PRESS RELEASE

Lok Adalat Across TPSODL Areas on 9th May

- Camps to be conducted across all Division, Sub-Division and Section Offices of TPSODL

Berhampur: TP Southern Odisha Distribution Limited (TPSODL) will organise the 2nd National Lok Adalat and Enforcement Settlement Camp on Saturday, 9th May, across its entire operational region. The initiative aims to offer consumers a simple and accessible platform to settle cases related to unauthorised use of electricity and electricity theft, ensuring timely resolution of pending enforcement matters.

The Lok Adalat and settlement camps will be held simultaneously at TPSODL Divisions, Sub-Divisions, Section Offices, Enforcement offices and designated Court premises covering the districts of Gajapati, Kandhamal, Boudh, Koraput, Rayagada, Malkangiri and Nabarangapur. As part of this initiative, Special Enforcement and Settlement Camps will be organised exclusively across the Ganjam district to enable consumers to resolve pending enforcement matters in a convenient and transparent manner. The camps will be organized from 9:00 AM to 5:00 PM .

This initiative is part of TPSODL's ongoing efforts to strengthen compliance, promote responsible electricity usage, and streamline the settlement of enforcement-related cases. By providing a structured, consumer-friendly mechanism for dispute resolution, the Lok Adalat is expected to help consumers regularise their electricity usage and prevent future complications. Special teams consisting of enforcement officers, legal experts and consumer-support personnel will be deployed at each location to assist with documentation, clarify procedures and facilitate smooth case settlement.

Comprehensive information on the Lok Adalat—including district-wise arrangements, categories of cases eligible for settlement and step-by-step guidance—is available at all TPSODL Division, Sub-Division and Section Offices. Consumers may also reach out to their nearest TPSODL office or Customer Relation Centre for additional support. Also Consumers can also get detailed information through toll-free numbers 1800-2026 or 1912.

TPSODL encourages all consumers with unresolved enforcement matters to take advantage of this opportunity to close their cases in a timely manner. Early settlement will help ensure quality electricity services and contribute to a safer and more compliant power ecosystem across Southern Odisha.

TPSODL remains committed to providing transparent, customer-focused services and fostering a culture of lawful electricity usage through initiatives such as this district-wide Lok Adalat.

BUSINESS DAILY**

Lok Adalat across TPSODL areas on May 9

PBD BUREAU

BERHAMPUR, MAY 7

TP Southern Odisha Distribution Limited (TPSODL) will organise the 2nd National Lok Adalat and Enforcement Settlement Camp on Saturday, May 9 across its entire operational region.

The initiative aims to offer consumers a simple and accessible platform to settle cases related to unauthorised use of electricity and electricity theft, ensuring timely resolution of pending enforcement matters.

The Lok Adalat and settlement camps will be held simultaneously at TPSODL Divisions, Sub-Divisions, Section Offices, Enforcement offices and designated Court premises covering the districts of Gajapati, Kandhamal, Boudh, Koraput, Rayagada, Malkangiri and Nabarangapur.

As part of this initiative, Special Enforcement and Settlement Camps will be organ-

ised exclusively across the Ganjam district to enable consumers to resolve pending enforcement matters in a convenient and transparent manner.

The camps will be organized from 9:00 AM to 5:00 PM.

This initiative is part of TPSODL's ongoing efforts to strengthen compliance, promote responsible electricity usage, and streamline the settlement of enforcement-related cases.

By providing a structured, consumer-friendly mechanism for dispute resolution, the Lok Adalat is expected to help consumers regularise their electricity usage and prevent future complications.

Special teams consisting of enforcement officers, legal experts and consumer-support personnel will be deployed at each location to assist with documentation, clarify procedures and facilitate smooth case settlement.

Comprehensive information on the Lok Adalat—including

district-wise arrangements, categories of cases eligible for settlement and step-by-step guidance—is available at all TPSODL Division, Sub-Division and Section Offices. Consumers may also reach out to their nearest TPSODL office or Customer Relation Centre for additional support.

Consumers can also get detailed information through toll-free numbers 1800-2026 or 1912.

TPSODL encourages all consumers with unresolved enforcement matters to take advantage of this opportunity to close their cases in a timely manner. Early settlement will help ensure quality electricity services and contribute to a safer and more compliant power ecosystem across Southern Odisha.

TPSODL remains committed to providing transparent, customer-focused services and fostering a culture of lawful electricity usage through initiatives such as this district-wide Lok Adalat.

Lok Adalat and Special Camp for TPSODL Consumers on May 9

G o p l a p u r (correspondent TP Southern Odisha Distribution Limited (TPSODL) will organize the second National Lok Adalat and Dispute Resolution Camp on May 9. This camp is being organized to resolve cases related to unauthorized electricity consumption and power theft by consumers. Long pending cases will be resolved simultaneously here. These Lok Adalat and Dispute Resolution Camps will be held simultaneously in Gajapati, Kandhamal, Boudh, Koraput, Rayagada, Malkangiri and Nabarangpur districts as well as in the divisions, sub-divisions,

section offices, Dispute Resolution Offices and designated courthouses of TPSODL. Similarly, consumers can resolve their pending dispute cases conveniently and transparently at the Special Dispute Resolution and Dispute Resolution Camp to be organized on the same day in Ganjam district. These camps will be open from 9 am to 5 pm. Consumers can reach within the stipulated time and get guidance and assistance. Such initiatives of TPSODL will promote responsible electricity consumption and help in streamlining the resolution of implementation-related

cases. Transparency and regularity in electricity consumption can be maintained and a consumer-friendly system can be established. A special team comprising enforcement officers, legal experts and consumer support staff will be present at the Lok Adalat and provide related assistance to the consumers. Detailed information about the Lok Adalat, such as district administration, classification of eligible cases, step-by-step guidance, etc., will be available at the TPSODL office. Consumers can contact the company's Customer Contact Centre (CRC) for

additional convenience. Similarly, consumers can get all the information in this regard through TPSODL's toll-free number 1800-2026 or 1912. TPSODL appeals to all its customers to avail this opportunity. Consumers can get quality electricity services by resolving their cases in Lok Adalat. This will ensure consumer friendly and safe electricity service provision across South Odisha.

The company is committed to promoting a culture of consumer-centric service and legal electricity consumption through this Lok Adalat camp.

AROUND ODISHA

Lok Adalat Across TPSODL Areas on May 9

INDIAN ERA

Berhampur, (ENS): TP Southern Odisha Distribution Limited (TPSODL) will organise the 2nd National Lok Adalat and Enforcement Settlement Camp on Saturday, 9th May, across its entire operational region. The initiative aims to offer consumers a simple and accessible platform to settle cases related to unauthorised use of electricity and electricity theft, ensuring timely resolution of pending enforcement matters.

