains committed to ensuring safe, reliable, and lawful electricity supply and appeals to the public to cooperate in preventing such illegal and unsafe practices.

## Matikhala in Ganjam Steps into Solar Adoption Drive in Odisha, Sets National Benchmark

**Berhampur:** Berhampur, March: In a significant stride towards India's clean energy transition, Matikhala village in Ganjam district of Odisha has emerged as a model for rural solar adoption, becoming fully solarised under the PM Surya Ghar Muft Bijli Yojana (ULA Model). The initiative, implemented by TP Southern Odisha Distribution Limited (TPSODL), highlights how decentralized renewable energy solutions can transform rural livelihoods while advancing the country's sustainability goals.

Located under Kanamana Panchayat in Chhatrapur block, the village has seen 200 eligible households having a contract demand of 1 kW, equipped with rooftop solar connections. Each beneficiary has been provided with a 1 kW solar system, enabling them to generate their own electricity, significantly reduce dependence on conventional power sources, and lower monthly electricity expenses.

Under the ULA model of the PM Surya Ghar Muft Bijli Yojana, a beneficiary contributes Rs. 5,622, which includes the cost of the solar panel and solar meter, making the initiative both accessible and affordable. The model ensures long-term benefits, with solar systems designed to provide reliable energy support for up to 25 years. With this, Matikhala has become a fully solarised village under the scheme, with all eligible beneficiaries covered. The district administration of Ganjam has provided necessary financial support in achieving this milestone.

The project was inaugurated by Shri Krushna Chandra Nayak, Honorable MLA of Chhatrapur, in the presence of villagers and senior officials. The event was graced by Shri Keerthi Vasan V, Collector and District Magistrate of Ganjam; Mr. Amit Kumar Garg, CEO of TPSODL; Shri Sambit Sangramjit Sahoo, BDO, Chhatrapur; along with other senior officials of TPSODL.

Speaking on the occasion, Shri Krushna Chandra Nayak, Hon'ble MLA, Chhatrapur, said, "The Government is committed to promoting clean and affordable energy solutions at the grassroots level through initiatives like the ULA model under the PM Surya Ghar Muft Bijli Yojana. Such efforts are encouraging rural households to adopt solar energy, reduce electricity expenses, and become more self-reliant. We will continue to support and expand these initiatives to ensure wider adoption of renewable energy."

Highlighting the administrative push behind the initiative, Shri Keerthi Vasan V, Collector and District Magistrate, Ganjam, stated, "The district administration is

taking proactive steps to drive solar adoption at the Panchayat level by working closely with all stakeholders. Through structured planning and close coordination with TPSODL, we are ensuring that all eligible households benefit from the ULA model. We have set a target of covering 50 households from each Panchayat. Our focus is to scale this initiative across the district, promote SHGs to avail the benefits of the scheme, and make clean energy accessible to more rural communities.”

Reinforcing TPSODL’s commitment to sustainable energy, Mr. Amit Kumar Garg, CEO, stated, “The solarisation of Matikhala under the PM Surya Ghar Muft Bijli Yojana (ULA Model) marks a key step towards rural energy self-reliance. It not only reduces electricity costs for households but also ensures long-term sustainable benefits. We are committed to expanding such initiatives to build a cleaner and greener future.”

The district administration played a crucial role in supporting the implementation, ensuring seamless coordination and outreach to eligible beneficiaries. The initiative aligns with the broader objectives of the Government of India to promote rooftop solar adoption at scale, empowering households and reducing the nation’s carbon footprint.

The solarisation of Matikhala under ULA Scheme highlights how coordinated efforts can drive large-scale renewable adoption across rural India. As the nation accelerates towards its clean energy and sustainability targets, such models demonstrate a scalable pathway for energy self-reliance. Matikhala now stands as a replicable national model for sustainable green energy.

# Matikhala in Odisha's Ganjam turns solar-powered village

BERHAMPUR: (Mar 20) A village in Odisha's Ganjam district has been converted into a solar-powered settlement under the Pradhan Mantri Surya Ghar Muft Bijli Yojana, with nearly half of its households installing rooftop panels, officials said.

**PTI**

Matikhala village now has around 200 of its 450 households equipped with rooftop solar systems under the Utility-Led Aggregation (ULA) model, aimed at promoting clean energy adoption and reducing electricity costs.

Ganjam Collector V Keerthi Vasan and Chhatrapur MLA Krushna Chandra Nayak inaugurated the solar-powered village in the presence of officials of Tata Power Southern Odisha Distribution Ltd (TPSODL), the implementing discom.

## Matikhala village in Odisha steps into solar adoption, sets national benchmark

Bhubaneswar, March 19 (UNI) In a significant stride towards India's clean energy transition, Matikhala village in Odisha's Ganjam district, has become fully solarised, emerging as a model for rural renewable energy adoption under the PM Surya Ghar Muft Bijli Yojana (ULA Model). Implemented by TP Southern Odisha Distribution Limited (TPSODL), the initiative demonstrates how decentralized solar solutions can transform rural livelihoods while advancing India's sustainability goals.

Located under Kanamana Panchayat in Chhatrapur block, the village now has 200 eligible households equipped with rooftop solar connections, each with a 1 kW solar system.

# TPSODL leads rural solar adoption

POST NEWS NETWORK

Berhampur, March 19: In a significant stride towards India's clean energy transition, Matikhala village in Ganjam district of Odisha has emerged as a model for rural solar adoption, becoming fully solarised under the PM Surya Ghar Muft Bijli Yojana (ULA Model).

The initiative, implemented by TP Southern Odisha Distribution Limited (TPSODL), highlights how decentralised renewable energy solutions can transform rural livelihoods while advancing the country's sustainability goals.

Located under Kanamana Panchayat in Chhatrapur block, the village has seen 200 eligible households having a contract demand of 1 kW, equipped with rooftop solar

connections. Each beneficiary has been provided with a 1 kW solar system, enabling them to generate their own electricity, significantly reduce dependence on conventional power sources, and lower monthly electricity expenses.

Under the ULA model of the PM Surya Ghar Muft Bijli Yojana, a beneficiary contributes ₹5,622, which includes the cost of the solar panel and solar meter, making the initiative

both accessible and affordable. The model ensures long-term benefits, with solar systems designed to provide reliable energy support for up to 25 years. With this, Matikhala has become a fully solarised village under the scheme, with all eligible beneficiaries covered. The district administration of Ganjam has provided necessary financial support in achieving this milestone.

The project was inaugurat-

ed by Krishna Chandra Nayak, MLA of Chhatrapur, in the presence of villagers and senior officials. The event was graced by Keerthi Vasav V, Collector and District Magistrate of Ganjam; Amit Kumar Garg, CEO of TPSODL; Sambit Sangramjit Sahoo, BDO, Chhatrapur; along with other senior officials of TPSODL.

Reinforcing TPSODL's commitment to sustainable energy, Amit Kumar Garg, CEO, stated, "The solarisation of Matikhala under the PM Surya Ghar Muft Bijli Yojana (ULA Model) marks a key step towards rural energy self-reliance. It not only reduces electricity costs for households but also ensures long-term sustainable benefits. We are committed to expanding such initiatives to build a cleaner and greener future."

## Matikhala in Ganjam steps into solar adoption drive in Odisha, sets national benchmark

POD BUREAU

BERHAMPUR, MARCH 19

IN a significant stride towards India's clean energy transition, Matikhala village in Ganjam district of Odisha has emerged as a model for rural solar adoption, becoming fully solarised under the PM Surya Ghar Muft Bijli Yojana (ULA Model).

The initiative, implemented by TP Southern Odisha Distribution Limited (TPSODL), highlights how decentralised renewable energy solutions can transform rural livelihoods while advancing the country's sustainability goals.