The Lok Adalat and settlement camps will be held simultaneously at TPSODL Divisions, Sub-Divisions, Section Offices, Enforcement offices and designated Court premises covering the districts of Gajapati, Kandhamal, Boudh, Koraput, Rayagada, Malkangiri and Nabarangapur. As part of this initiative, Special Enforcement and Settlement Camps will be organised exclusively across the Ganjam district

to enable consumers to resolve pending enforcement matters in a convenient and transparent manner. The camps will be organized from 9:00 AM to 5:00 PM. This initiative is part of TPSODL's ongoing efforts to strengthen compliance, promote responsible electricity usage, and streamline the settlement of enforcement-related cases. By providing a structured, consumer-friendly mechanism for dispute resolution, the Lok Adalat is expected to help consumers regularise their electricity usage and prevent future complications. Special teams consisting of enforcement officers, legal experts and consumer-support personnel will be deployed at each location to assist with documentation, clarify procedures and facilitate smooth case settlement.

Comprehensive information on the Lok Adalat—including

district-wise arrangements, categories of cases eligible for settlement and step-by-step guidance—is available at all TPSODL Division, Sub-Division and Section Offices. Consumers may also reach out to their nearest TPSODL office or Customer Relation Centre for additional support. Also Consumers can also get detailed information through toll-free numbers 1800-2026 or 1912.

TPSODL encourages all consumers with unresolved enforcement matters to take advantage of this opportunity to close their cases in a timely manner. Early settlement will help ensure quality electricity services and contribute to a safer and more compliant power ecosystem across Southern Odisha.

TPSODL remains committed to providing transparent, customer-focused services and fostering a culture of lawful electricity usage through initiatives such as this district-wide Lok Adalat.

9 मई को टीपीएस ओडीएल क्षेत्रों में लोक अदालत बिजली मामलों के निपटारे का सुनहरा मौका

भुवनेश्वर। टीपी सदर ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) 9 मई को अपने पूरे कार्यक्षेत्र में दूसरी राष्ट्रीय लोक अदालत और एनफोर्समेंट सेटलमेंट कैंप का आयोजन करने जा रही है। इस पहल का उद्देश्य बिजली चोरी और अनधिकृत उपयोग से जुड़े मामलों का त्वरित और सरल समाधान उपलब्ध कराना है। टीपीएसओडीएल के डिवीजन, सब-डिवीजन, सेक्शन ऑफिस, एनफोर्समेंट कार्यालय और चिन्हित न्यायालय परिसरों में एक साथ ये कैंप आयोजित किए जाएंगे। यह आयोजन गजपति, कंधमाल, बौध, कोरापुट, रायगड़ा, मलकानगिरी और नबरंगपुर जिलों में किया जाएगा। इसके अलावा, गंजम जिले में विशेष रूप से एनफोर्समेंट और सेटलमेंट कैंप लगाए जाएंगे, ताकि उपभोक्ता अपने लंबित मामलों का आसानी से निपटारा कर सकें।

जानकारी और सहायता के लिए व्यवस्था

लोक अदालत से संबंधित सभी जानकारी— जैसे जिलेवार व्यवस्था, पात्र मामलों की श्रेणियाँ और प्रक्रिया, टीपीएसओडीएल के सभी कार्यालयों में उपलब्ध कराई गई है। उपभोक्ता अपने नजदीकी कार्यालय या कस्टमर रिलेशन सेंटर से संपर्क कर सकते हैं। इसके अलावा, टोल-फ्री नंबर 1800-2026 और 1912 पर भी जानकारी प्राप्त की जा सकती है।

कैंप सुबह 9 बजे से शाम 5 बजे तक संचालित होंगे।

इस पहल के तहत उपभोक्ताओं को एक पारदर्शी और सुविधाजनक मंच मिलेगा, जहां वे बिजली से जुड़े विवादों और मामलों का निपटारा कर सकते हैं। इसका उद्देश्य न केवल लंबित मामलों को खत्म करना है, बल्कि उपभोक्ताओं को नियमित और जिम्मेदार बिजली उपयोग के लिए प्रोत्साहित करना भी है। हर केंद्र पर एनफोर्समेंट अधिकारियों, कानूनी विशेषज्ञों और उपभोक्ता सहायता कर्मियों की विशेष टीम तैनात रहेगी। ये

टीम दस्तावेजों की जांच, प्रक्रिया की जानकारी और मामलों के निपटारे में सहयोग करेगी, जिससे पूरी प्रक्रिया सरल और तेज हो सके।

समय पर निपटारा करने की अपील— टीपीएसओडीएल ने सभी उपभोक्ताओं से अपील की है कि वे इस अवसर का लाभ उठाकर अपने लंबित मामलों का समय पर निपटारा करें। इससे न केवल बेहतर बिजली सेवाएं सुनिश्चित होंगी, बल्कि एक सुरक्षित और नियमों के अनुरूप बिजली व्यवस्था को भी बढ़ावा मिलेगा।

By Subrat Sarangi

Berhampur: TP Southern Odisha Distribution Limited (TPSODL) will organise the 2nd National Lok Adalat and Enforcement Settlement Camp on Saturday, 9th May, across its entire operational region. The initiative aims to offer consumers a simple and accessible platform to settle cases related to unauthorised use of electricity and electricity theft, ensuring timely resolution of pending enforcement matters.

The Lok Adalat and settlement camps will be held simultaneously at TPSODL Divisions, Sub-Divisions, Section Offices, Enforcement offices and designated Court premises covering the districts of Gajapati, Kandhamal, Boudh, Koraput, Rayagada, Malkangiri and Nabarangapur. As part of this initiative, Special Enforcement and Settlement Camps will be organised exclusively across the Ganjam district to enable consumers to resolve pending enforcement matters in a convenient and transparent manner. The camps will be organized from 9:00 AM to 5:00 PM.

This initiative is part of TPSODL's ongoing efforts to strengthen compliance, promote responsible electricity usage, and streamline the settlement of enforcement-related cases. By providing a structured, consumer-friendly mechanism for dispute resolution, the Lok Adalat is expected to help consumers regularise their electricity usage and prevent future complications. Special teams consisting of enforcement officers, legal experts and consumer-support personnel will be deployed at each location to assist with documentation, clarify procedures and facilitate smooth case settlement.

Comprehensive information on the Lok Adalat—including district-wise arrangements, categories of cases eligible for settlement and step-by-step guidance—is available at all TPSODL Division, Sub-Division and Section Offices. Consumers may also reach out to their nearest TPSODL office or Customer Relation Centre for additional support. Also Consumers can also get detailed information through toll-free numbers 1800-2026 or 1912.

TPSODL encourages all consumers with unresolved enforcement matters to take advantage of this opportunity to close their cases in a timely manner. Early settlement will help ensure quality electricity services and contribute to a safer and more compliant power ecosystem across Southern Odisha.

TPSODL remains committed to providing transparent, customer-focused services and fostering a culture of lawful electricity usage through initiatives such as this district-wide Lok Adalat.

PRESS RELEASE

From Awareness to Impact: TPSODL Accelerates Rooftop Solar Adoption Across 8 Districts with 8,955 Installations

- **4,850 Consumers Achieve Zero Electricity Bills**
- **Over 6,214 rooftop solar systems installed under PM Surya Ghar Muft Bijli Yojana**
- **2,741 consumers installed 1 kW solar rooftop under ULA model**

Berhampur, May 2026: TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power & Odisha Government, is accelerating the transition to clean and affordable energy across Southern Odisha through large-scale rooftop solar adoption. With focused awareness campaigns, consumer-centric models, and government-backed incentives, TPSODL is enabling households to significantly reduce electricity costs.