Located under Kanamana Panchayat in Chhatrapur block, the village has seen 200 eligible

households having a contract demand of 1 kW, equipped with rooftop solar connections.

Each beneficiary has been provided with a 1 kW solar system, enabling them to generate their own electricity, significantly reduce dependence on conventional power sources, and lower monthly electricity expenses.

Under the ULA model of the PM Surya Ghar Muft Bijli Yojana, a beneficiary contributes Rs. 5,622, which includes the cost of the solar panel and solar meter, making the initiative both accessible and affordable.

The model ensures long-term benefits, with solar systems designed to provide reliable energy support for up to 25 years.

With this, Matikhala has

become a fully solarised village under the scheme, with all eligible beneficiaries covered.

The district administration of Ganjam has provided necessary financial support in achieving this milestone.

The project was inaugurated by Krishna Chandra Nayak, MLA Chhatrapur, in the presence of villagers and senior officials. The event was graced by Keerthi

Vasav V, Collector and District Magistrate of Ganjam; Amit Kumar Garg, CEO TPSODL; Sambit Sangramjit Sahoo BDO Chhatrapur along with other senior officials of TPSODL.

Speaking on the occasion, Nayak said, "The Government is committed to promoting clean and affordable energy solutions at the grassroots level

through initiatives like the ULA model under the PM Surya Ghar Muft Bijli Yojana. Such efforts are encouraging rural households to adopt solar energy, reduce electricity expenses, and become more self-reliant. We will continue to support and expand these initiatives to ensure wider adoption of renewable energy."

Highlighting the administrative push behind the initiative, Shri Keerthi Vasav V, Collector and District Magistrate, Ganjam, stated, "The district administration is taking proactive steps to drive solar adoption at the Panchayat level by working closely with all stakeholders. Through structured planning and close coordination with TPSODL, we are ensuring that all eligible house-

holds benefit from the ULA model. We have set a target of covering 30 households from each Panchayat. Our focus is to scale this initiative across the district, promote SBCs to avail the benefits of the scheme, and make clean energy accessible to rural communities."

Reinforcing TPSODL's commitment to sustainable energy, Mr. Amit Kumar Garg, CEO, stated, "The solarisation of Matikhala under the PM Surya Ghar Muft Bijli Yojana (ULA Model) marks a key step towards rural energy self-reliance. It not only reduces electricity costs for households but also ensures long-term sustainable benefits. We are committed to expanding such initiatives to build a cleaner and greener future."

## Ganjam's Matikhala emerges as model solar village

**HANS INDIA**

From News Agency  
Baltimore

A village in Ganjam district has been elevated into a solar-powered village under the Pradhan Mantri Kisan Solarisation Yojana (PMKSY) with nearly half of its households installing rooftop solar panels. Officials said Matikhala village now has around 200 of its 400 households equipped with rooftop solar systems under the UJA (Ujjala Aggregators) (UJA) model aimed at promoting clean energy adoption and reducing electricity costs.

the presence of officials of Tata Power Southern India Distribution Ltd (TPSODL), the implementing agency. Each beneficiary has installed a 1 kW solar system under the scheme, which is expected to lower household electricity expenses while supporting environmentally sustainable energy use of each unit. Under the UJA model, households are now beneficiaries receiving Rs 5000 towards the cost of panels, inverters and installations. The Ganjam district administration has extended financial support to eligible households, the officials said.

The TPSODL is responsible for technical execution of the project, including installation and quality assurance. The company is also providing a five-year warranty on inverters and 25 years on solar panels. Beneficiaries are expected to receive subsidised power supply at reduced rates, the officials said, adding some residents are using rooftop solar systems under the scheme.

The district administration is taking proactive steps to expedite solar adoption at the household level in coordination with stakeholders, he said. "We are ensuring that all eligible households benefit from the UJA model, with a target of covering 50 households per panchayat. Our focus is to make the initiative a success story, TPSODL and state clean energy agencies to ensure cost-effective implementation," he said.

UJA Street said the initiative reflects the government's commitment to promoting affordable and clean energy access across villages, but the UJA model would encourage wider adoption of rooftop solar. "This initiative will help households to generate their own electricity, reducing dependence on conventional power and cutting monthly electricity bills," he said.

# माटीखाल गांव बना देश का सौर ऊर्जा माडल, हर घर में लगा रूफटाप सोलर

जागरण संवाददाता, भुवनेश्वर : स्वच्छ ऊर्जा को बढ़ावा देने की दिशा में ओडिशा के गंजाम जिले का माटीखाल गांव पूरे देश के लिए एक मिसाल बनकर उभरा है। पीएम सूर्य घर मुफ्त बिजली योजना के ब्रूलए मॉडल के तहत गांव के लगभग सभी घरों में रूफटाप सोलर सिस्टम लगाया गया है, जिससे पूरा गांव अब सौर ऊर्जा से संचालित हो रहा है। इस पहल को टीपीएसओडीएल (टीपीएसओडीएल) और जिला प्रशासन के संयुक्त सहयोग से लागू किया गया है।

छत्रपुर ब्लॉक के कमलना पंचायत अंतर्गत स्थित माटीखाल गांव के करीब 200 पात्र परिवारों को योजना के तहत एक-एक किलोवाट क्षमता का सोलर सिस्टम उपलब्ध कराया गया है। इसके माध्यम से ग्रामीण अब केवल बिजली उपभोक्ता ही नहीं, बल्कि बिजली उत्पादक भी बन सकेंगे। सौर ऊर्जा के उपयोग से बिजली बिल में कमी आएगी और पारंपरिक ऊर्जा स्रोतों पर निर्भरता भी घटेगी।

योजना के तहत लाभार्थियों को मात्र 5,622 रुपये का अंशदान देना पड़ता है, जिसमें सोलर पैनल और मोटर दोनों शामिल हैं। इस सिस्टम के माध्यम से लगभग 25 वर्षों तक बिजली मिलने की सुविधा रहेगी। जिला प्रशासन ने योजना को सफल

● पीएम सूर्य घर योजना से 200 परिवार अपने बिजली उत्पादक बिल में आएगी बड़ी कमी

● टीपीएसओडीएल व जिला प्रशासन की पहल, 25 साल तक मिलेगी सस्ती बिजली

बनाने के लिए आवश्यक वित्तीय सहायता, तकनीकी सहयोग और जागरूकता अभियान भी चलाया।

परियोजना का उद्घाटन छत्रपुर विधायक कृष्ण चंद्र नायक ने किया। उन्होंने कहा कि राज्य सरकार गांव-गांव तक हरित ऊर्जा पहुंचाने के लिए प्रतिबद्ध है और माटीखाल गांव इसका सफल उदाहरण है। जिलाधिकारी कीर्ति वासन बा. ने बताया कि जिले की प्रत्येक पंचायत में सौर ऊर्जा योजना का विस्तार करने का लक्ष्य रखा गया है, ताकि

अधिक से अधिक ग्रामीण इसका लाभ उठा सकें।

टीपीएसओडीएल के सीईओ अमित कुमार गर्ग ने कहा कि माटीखाल का सौरीकरण ग्रामीण आत्मनिर्भरता की दिशा में बड़ा कदम है। यह मॉडल अन्य गांवों के लिए भी प्रेरणा बनेगा। सौर ऊर्जा को अपनाकर माटीखाल ने न केवल बिजली बचत की दिशा में कदम बढ़ाया है, बल्कि राष्ट्रीय स्तर पर अपनी अलग पहचान भी बना ली है।

**Odisha's Matikhala Becomes Fully Solarised, Sets Benchmark for Rural Energy Transition**

Each beneficiary household has been provided with a 1 kW solar unit, enabling them to generate their own electricity, reduce dependence on conventional power sources, and significantly cut monthly energy costs.

**Berhampur:** In a significant push towards green energy adoption, Matikhala village in Odisha's Ganjam district has emerged as a model for rural electrification, becoming fully solarised under the PM Surya Ghar Muft Bijli Yojana (UGA 400W).

Launched under Minister's Directive in Chhatrapur block, the village has achieved 100 per cent coverage of eligible households, with around 200 homes equipped with 1 kW rooftop solar systems. The initiative, implemented by TPL Southern Odisha Distribution Limited (TPSO DL) in collaboration with the district administration, is being seen as a scalable model for (environmental) responsible energy adoption in rural India.

Each beneficiary household has been provided with a 1 kW solar unit, enabling them to generate their own electricity, reduce dependence on conventional power sources, and significantly cut monthly energy costs. Under the UGA model, beneficiaries contribute Rs 5,622 towards installation, ensuring the scheme's sustainability while ensuring long-term returns. The solar systems are designed to provide reliable energy for up to 25 years.

Officials said the district administration played a key role in facilitating the project through financial support, planning and outreach. The model is now being expanded across Ganjam, with a target to cover at least 50 households in each Panchayat.

The project was inaugurated by Odisha's MLA Krishna Chandra Nayak in the presence of district officials and TPSO DL representatives. Ganjam Collector Veerendra Vasan said the administration is working closely with stakeholders to scale up solar adoption and make solar access to clean energy, including through self-help groups.

TPSO DL CEO Amit Kumar Singh said the initiative marks a step towards rural energy self-reliance, reducing electricity costs while ensuring sustainability.

The Matikhala model aligns with the Centre's broader push to expand rooftop solar capacity and reduce carbon emissions. By creating financial coverage within a village, it demonstrates how coordinated efforts between utilities and local administrations can accelerate the transition to renewable energy.

With its successful implementation, Matikhala is now being seen as a replicable template for other regions aiming to achieve energy self-sufficiency through clean and affordable solar power.

**200 Matikhala houses powered by solar energy**

By [Name] | New Delhi, India | [Date]

Berhampur: Around 200 houses in Matikhala, a sea shore village in Ganjam district's Chhatrapur block have been powered by solar energy. Rooftop solar panels in the utility-led aggregation (ULA) model have been installed as part of the Centre's Pradhan Mantri Surya Ghar Muft Bijli Yojana.

Collector (Ganjam) V. Veerendra Vasan and MLA (Chhatrapur) Krishna Chandra Nayak inaugurated the solar-powered village on Thursday in the presence of chief executive officer of Tata Power Southern Odisha Distribution Limited (TPSO DL) A K Singh.

Under the scheme each beneficiary has installed 1 kW solar system, which is expected to reduce power expenses for residents while promoting clean energy and environment. Under the ULA model of PM Surya Ghar Muft Bijli Yojana launched by the discom last year, a beneficiary contributes Rs 5,622, which includes the cost of the solar panel, meter and installation fees, etc.

The discom, the nodal agency for implementation of the scheme will ensure end-to-end execution, including installation and quality assurance. The company will also provide a 5-year warranty on system components and 25 years on the solar panels, sources said.

The beneficiaries who installed the rooftop solar panel will be able to get an uninterrupted power supply at a lower rate, said the collector. He asked the others to come forward to install the rooftop solar system to get renewable and clean energy under the scheme. He said the district administration was taking proactive steps to drive solar adoption at the panchayat level by working closely with the stakeholders.

The MLA said the govt was committed to provide clean and affordable energy in rural areas. The ULA model will encourage the rural households to adopt the solar system due to its affordable cost.

## This Ganjam Village Achieves Complete Rooftop Solar Coverage

By Ommcomnews | Published: 14th March 2024 | 11:00 AM IST

**Bhubaneswar:** Matikhala, a village in Ganjam district, has emerged as a shining example of rural clean energy transition by becoming a fully solar-powered community under the Pradhan Mantri Surya Ghar Muft Bijli Yojana.

Inspired by the Chhattisgarh Shakti Yojana, Karmaveer Parikshit, the village has achieved 100% coverage among its eligible households. Out of approximately 450 total households, around 200 have successfully installed 1 kW rooftop solar systems.

The initiative operates through the Utility-Led Aggregation (ULA) model, an initiative last year to accelerate solar adoption in rural areas. Under this approach, each participating household contributes just Rs. 1,622 towards the solar panel, meter, and installation costs.

The Ganjam district administration has provided additional financial assistance to support eligible families in meeting the scheme. Ganjam Collector V Kaverfi Misra and Chhatrapur MLA Krushna Chandra Nayak officially inaugurated the solar-powered village during a ceremony attended by representatives from Tata Power Southern Odisha Distribution Ltd (TPSODL), the distribution company leading the project. TPSODL handles the complete implementation—from installation and quality checks to ongoing support—offering a five-year warranty on system components and a 25-year warranty on the solar panels themselves.

Households now benefit from reliable, uninterrupted electricity at significantly lower costs, while contributing to environmental sustainability by generating their own clean power and reducing reliance on the grid.

Collector Misra highlighted the scheme's potential to cut electricity bills and encouraged more villagers to join. He noted that the district is actively collaborating with stakeholders to scale up rooftop solar adoption across parichayats.

MLA Nayak praised the effort as a clear demonstration of the government's dedication to delivering affordable, sustainable energy to rural communities, expressing confidence that the ULA model will inspire wider participation nationwide.

## Odisha: Matikhala in Ganjam turns solar-powered village

By The Odisha Post | Published: 14th March 2024, 11:48 AM | State-Op Stories

**Bhubaneswar:** A village in Odisha's Ganjam district has been converted into a solar-powered settlement under the Pradhan Mantri Surya Ghar Muft Bijli Yojana, with nearly half of its households installing rooftop panels, officials said.

Matikhala village now has around 200 of its 450 households equipped with rooftop solar systems under the Utility-Led Aggregation (ULA) model, aimed at promoting clean energy adoption and reducing electricity costs.

Ganjam Collector V Kaverfi Misra and Chhatrapur MLA Krushna Chandra Nayak inaugurated the solar-powered village in the presence of officials of Tata Power Southern Odisha Distribution Ltd (TPSODL), the implementing firm.

Each beneficiary has installed a 1 kW solar system under the scheme, which is expected to lower household electricity expenses while supporting environmentally sustainable energy use, officials said.

Under the ULA model launched last year, beneficiaries contribute Rs. 1,622 towards the cost of panels, meters and installation. The Ganjam district administration has extended financial support to eligible households, the officials said.

The TPSODL is responsible for end-to-end execution of the project, including installation and quality assurance. The company is also providing a five-year warranty on system components and 25 years on solar panels, they said.

Beneficiaries are expected to receive an uninterrupted power supply at reduced rates, the collector said, urging more residents to adopt rooftop solar systems under the scheme.

The district administration is taking proactive steps to expand solar adoption at the panchayat level in coordination with stakeholders, he said.

MLA Nayak said the initiative reflects the government's commitment to providing affordable and clean energy in rural areas, adding that the ULA model would encourage wider adoption.