The initiative is delivering tangible impact, with thousands of consumers already benefiting from solar energy. Notably, a large number of households are now experiencing zero electricity bills, marking a major milestone in sustainable energy adoption.

TPSODL has successfully installed solar rooftop systems for 2,741 consumers under the Utility Led Aggregation (ULA) model across eight districts of Southern Odisha. With the district-wise distribution including Ganjam (1,565), Gajapati (152), Kandhamal (161), Rayagada (96), Koraput (61), Nabarangpur (260), Malkangiri (239), and Boudh (207).

In parallel, under the PM Surya Ghar Muft Bijli Yojana (PMSGMBY), a total of 6,214 rooftop solar systems have been installed across the region. The installations are spread across Ganjam (3,822), Gajapati (230), Kandhamal (115), Rayagada (695), Malkangiri (142), Nabarangpur (211), Boudh (408), and Koraput (591).

Out of a total of 8,955 solar consumers, 4,850 households enjoyed zero electricity bills in April, a direct outcome of TPSODL's combined efforts and a clear reflection of how solar adoption is steadily reducing energy expenses for families across Southern Odisha.

TPSODL has been actively promoting solar energy through door-to-door awareness campaigns, block-level outreach, and Gram Panchayat meetings, ensuring deeper penetration and informed participation among consumers.

The ULA model offers an affordable pathway, where consumers can install solar systems at a minimal cost of ₹1,875 for 1 kW, supported by DISCOM facilitation. Consumers benefit from approximately 100 units of electricity generation per month, resulting in savings of around ₹5,000 annually, along with 25 years warranty on solar panels and up to 5 years of free maintenance provided by TPSODL.

Additionally, under PMSGMBY, consumers receive significant financial support, with ₹55,000 subsidy for 1 kW systems, ₹1,10,000 for 2 kW, and up to ₹1,38,000 for 3 kW and above, jointly supported by the Central and State Governments.

Commenting on this achievement, Mr. Amit Kumar Garg, CEO of TPSODL, said: "At TPSODL, we are committed to empowering consumers with sustainable, affordable, and reliable energy solutions. The growing number of zero-bill consumers reflects the success of our

solar initiatives and the trust of our consumers. Through continued awareness and support, we aim to make Southern Odisha a model region for clean energy adoption and energy independence."

TPSODL continues to envision a "Mission Solar" for Southern Odisha, focusing on expanding rooftop solar coverage, enhancing consumer awareness, and contributing to India's clean energy goals.

AROUND ODISHA

NAVBHARAT

भुवनेश्वर। दक्षिण ओडिशा में स्वच्छ ऊर्जा की दिशा में बड़ा बदलाव देखने को मिल रहा है। टीपीएसओडीएल लिमिटेड (टीपीएसओडीएल) ने आठ जिलों में 8,955 रूफटॉप सोलर सिस्टम स्थापित कर ऊर्जा क्षेत्र में नई मिसाल पेश की है। इस पहल से हजारों परिवारों को सस्ती और स्थायी बिजली मिल रही है। टीपीएसओडीएल की इस पहल का सबसे बड़ा असर यह है कि अप्रैल महीने में 4,850 उपभोक्ताओं का बिजली बिल पूरी तरह शून्य हो गया। यह दर्शाता है कि सौर ऊर्जा अपनाने से आम उपभोक्ताओं को सीधा आर्थिक लाभ मिल रहा है। प्रधानमंत्री सूर्य घर मुफ्त बिजली योजना के तहत 6,214

सोलर सिस्टम लगाए गए हैं। वहीं, यूटिलिटी लेड एग्रिगेशन (यूएलए) मॉडल के तहत 2,741 उपभोक्ताओं ने 1 किलोवाट सोलर सिस्टम स्थापित किए हैं। गंजाम जिला दोनों योजनाओं में सबसे आगे है। यूएलए मॉडल के तहत उपभोक्ता मात्र 21,875 में 1 किलोवाट सोलर सिस्टम लगावा सकते हैं, जिससे हर महीने करीब 100 यूनिट बिजली बनती है और सालाना लगभग 75,000 की बचत होती है। इसके साथ 25 साल की वारंटी और 5 साल तक मुफ्त मंटेनेंस भी दिया जा रहा है। सरकार की ओर से 1 किलोवाट पर 55,000 तक की सब्सिडी दी जा रही है, जिससे सोलर सिस्टम और किफायती हो गया है। सीईओ अमित कुमार गर्ग ने कहा कि टीपीएसओडीएल में हमारा लक्ष्य उपभोक्ताओं को सस्ती, विश्वसनीय और स्वच्छ ऊर्जा उपलब्ध कराना है। आज हजारों परिवारों का बिजली बिल शून्य होना इस बात का प्रमाण है कि हमारी सौर पहल सही दिशा में आगे बढ़ रही है। हम लगातार जागरूकता और सहयोग के माध्यम से दक्षिण ओडिशा को सोलर ऊर्जा के क्षेत्र में एक मॉडल क्षेत्र बनाने के लिए प्रतिबद्ध हैं।

टीपीएसओडीएल का हरित अभियान शुरू, 120 कर्मियों ने किया पौधरोपण

जागरण संगठनात्मक, भुवनेश्वर : टाटा पावर सदर्न ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने गोपालपुर स्थित जेएन टाटा टेक्निकल इंस्टीट्यूट परिसर में व्यापक पौधरोपण अभियान चलाकर पर्यावरण संरक्षण का संदेश दिया। इस अभियान में 120 से अधिक कर्मचारियों ने भाग लिया और विभिन्न प्रजातियों के पौधे लगाए। कंपनी के वरिष्ठ अधिकारियों ने स्वयं पौधरोपण कर कर्मचारियों को हरित भविष्य के निर्माण के लिए प्रेरित किया। इस अवसर पर टाटा सस्टेनेबिलिटी मंथ-2026 का भी शुभारंभ किया गया। इस वर्ष इसकी थीम 'थिंकिंग इज गुड, डूइंग इज बेटर' रखी गई है। इसका उद्देश्य कर्मचारियों को केवल विचारों तक सीमित न रहकर पर्यावरण संरक्षण के लिए व्यावहारिक और प्रभावी कदम उठाने के लिए प्रेरित करना है। कंपनी अधिकारियों ने बताया कि वित्तीय पर्यावरण दिवस पर्यावरण संरक्षण के प्रति जागरूकता बढ़ाने का महत्वपूर्ण अवसर है। इस वर्ष की थीम 'इंस्याइड बाय नेचर, फॉर क्लाइमेट, फॉर आवर फ्यूचर'

जेएन टाटा टेक्निकल इंस्टीट्यूट परिसर में व्यापक पौधरोपण अभियान © जागरण

जलवायु परिवर्तन की चुनौतियों से निपटने के लिए सामूहिक प्रयासों की आवश्यकता पर बल देती है। टीपीएसओडीएल की यह पहल इसी दिशा में एक महत्वपूर्ण कदम मानी जा रही है। टाटा सस्टेनेबिलिटी मंथ के तहत आने वाले दिनों में प्लास्टिक उपयोग के प्रति जागरूकता अभियान, समुद्र तट सफाई अभियान (बीच क्लीनिंग ड्राइव) और अन्य पर्यावरणीय गतिविधियों का आयोजन किया जाएगा। इन कार्यक्रमों के माध्यम से कर्मचारियों के साथ-साथ स्थानीय समुदायों में भी टिकाऊ जीवनशैली अपनाने के प्रति जागरूकता बढ़ाने का प्रयास किया जाएगा। कंपनी