# Odisha: गंजाम का माटीखाला गांव सौर ऊर्जा से चलने वाला गांव बना

PTI [Follow Us](#)    

**Barampur, Odisha:** अधिकारियों ने बताया कि ओडिशा के गंजाम जिले का एक गांव **Matikhala** सूर्य से चलाया बिजली योजना के तहत सौर ऊर्जा से चलने वाली बनती है। बदल गया है, जहाँ लगभग आधी घड़ी में लगभग 1000 घरों में सौर ऊर्जा प्रणाली का उपयोग किया गया है। माटीखाला गांव के 450 घरों में से लगभग 200 घरों में सौर ऊर्जा प्रणाली का उपयोग (ULA) मॉडल के तहत 1KW सौर प्रणाली का उपयोग किया गया है। इस मॉडल का मतलब है कि लोगों को बढ़ावा देना और बिजली का खर्च कम करना है। गंजाम के कलेक्टर वी, कीरथी वासारी और चतुरपुर के विधायक कृष्णा चंद्रा नायक ने इस सौर-ऊर्जा वाले गांव का उद्घाटन किया। इस मौके पर हुए संबोधन में नायक ने बताया कि बिजली योजना योजना (विजलीय) - 2024 भारत-भारत अद्वितीय डिजिटल इंडिया (TPSODL) के अंतर्गत है।

अधिकारियों ने बताया कि इस योजना के तहत हर घरों में 1.5KW का सौर प्रणाली का उपयोग है। इससे घरों का बिजली का खर्च कम होने की उम्मीद है और यह है। गंजाम के अनुष्ठान कार्यों के प्रोत्साहन को भी बढ़ावा मिलेगा। इससे गांव का विकास होगा और लोगों को बेरोजगारी से निवारित करने में मदद करेगा और गांव में 15,000 घरों को जोड़ेगा। अधिकारियों ने बताया कि गंजाम जिला प्रशासन ने योजना को बढ़ावा देने में मदद करेगी।

इस योजना को शुरू से अग्रिम में आगे बढ़ाने की उम्मीदों को प्रोत्साहित करेगा और इसे, बिजली योजना (विजलीय) योजना और अन्य योजनाओं को जोड़कर भी बढ़ावा देगा। अधिकारियों ने बताया कि अग्रिम विकास के अलावा, प्रत्येक घरों में सौर ऊर्जा प्रणाली का उपयोग करके 25 साल की वारंटी भी दी जाएगी। अंततः, योजना के तहत, लाभार्थियों को बेरोजगारी से निवारित करने में मदद करेगी और गांव में बिजली प्रणाली का उपयोग करके बिजली मिलाने की उम्मीद है। लोगों को गांव में और भी लोगों से इस योजना के प्रसार को बढ़ावा देने की उम्मीद है, सौर प्रणाली का उपयोग करके।

उन्होंने बताया कि बिजली योजना, हर घरों में 1.5KW सौर प्रणाली के साथ बिजली, प्रत्येक घरों में सौर ऊर्जा को बढ़ावा देने के लिए सक्रिय कार्य कर रहा है। विभागीय स्तर पर कहा कि यह सौर ऊर्जा प्रणाली में सौर और अन्य सौर ऊर्जा को बढ़ावा देने के लिए कार्यक्रम की पहल करने की उम्मीद है। उन्होंने कहा कि ULA मॉडल से लोगों को और भी ज्यादा लाभ मिलेगा।

Tata Power, an India-based integrated power company, has supported efforts that made Matikhola village in Odisha's Ganjam district fully solar-powered under the Utility-Led Aggregation (ULA) model of PM Surya Ghar Muft Bijli Yojana. According to the article, all 200 eligible households in the Chhatrapur block village have received 1 kW rooftop solar systems, enabling local electricity generation. Under the model, each beneficiary has contributed INR 5,622 (-\$61.84) as the upfront amount, while the rollout was supported by the district administration and implemented in coordination with Tata Power Southern Odisha Distribution Limited (TPSODL), an electricity distribution company. Kaerthi Vasani V, Collector and District Magistrate, Ganjam, said officials have set a target of covering 50 households from each Panchayat. Krishna Chandra Nayak, MLA, Chhatrapur, said the initiative is helping rural households adopt solar energy and reduce electricity expenses.

## Matikhola Fully Solarised Under PM Surya Ghar Scheme

By **Kaerthi Srinivasan G**

In a significant stride towards India's clean energy transition, Matikhola village in Ganjam district of Odisha has emerged as a model for rural solar adoption after becoming fully solarised under the PM Surya Ghar Muft Bijli Yojana (UGA model). The initiative was implemented by TP Southern Odisha Distribution Limited (TPSODL) and demonstrates how decentralised renewable energy solutions can transform rural households while supporting national sustainability goals. The village is located under Ramamandir Panchayat in Chhatrapur block.

Two hundred eligible households with a contract demand of one kilowatt (kW) have been equipped with rooftop solar connections, with each beneficiary provided with a one kW system to generate electricity and reduce dependence on conventional power sources. The systems are designed to provide reliable energy support for up to 25 years and are expected to lower monthly electricity expenses for households. The district administration of Ganjam supplied necessary financial support to achieve full coverage of eligible beneficiaries.

Under the UGA model a beneficiary contributes Rs. 5,622 which covers the cost of the solar panel and solar meter, making the scheme accessible and affordable for rural families. The model ensures long-term benefits and has resulted in Matikhola being declared fully solarised with all eligible households covered. District powers have set a target of covering 50 households from each Panchayat and intend to promote self-help groups to facilitate wider uptake.

The project was inaugurated by Krishna Chandra Nayak, the MLA of Chhatrapur, in the presence of the Collector and District Magistrate (Kaerthi Vasani V, the CEO of TPSODL, Amal Kumar Darg, the SDO of Chhatrapur, Samit Saranjit Sahoo and other senior officials. Officials indicated that the government is committed to promoting clean and affordable energy solutions at the grassroots and will continue to support expansion of the UGA model. TPSODL stated that it is committed to scaling similar initiatives to build cleaner and greener rural energy systems.

**Odisha's Matikhala village sets a national benchmark in rural solar adoption**

**March 20** 10:00 AM | [Go to article](#) | [Print this article](#) | [Share a link to this article](#)

*By Prakash Padhyani*

Bhubaneswar, March 20: In a landmark step towards India's clean energy transition, Matikhala village in Odisha's Ganjam district has emerged as a model of rural solar adoption, setting a benchmark at the national level. Fully solarized under the PM Surya Ghar Yojana (UJALA Model), the initiative demonstrates how decentralized renewable energy solutions can transform rural livelihoods while advancing sustainability goals.

Implemented by TP Southern Odisha Distribution Limited (TPSO DL), the project has covered all 200 eligible households in the village, each with a rooftop demand of 2 kW. Every beneficiary has been equipped with a 2 kW rooftop solar system, ensuring households to generate their own electricity, significantly reducing dependence on conventional power sources, and reduce monthly energy expenses.

Located under Panchayat Kpochhapal in Unhitaput Block, Matikhala's transformation highlights the effectiveness of targeted policy implementation at the grassroots level. Under the UJALA Model, beneficiaries contribute a minimal amount of Rs 2,000, covering the cost of solar panels and netting, making the scheme both financially and affordable. Designed for long-term impact, these systems are expected to provide reliable energy for up to 25 years, ensuring sustainable benefits for rural households.

With complete coverage of all eligible families, Matikhala now stands as a fully solarized village under the scheme. The Ganjam district administration played a crucial role in facilitating financial support and ensuring smooth execution, further ensuring the model's success.

The project was inaugurated by Minister, Chandan Kumar in the presence of senior officials and officials. Among them present were Minister, Devendra K. Chakrabarti and District Magistrate of Ganjam, Anil Kumar Singh, CEO of TPSODL and Senior Engineering Officer, SOO of Odisha.

Speaking on the occasion, Minister emphasized the government's commitment to promoting clean and affordable energy solutions at the grassroots level. He noted that initiatives like the UJALA are empowering rural households to adopt solar energy, reduce electricity costs, and reap the benefits of self-reliance.

Highlighting the administrative drive, Minister Anil Kumar Singh said the district is actively promoting solar adoption across various blocks through continuous efforts with stakeholders. With a target of covering 200 households in each panchayat, the administration aims to scale up the initiative, encourage self-help groups to participate, and expand access to clean energy across rural communities.