का पौधरोपण अभियान केवल गोपालपुर तक सीमित नहीं रहा। टीपीएसओडीएल के विभिन्न कार्यालयों और परियोजना क्षेत्रों में भी कर्मचारियों ने उत्साहपूर्वक पौधे लगाए। कंपनी का मानना है कि पर्यावरण संरक्षण को जनआंदोलन का स्वरूप देने के लिए कर्मचारियों और समाज की सक्रिय भागीदारी आवश्यक है। टीपीएसओडीएल ने कहा कि भविष्य में भी पर्यावरण संरक्षण और सतत विकास को बढ़ावा देने के लिए इस प्रकार की पहल जारी रखी जाएगी, ताकि आने वाली पीढ़ियों के लिए स्वच्छ और सुरक्षित पर्यावरण सुनिश्चित किया जा सके।

From Awareness To Impact: TPSODL Accelerates Rooftop Solar Adoption Across 8 Districts With 8,955 Installations

4,850 Consumers Achieve Zero Electricity Bills
 Over 6,234 rooftop solar systems installed under PM Surya Ghar Muft Bijli Yojana
 2,741 consumers installed 1 kW solar rooftop under UJA model

Bhubaneswar, May 2024: TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power & Odisha Government, is accelerating the transition to clean and affordable energy across Southern Odisha through large-scale rooftop solar adoption. With focused awareness campaigns, consumer-centric models, and government-backed incentives, TPSODL is enabling households to significantly reduce electricity costs.

The initiative is delivering tangible impact, with thousands of consumers already benefiting from solar energy. Notably, a large number of households are now experiencing zero electricity bills, marking a major milestone in sustainable energy adoption.

TPSODL has successfully installed solar rooftop systems for 2,741 consumers under the UJA (Uplifted Aggregation) model across eight districts of Southern Odisha, with the district-wise distribution including Ganjam (1,545), Gopabandhu (152), Kandhamal (141), Rayagada (95), Koraput (84), Nabarangpur (200), Malkangiri (226), and Boudh (207).

In parallel, under the PM Surya Ghar Muft Bijli Yojana (PM-Surya Ghar), a total of 6,234 rooftop solar systems have been installed across the region. The installations are spread across Ganjam (3,822), Gopabandhu (238), Kandhamal (113), Rayagada (95), Malkangiri (142), Nabarangpur (211), Boudh (108), and Koraput (57).

Out of a total of 8,955 solar consumers, 4,850 households enjoyed zero electricity bills in April, a direct outcome of TPSODL's combined efforts and a clear reflection of how solar adoption is directly reducing energy expenses for families across Southern Odisha.

TPSODL has been actively promoting solar energy through door-to-door awareness campaigns, block-level outreach, and Gram Panchayat meetings, ensuring deeper penetration and informed participation among consumers.

The UJA model offers an affordable pathway, where consumers can install solar systems at a minimal cost of ₹1.875 for 1 kW, supported by DISCOM facilitation. Consumers benefit from approximately 100 units of electricity generation per month, resulting in savings of around ₹1,500 annually, along with 25 years warranty on solar panels and up to 5 years of free maintenance provided by TPSODL.

Additionally, under PM-Surya Ghar, consumers receive significant financial support, with ₹15,000 subsidy for 1 kW systems, ₹1,20,000 for 2 kW, and up to ₹1,38,000 for 3 kW and above, jointly supported by the Central and State Governments.

Considering this achievement, Mr. Anil Kumar Garg, CEO of TPSODL, said, "At TPSODL, we are committed to empowering consumers with sustainable, affordable, and reliable energy solutions. The growing number of zero-bill consumers reflects the success of our solar initiatives and the trust of our consumers. Through continued awareness and support, we aim to make Southern Odisha a model region for clean energy adoption and energy independence."

TPSODL continues to envision a "Mission Solar" for Southern Odisha, focusing on expanding rooftop solar coverage, enhancing consumer awareness, and contributing to India's clean energy goals.

PRESS RELEASE

Seeds of Empowerment: Tribal Women Champion Sustainable Millet Farming

- * Women Farmers Earn 89 lakhs through Millet-Based Livelihood
- * Organic farming revives rural economies and traditions
- * TPSODL supports women's income, entrepreneurship, and self-reliance

Berhampur, 2026: Across India's rural landscapes, millet has long been a symbol of sustenance, heritage, and resilience. For many tribal and farming communities, it is not merely a crop; it is a way of life. Recognizing the potential of this deep-rooted tradition, TP Southern Odisha Distribution Limited (TPSODL) launched an initiative that today stands as a model for women-led rural transformation across the country.

In the Boipariguda block of Koraput, women from 13 villages;

Dadiapadar, Ghumarbeda, Banaguda, Uduluguda, Kangarpar, Ranganiguda, Minarbali, Sapguda, Kenduguda, Gatanguda, Guma, Bhejaguda, and Majhiguda came together to revive millet cultivation with new strength and opportunity. Among them is Nilabati Paraja from Dadiapadar village, who says, "We have grown millet all our lives, but never imagined it could secure our financial future. With organic methods, training, and market support, our traditional crop has changed our lives."

With the support of TPSODL and its grassroots partner Pragati, around 500 women farmers cultivated nearly 250 acres of millet using organic and improved practices. They received ragi seeds, natural fertilizers, cycle weeders, and training to prepare compost using locally available resources.

The results have been extraordinary. Yields, which earlier averaged 4 quintals per acre, have risen to more than 9 quintals, leading to a total harvest of 3,067 quintals. The shift from subsistence to income generation has empowered the women to think and act like Agri-entrepreneurs.

Out of these farmers, 131 women sold their produce at government mandis through the Minimum Support Price system, earning a combined income of over ₹89 lakh. With no intermediaries involved, the financial gains directly reached the farmers, a significant achievement that reflects the aspirations of rural women in states across India.

To ensure sustainable growth and market strength, 252 women have also become shareholders in Jaivik Sri Farmers Producer Company Ltd. This collective has enabled them to access markets, negotiate prices, and make decisions as equal stakeholders. A millet processing unit has further been set up in the region, equipped for cleaning, dehusking, and grinding—allowing the women to produce value-added products like millet flour and packaged grains.

"Our role goes beyond power supply. " We aim to empower communities," said Mr. Amit Kumar Garg, CEO of TPSODL. "When women farmers are supported with the right tools and

opportunities, the impact is transformative, not just for families, but for rural economies across Southern Odisha.”

This initiative beautifully reflects national priorities such as women-led development, farmer collectivization, sustainable agriculture, and the promotion of “Shree Anna”- India’s celebrated millet heritage. It demonstrates how local traditions, when supported with knowledge and resources, can create scalable, future-ready livelihoods.

From the villages of Doraguda Panchayat to the wider rural landscape of India, this story carries a powerful message: when women lead, communities thrive, and the nation grows stronger. TPSODL continues to illuminate lives, not only with power, but with purpose, dignity, and opportunity.

TPSODL revives millet farming in Odisha, empowering tribal women farmers in Koraput

Bhubaneswar, May 14 (UNI) TP Southern Odisha Distribution Limited (TPSODL) has launched a transformative initiative to revive millet cultivation among tribal and farming communities in Odisha, where millet is not just a crop but a deeply rooted way of life.

Recognising the cultural and economic significance of millet, women from 13 villages in Boipariguda block of Koraput district have united to strengthen traditional millet farming through organic and improved agricultural practices.

Among them is Nilabati Paraja from Dadiapadar village, who said millet had always been part of their lives, but they had never imagined it could also secure their financial future.

PBD BUREAU

BERHAMPUR, MAY 14

ACROSS India's rural landscapes, millet has long been a symbol of sustenance, heritage, and resilience. For many tribal and farming communities, it is not merely a crop; it is a way of life.

Recognizing the potential of this deep-rooted tradition, TP Southern Odisha Distribution Limited (TPSODL) launched an initiative that today stands as a model for women-led rural transformation across the country.

In the Boipariguda block of Koraput, women from 13 villages— Dadiapadar, Ghumarbeda, Banaguda, Uduluguda, Kangarpar, Ranganiguda, Minarballi, Sappguda, Kenduguda, Gatanguda, Guma, Bhejaguda, and Majhiguda— came together to revive millet cultivation with new strength and opportunity. Among them is Nilabati Paraja from Dadiapadar village, who says, "We have grown millet all our lives, but never imagined it could secure our financial future. With

organic methods, training, and market support, our traditional crop has changed our lives."

With the support of TPSODL and its grassroots partner Pragati, around 500 women farmers cultivated nearly 250 acres of millet using organic and improved practices. They received ragi seeds, natural fertilizers, cycle weeders, and training to prepare compost using locally available resources.

The results have been extraordinary. Yields, which earlier averaged 4 quintals per acre, have risen to more than 9 quintals, leading to a total harvest of 3,067 quintals. The shift from subsistence to income generation has empowered the women to think

and act like Agri-entrepreneurs.

Out of these farmers, 131 women sold their produce at government mandis through the Minimum Support Price system, earning a combined income of over 789 lakh. With no intermediaries involved, the financial gains directly reached the farmers, a significant achievement that reflects the aspirations of rural women in states across India.

To ensure sustainable growth and market strength, 252 women have also become shareholders in Jaivik Sri Farmers Producer Company Ltd. This collective has enabled them to access markets, negotiate prices, and make decisions as equal stakeholders. A millet processing unit has further been set up in the region, equipped for cleaning, dehusking, and grinding—allowing the women to produce value-added products like millet flour and

packaged grains.

"Our role goes beyond power supply. We aim to empower communities," said Amit Kumar Garg, CEO of TPSODL.

"When women farmers are supported with the right tools and opportunities, the impact is transformative, not just for families, but for rural economies across Southern Odisha," he said.

This initiative beautifully reflects national priorities such as women-led development, farmer collectivization, sustainable agriculture, and the promotion of "Shree Anna"— India's celebrated millet heritage. It demonstrates how local traditions, when supported with knowledge and resources, can create scalable, future-ready livelihoods.

From the villages of Doraguda Panchayat to the wider rural landscape of India, this story carries a powerful message: when women lead, communities thrive, and the nation grows stronger.

TPSODL continues to illuminate lives, not only with power, but with purpose, dignity, and opportunity.

packaged grains. "Our role goes beyond power supply. We aim to empower communities," said Mr. Amit Kumar Garg, CEO of TPSODL. "When women farmers are supported with the right tools and opportunities, the impact is transformative, not just for families, but for rural economies across Southern Odisha." This initiative beautifully reflects national priorities such as women-led development, farmer collectivization, sustainable agriculture, and the promotion of "Shree Anna"—India's celebrated millet heritage. It demonstrates how local traditions, when supported with knowledge and resources, can create scalable, future-ready livelihoods. From the villages of Doraguda Panchayat to the wider rural landscape of India, this story carries a powerful message: when women lead, communities thrive, and the nation grows stronger. TPSODL continues to illuminate lives, not only with power, but with purpose, dignity, and opportunity.

Women Farmers Earn 89 Lakhs through Millet-Based Livelihood

- Organic farming revives rural economies and traditions
- TPSO DL supports women's income, entrepreneurship, and self-reliance

Berhampur: Across India's rural landscapes, millet has long been a symbol of sustenance, heritage, and resilience. For many tribal and farming communities, it is not merely a crop; it is a way of life. Recognizing the potential of this deep-rooted tradition, TP Southern Odisha Distribution Limited (TPSO DL) launched an initiative that today stands as a model for women-led rural transformation across the country.

In the Boipariguda block of Koraput, women from 13 villages: Dadlapadar, Ghumarbeda, Banaguda, Uolubaguda, Kangarpar, Rangariguda, Minarballi, Sarguda, Keniluguda, Gatarguda, Guma, Bhejaguda, and Majliguda came together to revive millet cultivation with new strength and opportunity.

Dadlapadar, Ghumarbeda, Banaguda, Uolubaguda, Kangarpar, Rangariguda, Minarballi, Sarguda, Keniluguda, Gatarguda, Guma, Bhejaguda, and Majliguda came together to revive millet cultivation with new strength and opportunity. Among them is Nilabati Paraja from Dadlapadar village, who says, "We have grown millet all our lives, but never imagined it could secure our financial future. With organic methods, training, and market support, our traditional crop has changed our lives."

With the support of TPSO DL and its grassroots partner Pragati, around 500 women farmers cultivated nearly 250 acres of millet using organic and improved practices. They received rag seeds, natural fertilizers, cycle weeders, and training to prepare compost using locally available resources.

The results have been extraordinary. Yields, which earlier averaged 4 quintals per acre, have risen to more than 9 quintals, leading to a total harvest of 3,067 quintals. The shift from subsistence to income generation has empowered the women to think and act like Agri-entrepreneurs.

Out of these farmers, 131 women sold their produce at government mandis through the Minimum Support Price system, earning a combined income of over ₹89 lakh. With no intermediaries involved, the financial gains directly reached the farmers, a significant achievement that reflects the aspirations of rural women in states across India.

To ensure sustainable growth and market strength, 252 women have also become shareholders in Jai Shri Farmers Producer Company Ltd. This collective has enabled them to access markets, negotiate prices, and make decisions as equal stakeholders. A millet processing unit has further been set up in the region, equipped for cleaning, dehusking, and grinding—allowing the women to produce value-added products like millet flour and packaged grains.

"Our life goes beyond power supply. It's all to empower communities," said Mr. Anil Kumar Singh, CEO of TPSO DL. "When women farmers are empowered with the right tools and opportunities, the impact is transformative, not just for families, but for rural economies across Southern Odisha."

This initiative beautifully reflects national priorities such as women-led development, farmer self-reliance, sustainable agriculture, and the promotion of "stress-free" India celebrated millet heritage. It demonstrates how local traditions, when supported with knowledge and resources, can create sustainable, future-ready livelihoods.