Reaffirming TPSODL's commitment, CEO Anil Kumar Singh stated that the solarization of Matikhala marks a significant step towards rural energy independence, paving the way for a cleaner, greener future.

# Matikhala Sets A National Benchmark In Rural Solar Adoption In Odisha

By: May 19, 2024

By Lipse Prtyoshkshi

Bhubaneswar, May 19: In a landmark step towards India's clean energy transition, Matikhala village in Odisha's Ganjam district has emerged as a model of rural solar adoption, setting a benchmark at the national level. Fully aligned under the PM Surya Ghar Muft Bijli Yojana (UJA Model), the initiative demonstrates how decentralized renewable energy solutions can transform rural livelihoods while advancing sustainability goals.

Implemented by TP Southern Odisha Distribution Limited (TPSODL), the project has covered all 201 eligible households in the village, each with a contract demand of 1 kW. Every beneficiary has been equipped with a 1 kW rooftop solar system, enabling households to generate their own electricity, significantly cut dependence on conventional power sources, and reduce monthly energy expenses.

Located under Kankamesa Panchayat in Chikrapur block, Matikhala's transformation highlights the effectiveness of targeted policy implementation at the grassroots level. Under the UJA model, beneficiaries contribute a nominal amount of Rs 1,000, covering the cost of solar panels and install, making the scheme both accessible and affordable. Designed for long-term impact, these systems are expected to provide reliable energy for up to 25 years, ensuring sustained benefits for rural households.

With complete coverage of all eligible families, Matikhala now stands as a fully powered village under the scheme. The Ganjam district administration played a crucial role in facilitating financial support and ensuring smooth execution, further strengthening the model's success.

The project was inaugurated by Hrishikesh Chandra Nayak in the presence of senior officials and villagers. Among those present were Kaarthi Vasan V, Collector and District Magistrate of Ganjam; Amit Kumar Singh, CEO of TPSODL; and Santosh Singhrajit Sahoo, BDO of Chikrapur.

Addressing the villagers, Nayak emphasized the government's commitment to promoting clean and affordable energy solutions at the grassroots level. He noted that initiatives like this scheme are empowering rural households to adopt solar energy, reduce electricity costs, and move towards self-reliance.

Highlighting the administrative drive, Collector Kaarthi Vasan V said the district is actively promoting solar adoption across panchayats through coordinated efforts with stakeholders. With a target of covering 50 households in each panchayat, the administration aims to scale up the initiative, encourage village groups to participate, and extend access to clean energy across rural communities.

Reaffirming TPSODL's commitment, CEO Amit Kumar Singh stated that the realization of Matikhala marks a significant step towards rural energy independence, paving the way for a cleaner, greener future.

## Thousands Gain as TPSODL Energises Berhampur Substation

- Feeder network strengthens key residential & commercial areas
- Ensures reduced outages and improved voltage stability

**Berhampur, March:** TP Southern Odisha Distribution Limited, a joint venture between Tata Power and the Government of Odisha, has commissioned a new 33/11 KV Primary Substation (New Khalikote College PSS) under BED-1, to strengthen power infrastructure and enhance supply reliability in Berhampur and surrounding areas.

The newly constructed PSS is equipped with two 10 MVA Power Transformers (PTRs), significantly improving load management and ensuring better voltage stability for consumers. The substation is fed through two incoming 33 kV from New Medical PSS (1.6 km) and Ambagada (7 km), ensuring a reliable power supply system.

With 7.5 km of multiple 11 kV outgoing feeders—covering Hill Patna, City Hospital, Old Bus Stand and Tata Benz area, SBI main (Pani Tanki Area)- the distribution network in key commercial and residential belts has been strengthened. This development will improve supply quality, reduce outages, and address voltage fluctuation issues to a considerable extent.

Approximately 15,000 consumers will benefit from this new PSS. It will cater to major areas including Hill Patna locality, Tata Benz area, commercial establishments around Old Bus Stand, and the SBI Main (Pani Tanki area), thereby supporting both residential and commercial growth in the region.

Mr. Amit Kumar Garg, CEO of TPSODL, stated: “The New Khalikote College PSS will significantly ease the load on existing infrastructure and improve overall service reliability. This initiative reflects our continued commitment to strengthening the power distribution network and delivering quality electricity services to consumers.”

TPSODL continues to focus on infrastructure development across Southern Odisha, with ongoing investments in capacity augmentation and network expansion, ensuring reliable and efficient power supply for all.

कंपनी के अनुसार, इस सब-स्टेशन के शुरू होने से बरहमपुर शहर और आसपास के क्षेत्रों में बिजली आपूर्ति अधिक विश्वसनीय हो जाएगी तथा उपभोक्ताओं को लो वोल्टेज और बार-बार होने वाली कटौती की समस्या से राहत मिलेगी। नए सब-स्टेशन में 10 एमवीए क्षमता

बरहमपुर में नए सब-स्टेशन का उद्घाटन • जागरण

के दो पावर ट्रांसफॉर्मर लगाए गए हैं, जिससे लोड प्रबंधन आसान होगा और उपभोक्ताओं को स्थिर वोल्टेज मिल सकेगा।

इस सब-स्टेशन को न्यू मेडिकल पीएसएस और अंबागढ़ से दो 33 केवी इनकमिंग लाइनों के माध्यम से जोड़ा गया है, जिससे निर्वाह

बिजली आपूर्ति सुनिश्चित की गई है। इसके अलावा करीब 7.5 किमी लंबी 11 केवी आउटगोइंग फीडर लाइन के जरिए हिल पटना, सिटी अस्पताल, पुराना बस स्टैंड, टाटा बेंज और पानी टंकी सहित कई व्यावसायिक एवं आवासीय क्षेत्रों को जोड़ा गया है।

# ब्रह्मपुर में नए सब स्टेशन से बिजली व्यवस्था मजबूत

नवभारत ब्यूरो। भुवनेश्वर। ब्रह्मपुर में बिजली आपूर्ति को सुदृढ़ करने के लिए टीपी सदरन ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने एक नई 33/11 केवी ग्राइमरी सबस्टेशन (न्यू खालिकोट कॉलेज पीएसएस) को चालू कर दिया है। यह परियोजना दक्षिण ओडिशा में पावर इंफ्रास्ट्रक्चर को मजबूत करने और उपभोक्ताओं को बेहतर बिजली सेवा देने की दिशा में एक महत्वपूर्ण कदम माना जा रही है। नई सबस्टेशन में दो 10 एमवीए पावर ट्रांसफॉर्मर लगाए गए हैं, जिससे बिजली लोड को बेहतर तरीके से प्रबंधित किया जा सकेगा। इससे उपभोक्ताओं को स्थिर वोल्टेज और निर्बाध बिजली आपूर्ति मिलने की उम्मीद है। यह सबस्टेशन न्यू मेडिकल पीएसएस (1.6 किमी) और अंबागड़ा (7 किमी) से 33 केवी लाइन के माध्यम से जुड़ा हुआ है, जिससे सप्लाय और अधिक विश्वसनीय बनी रहेगी।

करीब 7.5 किमी लंबी 11 केवी आउटगोइंग फीडर लाइनें हिल पटन, सिटी हॉस्पिटल, ओल्ड बस स्टैंड, टाटा बेंच क्षेत्र और एसबीआई मेन (पानी टंकी क्षेत्र) जैसे प्रमुख इलाकों को कवर करेंगी। इससे इन व्यावसायिक और आवासीय क्षेत्रों में बिजली आपूर्ति की गुणवत्ता में सुधार होगा और बार-बार होने वाली बिजली कटौतों व वोल्टेज फ्लक्चुएशन की समस्या कम होगी।

इस नए सबस्टेशन से लगभग 15,000 उपभोक्ताओं को लाभ

मिलेगा। खासतौर पर टाटा बेंच एरिया, ओल्ड बस स्टैंड के आसपास के व्यावसायिक प्रतिष्ठान और एसबीआई मेन क्षेत्र के लोग इससे सीधे तौर पर लाभान्वित होंगे। यह परियोजना क्षेत्र के आर्थिक और शहरी विकास को भी बढ़ावा देगी। टीपीएसओडीएल के सीईओ अमित कुमार गर्ग ने कहा कि यह नया सबस्टेशन मौजूदा बिजली डिमांड पर दबाव कम करेगा और सेवा की विश्वसनीयता को बढ़ाएगा। उन्होंने इसे उपभोक्ताओं को बेहतर गुणवत्ता की बिजली उपलब्ध कराने की दिशा में कंपनी की प्रतिबद्धता बताया।

**Berhampur:** TP Southern Odisha Distribution Limited, a joint venture between Tata Power and the Government of Odisha, has commissioned a new 33/11 KV Primary Substation (New Khalkote College PSS) under BED-1, to strengthen power infrastructure and enhance supply reliability in Berhampur and surrounding areas.