From the villages of Southern Odisha to the wider rural landscape of India, this story carries a powerful message: when women lead, communities thrive, and the nation grows stronger. TPSO DL continues to illuminate lives, not only with power, but with purpose, dignity, and opportunity.

Tribal women in Odisha's Koraput district lead millet revolution

The women were provided with ragi seeds, natural fertilisers, cycle weeders and training in compost preparation using locally available resources. (Image: DC)

Berhampur: In the tribal heartland of Odisha's Koraput district, a quiet agricultural transformation is empowering hundreds of women and reviving the region's traditional millet economy. Nearly 500 tribal women farmers have emerged as successful agri-entrepreneurs through sustainable millet cultivation, earning more than Rs 89 lakh collectively.

The initiative supported by TP Southern Odisha Distribution Limited (TPSODL), a major power distribution firm, is being implemented in collaboration with grassroots organisation Pragati, covering 13 villages under Beisaniyada block. The villages, among others, include Dadlapadar, Chumarbeda, Banaguda, Uduluguda and Kenduguda. Women farmers cultivated millet organically across nearly 250 acres using improved farming techniques and traditional knowledge.

Among them is Nilabati Paraja of Dadlapadar village, who said the programme transformed millet from a subsistence crop into a reliable source of income. "We have cultivated millet for generations, but never imagined it could secure our financial future. With training, organic farming methods and market support, our lives have changed," she said.

The women were provided with ragi seeds, natural fertilisers, cycle weeders and training in compost preparation using locally available resources. The results have been remarkable. Average productivity increased from nearly four quintals per acre to over nine quintals, resulting in a total harvest of 3,067 quintals.

Out of the participating farmers, 131 women sold their produce directly at government mandis under the Minimum Support Price (MSP) system, eliminating middlemen and ensuring higher returns. The initiative has significantly enhanced household incomes while encouraging financial independence among tribal women.

Women farmers earn ₹89 lakh through millet-based livelihoods

Organic farming revives rural economies and traditions

TPSODL supports women's income, entrepreneurship, and self-reliance

Berhampur, 2025: Across India's rural landscapes, millet has long symbolized sustenance, heritage, and resilience. For many tribal and farming communities, it is not merely a crop but a way of life. Recognizing the potential of this deep-rooted tradition, TP Southern Odisha Distribution Limited (TPSODL) launched an initiative that today stands as a model for women-led rural transformation across the country.

In the Boipariguda block of Koraput district, women from 13 villages — Dadiapadar, Ghumarbeda, Banaguda, Uduluguda, Kangarpar, Ranganiguda, Minarballi, Sappuda, Kenduguda, Gatanguda, Guma, Bhejaguda, and Majhiguda — came together to revive millet cultivation with renewed strength and opportunity.

Among them is Nilabati Paraja from Dadiapadar village, who says, "We have grown millet all our lives, but never imagined it could secure our financial future. With organic methods, training, and market support, our traditional crop has transformed our lives."

With the support of TPSODL and its grassroots partner Pragati, nearly 500 women farmers cultivated millet across around 250 acres using organic and improved agricultural practices. The women received ragi seeds, natural fertilizers, cycle weeders, and training on preparing compost using locally available resources.

The results have been remarkable. Yields, which earlier averaged around four quintals per acre, have increased to more than nine quintals per acre, resulting in a total harvest of 3,067 quintals. This transition from subsistence farming to income generation has empowered the women to think and act as agri-entrepreneurs.

Out of these farmers, 131 women sold their produce at government mandis under the Minimum Support Price (MSP) system, earning a combined income of over ₹89 lakh. With no intermediaries involved, the financial benefits directly reached the farmers — a significant achievement that reflects the growing aspirations and economic empowerment of rural women.

To ensure sustainable growth and stronger market access, 252 women have also become shareholders in Jaivik Sri Farmers Producer Company Ltd. This

collective platform has enabled them to access markets, negotiate better prices, and participate in decision-making as equal stakeholders.

A millet processing unit has also been established in the region, equipped with facilities for cleaning, dehusking, and grinding. This has enabled the women to produce value-added products such as millet flour and packaged grains, further enhancing their income opportunities.

"Our role goes beyond power supply. We aim to empower communities," said Mr. Amit Kumar Garg, CEO of TPSODL. "When women farmers are supported with the right tools and opportunities, the impact is transformative — not just for families, but for the rural economy of Southern Odisha as a whole."

This initiative strongly reflects national priorities such as women-led development, farmer collectivization, sustainable agriculture, and the promotion of "Shree Anna" — India's celebrated millet heritage. It demonstrates how traditional knowledge, when supported with modern resources and institutional backing, can create scalable and future-ready livelihoods.

From the villages of Doraguda Panchayat to the broader rural landscape of India, this story carries a powerful message: when women lead, communities prosper and the nation grows stronger. TPSODL continues to illuminate lives not only through power supply, but also through purpose, dignity, and opportunity.

Seeds of empowerment: tribal women champion sustainable millet farming

Berhampur(11/06/2028): Across India's rural landscapes, millet has long been a symbol of endurance, heritage, and resilience.

For many tribal and farming communities, it is not merely a crop; it is a way of life.

Recognizing the potential of this deep-rooted tradition, TP Southern Odisha Distribution Limited (TPSODL) launched an initiative that today stands as a model for women-led rural transformation across the country.

In the Baipariguda block of Koraput, women from 13 villages, Dadiapadar, Ghumarbada, Baroguda, Uduluguda, Kangarpar, Ranganiguda, Minarballi, Sappguda, Yenauguda, Gatanguda, Suma, Bhejaguda, and Majhiguda came together to revive millet cultivation with new strength and opportunity.

Among them is Nilabati Paraja from Dadiapadar village, who says, "We have grown millet all our lives, but never imagined it could secure our financial future."

With organic methods, training, and market support, our traditional crop has changed our lives." With the support of TPSODL and its grassroots partner Pragati, around 500 women farmers cultivated nearly 250 acres of millet using organic and improved practices.

They received ragi seeds, natural fertilizers, cycle weeders, and training to prepare compost using locally available resources.

The results have been extraordinary.

Yields, which earlier averaged 4 quintals per acre, have risen to more than 5 quintals, leading to a total harvest of 3,067 quintals.

The shift from subsistence to income generation has empowered the women to think and act like Agri-entrepreneurs. Out of these farmers, 131 women sold their produce at government mandis through the Minimum Support Price system, earning a combined income of over Rs 89 lakh.

With no intermediaries involved, the financial gains achievement that reflects the aspirations of rural women.

To ensure sustainable growth and market strength, Jaivik Sri Farmers Producer Company Ltd.

This collective has enabled them to access markets stakeholders.

A millet processing unit has further been set up in D grinding—allowing the women to produce value-added

"Our role goes beyond power supply.

"We aim to empower communities," said Amit Kumar.

"When women farmers are supported with the right knowledge, opportunities, and resources, the impact is transformative, not just for families, but for rural economies across Southern Odisha." This initiative beautifully reflects national priorities such as women-led development, farmer collectivization, sustainable agriculture, and the promotion of "Shree Anna"- India's celebrated millet heritage.

It demonstrates how local traditions, when supported with knowledge and resources, can create scalable, future-ready livelihoods.