The newly constructed PSS is equipped with two 10 MVA Power Transformers (PTTs), significantly improving load management and ensuring better voltage stability for consumers. The substation is fed through two incoming 33 kV from New Medical PSS (1.6 km) and Ambagada (7 kms), ensuring a reliable power supply system.

...of existing infrastructure and improve overall service reliability. This initiative reflects our continued commitment to strengthening the power distribution network and delivering quality electricity services to consumers.

TPSODL continues to focus on infrastructure development across Southern Odisha, with ongoing investments in capacity augmentation and network expansion, ensuring reliable and efficient power supply for all.

- Feeder network strengthens key residential & commercial areas
- Ensures reduced outages and improved voltage stability

By Prakash Panigrahi

Berhampur, March: TP Southern Odisha Distribution Limited, a joint venture between Tata Power and the Government of Odisha, has commissioned a new 33/11 KV Primary Substation (New Khalkote College PSS) under BED-1, to strengthen power infrastructure and enhance supply reliability in Berhampur and surrounding areas.

The newly constructed PSS is equipped with two 10 MVA Power Transformers (PTTs), significantly improving load management and ensuring better voltage stability for consumers. The substation is fed through two incoming 33 kV from New Medical PSS (1.6 km) and Ambagada (7 kms), ensuring a reliable power supply system.

With 7.5 km of multiple 11 kV outgoing feeders—covering Hill Patna, City Hospital, Old Bus Stand and Tata Benz area, SBI main (Pari Tanki Area)- the distribution network in key commercial and residential belts has been strengthened. This development will improve supply quality, reduce outages, and address voltage fluctuation issues to a considerable extent.

Approximately 15,000 consumers will benefit from this new PSS. It will cater to major areas including Hill Patna locality, Tata Benz area, commercial establishments around Old Bus Stand, and the SBI Main (Pari Tanki area), thereby supporting both residential and commercial growth in the region.

Mr. Amit Kumar Garg, CEO of TPSODL, stated: "The New Khalkote College PSS will significantly ease the load on existing infrastructure and improve overall service reliability. This initiative reflects our continued commitment to strengthening the power distribution network and delivering quality electricity services to consumers."

TPSODL continues to focus on infrastructure development across Southern Odisha, with ongoing investments in capacity augmentation and network expansion, ensuring reliable and efficient power supply for all.

**ओडिशा में बिजली के लो वोल्टेज की समस्या खत्म, बरहमपुर में TPSODL ने शुरू किया नया सब-स्टेशन**

By SURESH KUMAR | Updated by SHALINI KARANJIA  
JAGRAN.COM | 2025-03-26 10:00 AM

टीपीएसओडीएल ने बरहमपुर में नए सबस्टेशन (वोल्टेज 33/11 केवी) काग्रेसरी सब-स्टेशन का उद्घाटन किया। (वीडियो) जगन मुन्दाग पार्क में इसे चालू किया।

बरहमपुर में नए सब-स्टेशन का उद्घाटन

जगन मुन्दाग पार्क, बरहमपुर। टीपीएसओडीएल (टीपीएसओडीएल) ने बरहमपुर शहर की बिजली आपूर्ति को सुदृढ़ बनाने की दिशा में बड़ा कदम उठाने के लिए बरहमपुर उपविभागीय कार्यालय (का के अंतर्गत) नए सबस्टेशन (वोल्टेज 33/11 केवी) काग्रेसरी सब-स्टेशन को चालू कर दिया।

राज्य के मुख्य कार्यकारी अधिकारी जगन मुन्दाग पार्क में उद्घाटन कार्यक्रम किया। इस सम-उद्घाटन के दौरान जेपीएसओडीएल और जगन पार्क के बीच में बिजली आपूर्ति और अधिक विश्वसनीय को जगदी उपभोक्ताओं को जोड़े और शक्ति आपूर्ति को सुदृढ़ किया गया।

**10 किलोमीटर के लंबाई का नया सब-स्टेशन**

नया सब-स्टेशन में 10 किलोमीटर लंबाई के दो फेज ट्रांसफॉर्मर स्थापित किए हैं, जिसकी लंबाई 100 मीटर है और 10 ट्रांसफॉर्मरों को स्थापित किया गया है। इस सबस्टेशन की नए सबस्टेशन (वोल्टेज 33/11 केवी) और 10 ट्रांसफॉर्मर (1.6 किमी) और 10 ट्रांसफॉर्मर (1.7 किमी) के दो 33 केवी ट्रांसफॉर्मर स्थापित की जा रहे हैं, जिसके बिना बिजली आपूर्ति सुनिश्चित होगी।

वोल्टेज 7.5 केवी लंबी 11 केवी उपभोक्ताओं को बिजली आपूर्ति के लिए होगा, जिसे जगन पार्क, बरहमपुर, बरहमपुर, जगदी उपविभागीय कार्यालय के चारों ओर स्थापित और आवासीय इलाकों को जोड़ा गया है। इससे इन इलाकों में बिजली की आपूर्ति सुदृढ़ होगी, वोल्टेज में बिजली बढ़ेगी और बर-बर होने वाली कटौतों से बचाव मिलेगा।

## Thousands gain as TPSODL energises Berhampur Substation

Berhampur(24/03/2026): TP Southern Odisha Distribution Limited, a joint venture between Tata Power and the Government of Odisha, has commissioned a new 33/11 KV Primary Substation (New Khalikote College PSS) under BED-I, to strengthen power infrastructure and enhance supply reliability in Berhampur and surrounding areas. The newly constructed PSS is equipped with two 10 MVA Power Transformers (PTRs), significantly improving load management and ensuring better voltage stability for consumers.

The substation is fed through two incoming 33 kV from New Medical PSS (1.6 km) and Amalgada (7 km), ensuring a reliable power supply system. With 7.5 km of multiple 11 kV outgoing feeders—covering Hill Patna, City Hospital, Old Bus Stand and Tata Benz area, SBI main (Pani Tashi Area)—the distribution network in key commercial and residential belts has been strengthened.

This development will improve supply quality, reduce outages, and address voltage fluctuation issues to a considerable extent. Approximately 15,000 consumers will benefit from this new PSS.

It will cater to major areas including Hill Patna locality, Tata Benz area, commercial establishments around Old Bus Stand, and the SBI Main (Pani Tashi area), thereby supporting both residential and commercial growth in the region. Amit Kumar Garg, CEO of TPSODL, stated: "The New Khalikote College PSS will significantly ease the load on existing infrastructure and improve overall service reliability."

This initiative reflects our continued commitment to strengthening the power distribution network and delivering quality electricity services to consumers." TPSODL continues to focus on infrastructure development across Southern Odisha, with ongoing investments in capacity augmentation and network expansion, ensuring reliable and efficient power supply for all.

**PRESS RELEASE**

## **TPSODL to Organize Special Camps for Settlement of Electricity Theft Cases on March 30–31**

- \* Single-window platform to facilitate easy resolution of electricity theft cases
- \* Camps to be conducted across all Division, Sub-Division and Section Offices of TPSODL
- \* Around 4,600 cases resolved during the recent Lok Adalat

**Berhampur, March 26, 2026:** TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, will organize a Special Enforcement Camp on March 30 and 31, 2026, across its areas of operation.

The initiative is aimed at offering consumers a convenient, transparent, and single-window platform to settle cases related to unauthorized use of electricity and theft.

This move comes in the wake of the successful Lok Adalat held on March 14, 2026, during which TPSODL facilitated the on-the-spot resolution of around 4,600 enforcement-related cases. The initiative enabled consumers to close their cases through a simple and hassle-free process, demonstrating the effectiveness of such mechanisms in clearing a large number of pending cases.

Building on this positive response, TPSODL has urged consumers with pending enforcement cases to participate in the upcoming special drive and avail the benefit of on-the-spot settlement. This will help them regularize their power connections and avoid further legal consequences.

The camps will be organized from 9:00 AM to 5:00 PM at all Division, Sub-Division, and Section Offices under TPSODL's jurisdiction. Dedicated teams, including enforcement personnel, legal experts, and support staff, will be present to assist consumers throughout the process.

Consumers are encouraged to visit their nearest TPSODL office to obtain details regarding eligibility, required documentation, and settlement procedures. TPSODL has appealed to all eligible consumers to make the most of this limited-period opportunity and resolve their cases promptly through this streamlined initiative.

# TPSODL to hold special camps for power theft case settlement:

**Berhampur:** TP Southern Odisha Distribution Ltd (TPSODL) will organise Special Enforcement Camps on 30 and 31 March across its operational areas to help consumers settle electricity theft and unauthorised use cases. The camps will be held from 9 a.m. to 5 p.m. at all Division, Sub-Division and Section Offices under its jurisdiction. The initiative aims to provide a transparent, single-window platform for on-the-spot resolution of pending enforcement cases. TPSODL said the move follows the successful Lok Adalat on March 14, where around 4,600 cases were resolved. Consumers have been urged to use this limited-period opportunity to regularise connections and avoid legal action.

- \* Single-window platform to facilitate easy resolution of electricity theft cases
- \* Camps to be conducted across all Division, Sub-Division and Section Offices of TPSODL
- \* Around 4,600 cases resolved during the recent Lok Adalat

Berhampur: TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, will organize a Special Enforcement Camp on March 30 and 31, 2026, across its areas of operation.

The initiative is aimed at offering consumers a convenient, transparent, and single-window platform to settle cases related to unauthorized use of electricity and theft.

This move comes in the wake of the successful Lok Adalat held on March 14, 2026, during which TPSODL facilitated the on-the-spot resolution of around 4,500 enforcement-related cases. The initiative enabled consumers to close their cases through a simple and hassle-free process, demonstrating the effectiveness of such mechanisms in clearing a large number of pending cases.

Building on this positive response, TPSODL has urged consumers with pending enforcement cases to participate in the upcoming special drive and avail the benefit of on-the-spot settlement. This will help them regularize their power connections and avoid further legal consequences.

The camps will be organized from 9:00 AM onwards at all Division, Sub-Division, and Section Offices under TPSODL's jurisdiction. Dedicated teams, including enforcement personnel, legal experts, and support staff, will be present to assist consumers throughout the process.

Consumers are encouraged to visit their nearest TPSODL office to obtain details regarding eligibility, required documentation, and settlement procedures. TPSODL has appealed to all eligible consumers to make the most of this limited-period opportunity and resolve their cases promptly through this streamlined initiative.

TP SOUTHERN ODISHA  
DISTRIBUTION LIMITED

(A Joint Venture of Tata Power and Government of Odisha)

## TPSODL to organize special camps for settlement of electricity theft cases

Berhampur(26/03/2026): TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, will organize a Special Enforcement Camp on March 30 and 31, 2026, across its areas of operation. The initiative is aimed at offering consumers a convenient, transparent, and single-window platform to settle cases related to unauthorized use of electricity and theft. This move comes in the wake of the successful Lok Adalat held on March 14, 2026, during which TPSODL facilitated the on-the-spot resolution of around 4,800 enforcement-related cases.

The initiative enabled consumers to close their cases through a simple and hassle-free process, demonstrating the effectiveness of such mechanisms in clearing a large number of pending cases. Building on this positive response, TPSODL has urged consumers with pending enforcement cases to participate in the upcoming special drive and avail the benefit of on-the-spot settlement.

This will help them regularize their power connections and avoid further legal consequences. The camps will be organized from 9:00 AM onwards at all Division, Sub-Division, and Section Offices under TPSODL's jurisdiction.

Dedicated teams, including enforcement personnel, legal experts, and support staff, will be present to assist consumers throughout the process. Consumers are encouraged to visit their nearest TPSODL office to obtain details regarding eligibility, required documentation, and settlement procedures.

TPSODL has appealed to all eligible consumers to make the most of this limited-period opportunity and resolve their cases promptly through this streamlined initiative.

**PRESS RELEASE**

## TPSODL Deploys Tech, Manpower for Summer Supply

- \* TPSODL gears up for 855 MW summer demand
- \* Advanced control centres ensure real-time grid monitoring
- \* 145.5 MVA capacity added to strengthen network
- \* Drone surveys boost maintenance and fault detection
- \* 5,925 personnel deployed for rapid restoration

**Berhampur, March 2026:** With summer approaching and electricity demand expected to rise significantly, TP Southern Odisha Distribution Limited (TPSODL) has stepped up its preparedness to ensure reliable power supply across its service areas. The company anticipates peak demand to reach around 855 MW and has rolled out a series of measures covering technology, infrastructure, and customer service to meet this demand efficiently.

At the core of TPSODL's strategy is a strong, round-the-clock monitoring system. The company operates a Centralized Power System Control Centre (PSCC) in Berhampur, supported by decentralised Area Power System Control Centres (APSCCs) in Jeypore, Rayagada, and Phulbani. These centres are equipped with advanced SCADA systems that allow engineers to monitor the entire power distribution network in real time, including 33 kV feeders, Primary Substations (PSS), and 11 kV feeders.

This system captures critical operational data such as feeder-wise interruptions, helping teams quickly identify faults and restore supply faster. To further strengthen reliability, TPSODL also has a backup control centre at the TPCODL Technology Centre in Bhubaneswar, which ensures automatic failover and zero downtime during emergencies.

During the summer months, when electricity usage peaks, continuous monitoring becomes crucial. TPSODL has introduced dedicated dashboards at control centres to track feeder loading in real time. This helps PSCC Engineers take quick decisions and preventive actions to avoid overloading and maintain stable supply.

In case of power disruptions, especially when an 11 kV feeder trips, restoration work begins immediately. Using SCADA technology, control centre teams can remotely initiate trial charging while following strict safety protocols. This significantly reduces outage duration and improves overall service reliability.

On the infrastructure front, TPSODL has undertaken major upgrades to strengthen the network. The company has added 145.5 MVA capacity to its sub-transmission system through transformer and substation improvements. Additionally, 96 MVA capacity has been added to the distribution network by installing new distribution transformers and upgrading existing ones.

Network expansion has also been a key focus area. TPSODL has extended its network by 52.31 circuit kilometres (CKM) of sub-transmission lines, 145 CKM of 11 kV lines, and 1552 CKM of low-tension (LT) lines. At the same time, feeder augmentation and the installation of

On-Load Tap Changers (OLTCs) have been carried out to maintain proper voltage levels even during peak demand.