From the villages of Doraguda Panchayat to the wider rural landscape of India, this story carries a powerful message: when women lead, communities thrive, and the nation grows stronger.

TPSODL continues to illuminate lives, not only with power, but with purpose, dignity, and opportunity.

PRESS RELEASE

Solar Month Drive Sparks Green Energy Push in South Odisha

- **12,658 New Solar Applications Received During “Month of Solar” Campaign**
- **ULA Model Offers 1 kW Rooftop Solar at Just ₹1,875, Making Solar More Affordable**
- **Over 11,000 Consumers Installed Rooftop Solar Systems Across 8 Districts**
- **Organised Stakeholder and Vendors meet Focused on Simplifying Installation Process & Promoting Green Energy Adoption**

Berhampur, May 2026: As part of the Ministry of New and Renewable Energy’s “Month of Solar” initiative, TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, has intensified efforts to promote rooftop solar adoption across the eight Southern Districts of Odisha - Ganjam, Gajapati, Kandhamal, Boudh, Rayagada, Koraput, Nabarangpur and Malkangiri. To strengthen implementation and improve consumer service delivery, TPSODL organized a stakeholder and vendor meet involving solar vendors, senior officials, and REC representatives, focusing on simplifying installation processes and accelerating clean energy adoption.

Aligned with this initiative, TPSODL organized a stakeholder and vendor meeting to streamline the process of rooftop solar installation and accelerate consumer service delivery. The meeting brought together more than 30 solar vendors, senior TPSODL officials, and representatives from the Rural Electrification Corporation (REC).

The discussion focused on enhancing coordination among stakeholders, streamlining the rooftop solar installation process, and encouraging greater consumer adoption of clean and green energy solutions under the PM Surya Ghar Muft Bijli Yojana (PMSGMBY) and the ULA Model. Consumers embracing solar energy are also experiencing reduced electricity bills, making rooftop solar an affordable and environmentally friendly choice for households.

The ULA Model is emerging as a highly affordable solution for consumers, offering 1 kW rooftop solar systems at just ₹1,875, which is enabling more households to adopt clean energy with minimal upfront cost.

As part of its ongoing “Month of Solar” campaign, TPSODL has recorded an encouraging response from consumers across the region. During May alone, the company received a total of 12,658 applications for rooftop solar installations.

Of these, 1,253 applications were submitted under the PM Surya Ghar Muft Bijli Yojana (PMSGMBY), while 11,405 applications were received under the ULA Model. Among the ULA applications, Phulbani emerged as the top-performing district with 4,771 applications, followed by Nabarangpur with 2,989 applications.

This strong participation highlights the growing consumer interest in adopting sustainable energy solutions and reinforces TPSODL's commitment to promoting clean, affordable, and reliable power for households in Southern Odisha.

Overall, across Southern Odisha, around 50,000 applications have been received so far under PM Surya Ghar Muft Bijli Yojana. Among them, 11,000 consumers have already installed rooftop solar systems in their homes, contributing significantly towards clean energy generation and sustainable power usage.

Notably, out of the 11,000 consumers who installed rooftop solar systems, 6,391 consumers have already received both Central Financial Assistance (CFA) and State Financial Assistance (SFA), further encouraging large-scale adoption of solar energy in the region.

Speaking on the initiative, Mr. Amit Kumar Garg, CEO, TPSODL, said, "The 'Month of Solar' is an important opportunity to create awareness and encourage consumers to adopt sustainable energy solutions. TPSODL is committed to supporting every consumer in their solar journey by simplifying processes, strengthening vendor coordination, and ensuring timely assistance. Rooftop solar is not only helping consumers reduce electricity bills but also contributing towards a greener and energy-secure future for southern Odisha."

TPSODL continues to undertake various awareness and outreach activities across its operational areas to promote renewable energy adoption and support the Government of India's vision for sustainable and clean energy development.

As part of the Ministry of New and Renewable Energy's "Month of Solar" initiative, TP Southern Odisha Distribution Limited (TPSODL), a joint venture of Tata Power and the Government of Odisha, has intensified efforts to promote rooftop solar adoption across the eight Southern Districts of Odisha – Ganjam, Gajapati, Kandhamal, Boudh, Rayagada, Koraput, Nabarangpur and Malkangiri.

To strengthen implementation and improve consumer service delivery, TPSODL organized a stakeholder and vendor meet involving solar vendors, senior officials, and REC representatives, focusing on simplifying installation processes and accelerating clean energy adoption.

Aligned with this initiative, TPSODL organized a stakeholder and vendor meeting to streamline the process of rooftop solar installation and accelerate consumer service delivery. The meeting brought together more than 30 solar vendors, senior TPSODL officials, and representatives from the Rural Electrification Corporation (REC).

The discussion focused on enhancing coordination among stakeholders, streamlining the rooftop solar installation process, and encouraging greater consumer adoption of clean and green energy solutions under the PM Surya Ghar Muft Bijli Yojana (PM-SGBY) and the ULA Model. Consumers embracing solar energy are also experiencing reduced electricity bills, making rooftop solar an affordable and environmentally friendly choice for households.

The ULA Model is emerging as a highly affordable solution for consumers, offering 1 kW rooftop solar systems at just ₹1,875, which is enabling more households to adopt clean energy with minimal upfront cost.

As part of its ongoing "Month of Solar" campaign, TPSODL has recorded an encouraging response from consumers across the region. During May alone, the company received a total of 12,658 applications for rooftop solar installations.

Of these, 1,253 applications were submitted under the PM Surya Ghar Muft Bijli Yojana (PM-SGBY), while 11,405 applications were received under the ULA Model. Among the ULA applications, Phulani emerged as the top-performing district with 4,771 applications, followed by Nabarangpur with 2,989 applications.

This strong participation highlights the growing consumer interest in adopting sustainable energy solutions and reinforces TPSODL's commitment to promoting clean, affordable, and reliable power for households in Southern Odisha.

Overall, across Southern Odisha, around 50,000 applications have been received so far under PM Surya Ghar Muft Bijli Yojana. Among them, 11,000 consumers have already installed rooftop solar systems in their homes, contributing significantly towards clean energy generation and sustainable power usage.

Notably, out of the 11,000 consumers who installed rooftop solar systems, 6,391 consumers have already received both Central Financial Assistance (CFA) and State Financial Assistance (SFA), further encouraging large-scale adoption of solar energy in the region.

Speaking on the initiative, Mr. Amit Kumar Garg, CEO, TPSODL, said, "The 'Month of Solar' is an important opportunity to create awareness and encourage consumers to adopt sustainable energy solutions. TPSODL is committed to supporting every consumer in their solar journey by simplifying processes, strengthening vendor coordination, and ensuring timely assistance. Rooftop solar is not only helping consumers reduce electricity bills but also contributing towards a greener and energy-secure future for southern Odisha."

TPSODL continues to undertake various awareness and outreach activities across its operational areas to promote renewable energy adoption and support the Government of India's vision for sustainable and clean energy development.

PRESS RELEASE

TPSODL inaugurates New Primary Substation in Nabarangapur

- Over 7,000 Consumers to Get Reliable Power Supply

- New PSS inaugurated in Chacha, Jharigaon Block

Berhampur, May: Addressing the long-standing demand, TP Southern Odisha Distribution Limited (TPSODL) has commissioned a new Primary Substation (PSS) at Chacha Panchayat under Jharigaon Block of Nabarangpur district. The project has been undertaken to strengthen the power distribution infrastructure in the region.