To handle high load conditions effectively, TPSODL has institutionalised centralised control of 33 kV operations across substations. This is supported by contingency planning and dynamic load management systems, ensuring that the system can handle peak demand without the need for load curtailment.

The company has also embraced modern technology to improve maintenance. TPSODL is now using drone-based surveys for its 33 kV network. These drones capture high-resolution images, helping teams detect even small defects and overheating points that are not visible during manual inspections. This proactive approach reduces the chances of sudden outages.

In another major step, TPSODL has overhauled 40 high-capacity power transformers and installed 152 new Vacuum Circuit Breakers (VCBs). These upgrades are specifically aimed at preventing failures caused by extreme summer heat and ensuring stable power supply during high-demand periods.

On the consumer service side, TPSODL has strengthened its outreach and response systems. Consumers will receive outage updates in multiple languages through social media platforms. Call centre operations have been upgraded and SMS alerts and call-back options have been introduced to manage high volumes of consumer complaints more efficiently.

To ensure quick restoration of power, the company has deployed over 5,925 personnel across its operational areas. TPSODL has also focused on safety by carrying out preventive maintenance of primary feeders and refurbishing distribution substations to reduce the risk of faults during summer.

Speaking about the preparations, Mr. Amit Kumar Garg, CEO, TPSODL, said, "Ensuring reliable and quality power supply during the summer months is our top priority. With strengthened infrastructure, advanced monitoring systems, and a highly responsive workforce, TPSODL is fully prepared to meet the rising demand while enhancing service reliability and safety for our consumers."

With these comprehensive measures in place, TPSODL aims to deliver uninterrupted, safe, and efficient power supply to consumers across Southern Odisha throughout the summer season.

# Ensuring reliable summer power supply our top priority, says TPSODL CEO Garg

**PBD BUREAU**

**BERHAMPUR, MAR 26**

**POLITICAL &  
BUSINESS  
DAILY**

ENSURING reliable and quality power supply during the summer months is the top priority, TPSODL CEO Amit Kumar Garg said as the company stepped up preparedness to meet rising electricity demand.

“With strengthened infrastructure, advanced monitoring systems and a highly responsive workforce, TPSODL is fully prepared to meet the rising demand while enhancing service reliability and safety,” Garg said.

TPSODL said peak demand is expected to reach around 855 MW and measures covering technology, infrastructure and

consumer services have been put in place.

The company said it is operating a round-the-clock monitoring system through its Centralised Power System Control Centre in Berhampur, supported by regional control centres equipped with SCADA systems for real-time network monitoring.

It added that infrastructure augmentation, including addition of sub-

transmission and distribution capacity, network expansion and installation of key equipment, has been undertaken to ensure stability during peak demand.

TPSODL said steps have also been taken to strengthen outage management and consumer services, including upgraded call centre operations and real-time communication through social media platforms.

## TPSODL Deploys Tech, Manpower for Summer Supply

Berhampur, (ENS): With summer approaching and electricity demand expected to rise significantly, TPSouthern Odisha Distribution Limited (TPSODL) has stepped up its preparedness to ensure reliable power supply across its service areas. The company anticipates peak demand to reach around 855 MW and has rolled out a series of measures covering technology, infrastructure, and customer service to meet this demand efficiently.

At the core of TPSODL’s strategy is a strong, round-the-clock monitoring system. The company operates a Centralized Power System Control Centre (PSCC) in Berhampur, supported by

decentralised Area Power System Control Centres (APSCCs) in Jeypore, Rayagada, and Phulbani. These centres are equipped with advanced SCADA systems that allow engineers to monitor the entire power distribution network in real time, including 33 kV feeders, Primary Substations (PSS), and 11 kV feeders.

This system captures critical operational data such as feeder-wise interruptions, helping teams quickly identify faults and restore supply faster. To further strengthen reliability, TPSODL also has a backup control centre at the TPCODL Technology Centre in Bhubaneswar, which ensures automatic failover and zero downtime during

emergencies.

During the summer months, when electricity usage peaks, continuous monitoring becomes crucial. TPSODL has introduced dedicated dashboards at control centres to track feeder loading in real time. This helps PSCC Engineers take quick decisions and preventive actions to avoid overloading and maintain stable supply. “In case of power disruptions, especially when an 11 kV feeder trips, restoration work begins immediately. Using SCADA technology, control centre teams can remotely initiate trial charging while following strict safety protocols. This significantly reduces outage duration and improves overall service reliability.

TPSO DL Deploys Tech, Manpower for Summer Supply

Source: Odisha24.com

TPSO DL deploys 30 MW summer supply

Advanced control system, electrical safety and monitoring

TPSO DL safety audit's checkered record

30 power lines under maintenance and full service

3325 essential drinking water connections

Bhubaneswar, March 2024: With summer approaching and electricity demand expected to rise significantly, TPOSO (TPSO DL) has deployed a range of measures to ensure reliable power supply across the state. The company anticipates peak demand to rise around 150,000 MW and has initiated a series of measures, including technology, infrastructure, and customer services to meet this increased demand.

All blocks of TPOSO's ongoing investment, aimed at the grid's stability and resilience. The company operates a Centralized Power System Control Centre (PSCC) in Bhubaneswar, supported by decentralized Area Power System Control Centres (APSCCs) in Jajpur, Bhubaneswar, and Phulbani. These centres are equipped with advanced ICSA systems that allow real-time monitoring and control of the power system, including 12 HV feeds, Primary Substation (PS), and 11 KV feeds.

The comprehensive critical operational data such as feeder load, voltage quality, safety faults and system supply flow. To further strengthen reliability, TPOSO also has a dedicated control room at the PSCC, Technology Centre in Bhubaneswar, which monitors and controls the power system's operations.

During the summer months, when there is a high risk of power cuts, TPOSO has initiated a dedicated set of measures to ensure that the power supply is maintained. The PSCC Engineers take quick decisions and preventive actions to avoid overloading and maintain stable supply.

In case of power disruptions, especially when a 11 KV feeder trips, immediate action is taken. Using SCADA technology, control room teams can identify the fault and dispatch the necessary resources promptly. This significantly reduces the time to restore power and improves overall system reliability.

On the infrastructure front, TPOSO has undertaken major upgrades to strengthen the network. The company has added 18,144 MW capacity to its grid, including advanced control systems and automation improvements. Additionally, 94 MW capacity has been added to the distribution network by installing new distribution transformers and upgrading wiring systems.

Network expansion has also been a key focus area. TPOSO has initiated its network by 5,331 circuit kilometers (CKM) of sub-transmission lines, 165,000 KV lines, and 150,000 KV lines (11 KV lines). All these lines have experienced excellent performance of 100% (with 100% uptime) since their commissioning.

To handle high load conditions effectively, TPOSO has implemented a comprehensive set of 11 HV operations and maintenance. This is supported by advanced monitoring and control systems, ensuring that the system can handle peak demand without any significant outages.

The company has also adopted modern technology to improve maintenance. TPOSO is using drone-based services for its 11 KV network. These drones capture high-resolution images, helping to detect even small defects and performing repairs that are not possible during manual inspections. This proactive approach reduces the chances of sudden outages.

In another major step, TPOSO has undertaken 40 high-voltage power transformers and installed 10,000 new Circuit Breakers (CBs). These upgrades are specifically aimed at preventing failure incidents and ensuring that the power supply remains uninterrupted.

On the customer service side, TPOSO has strengthened its outreach and response systems. Customers will receive outage notices in multiple languages through social media and text. Call centre operations have been upgraded and 3000 helpline staff members have been trained to manage high volumes of customer inquiries. Complaint resolution time has been significantly reduced, ensuring quick restoration of power. The company has deployed over 1,500 personnel across its operational areas. TPOSO has also focused on safety by