The newly constructed 33/11kV substation is equipped with two 5 MVA transformers. It was inaugurated by Shri Balabhadra Majhi, Honbl'e Member of Parliament from Nabarangpur, in the presence of senior officials, public representatives, and local residents.

The commissioning of the Chacha PSS will significantly improve the electricity distribution scenario across Jharigaon Block. More than 7,000 consumers, including domestic users, commercial establishments, and the farming community, will benefit from the project. Several Panchayats and nearby villages, including Chacha, Phupugaon, Palia, Chikili, Badatemara, Sanatemara, Thatabeda, Kangara, and Chakalapadara, will now receive more reliable and quality power supply with improved voltage stability and reduced interruptions.

Earlier, electricity supply to these areas was being maintained through long 11 KV lines extending from the Jharigaon Primary Substation. The feeder lengths covered nearly 250 kilometres under a single distribution network. Due to the long line length, consumers frequently experienced low-voltage issues and delays in restoration during faults and weather disturbances.

With the commissioning of the new Chacha PSS, the existing network has now been divided into four dedicated 11 KV feeders — Ichhapur, Palia, Badatemara, and Chacha. This will enable improved load management, a better voltage profile, reliable supply, and faster restoration of power during disruptions, particularly during Kalbaisakhi storms and adverse weather conditions.

The new 33 KV line supplying power to the Chacha PSS has been extended from the Jharigaon Primary Substation. This has created a stronger and more efficient network for rural consumers. The infrastructure upgrade is expected to support the growing needs of the region as Nabarangpur steadily emerges as an important agricultural belt and developing business corridor in Southern Odisha.

Improved electricity infrastructure will play a crucial role in enhancing irrigation, supporting small businesses, boosting local economic activities, and enhancing the quality of life for residents in the area.

Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said, "The commissioning of the Chacha Primary Substation marks an important step in strengthening the rural power infrastructure of Nabarangpur district. By reducing feeder lengths and creating dedicated distribution lines, we are ensuring better voltage quality, reliable power supply, and faster

restoration services for consumers. TPSODL remains committed to delivering dependable and quality electricity to every consumer while supporting the region's agricultural and economic growth."

TPSODL continues to invest in modernizing the power distribution network across Southern Odisha with a focus on reliability, consumer service, and infrastructure development in rural and semi-urban areas.

TPSODL inaugurates new primary substation in Nabarangpur

PBD BUREAU

BERHAMPUR, MAY 23

ADDRESSING the long-standing demand, TP Southern Odisha Distribution Limited (TPSODL) has commissioned a new Primary Substation (PSS) at Chacha Panchayat under Jharigaon Block of Nabarangpur district.

The project has been undertaken to strengthen the power distribution infrastructure in the region.

The newly constructed 33/11kV substation is equipped with two 5 MVA transformers. It was inaugurated by MP Balabhadra Majhi in the presence of senior officials, public representatives, and local residents.

The commissioning of the Chacha PSS will significantly improve the electricity distribution scenario across Jharigaon Block. More than 7,000 consumers, including domestic users, commercial establishments, and the farming community, will benefit from the project.

Several Panchayats and nearby

With the commissioning of the new Chacha PSS, the existing network has now been divided into four dedicated 11 KV feeders — Ichhapur, Palia, Badatemara, and Chacha. This will enable improved load management, a better voltage profile, reliable supply, and faster restoration of power during disruptions, particularly during Kalbaisakhi storms and adverse weather conditions.

The new 33 KV line supplying power to the Chacha PSS has been extended from the Jharigaon Primary Substation. This has created a stronger and more efficient network for rural consumers. The infrastructure upgrade is expected to support the growing needs of the region as Nabarangpur steadily emerges as an important agricultural belt and developing business corridor in Southern Odisha. Improved electricity infra-

structure will play a crucial role in enhancing irrigation, supporting small businesses, boosting local economic activities, and enhancing the quality of life for residents in the area.

Speaking on the occasion, Amit Kumar Garg CEO TPSODL said, "The commissioning of the Chacha Primary Substation marks an important step in strengthening the rural power infrastructure of Nabarangpur district. By reducing feeder lengths and creating dedicated distribution lines, we are ensuring better voltage quality, reliable power supply, and faster restoration services for consumers. TPSODL remains committed to delivering dependable and quality electricity to every consumer while supporting the region's agricultural and economic growth."

TPSODL continues to invest in modernizing the power distribution network across Southern Odisha with a focus on reliability, consumer service, and infrastructure development in rural and semi-urban areas.

- [Over 7,000 Consumers to Get Reliable Power Supply](#)
- [New PSS Inaugurated in Chacha, Jharigaon Block](#)

Berhampur, Odisha (23/05/2024): Addressing the long-standing demand, TP Southern Odisha Distribution Limited (TPSODL) has commissioned a new Primary Substation (PSS) at Chacha Panchayat under Jharigaon Block of Nabarangpur district. The project has been undertaken to strengthen the power distribution infrastructure in the region.

The newly constructed 33/11kV substation is equipped with two 5 MVA transformers. It was inaugurated by Shri Balabhadra Majhi, Honble Member of Parliament from Nabarangpur, in the presence of senior officials, public representatives, and local residents.

The commissioning of the Chacha PSS will significantly improve the electricity distribution scenario across Jharigaon Block. More than 7,000 consumers, including domestic users, commercial establishments, and the farming community, will benefit from the project. Several Panchayats and nearby villages, including Chacha, Phupugaon, Palia, Chikili, Badatemara, Sanatemara, Thatabeda, Kangara, and Chakalapadara, will now receive more reliable and quality power supply with improved voltage stability and reduced interruptions.

Earlier, electricity supply to these areas was being maintained through long 11 KV lines extending from the Jharigaon Primary Substation. The feeder lengths covered nearly 250 kilometres under a single distribution network. Due to the long line length, consumers frequently experienced low-voltage issues and delays in restoration during faults and weather disturbances.

With the commissioning of the new Chacha PSS, the existing network has now been divided into four dedicated 11 KV feeders — Ichhapur, Palia, Badatemara, and Chacha. This will enable improved load management, a better voltage profile, reliable supply, and faster restoration of power during disruptions, particularly during Kalbaisakhi storms and adverse weather conditions.

The new 33 KV line supplying power to the Chacha PSS has been extended from the Jharigaon Primary Substation. This has created a stronger and more efficient network for rural consumers. The infrastructure upgrade is expected to support the growing needs of the region as Nabarangpur steadily emerges as an important agricultural belt and developing business corridor in Southern Odisha.

Improved electricity infrastructure will play a crucial role in enhancing irrigation, supporting small businesses, boosting local economic activities, and enhancing the quality of life for residents in the area.

Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said, "The commissioning of the Chacha Primary Substation marks an important step in strengthening the rural power infrastructure of Nabarangpur district. By reducing feeder lengths and creating dedicated distribution lines, we are ensuring better voltage quality, reliable power supply, and faster restoration services for consumers. TPSODL remains committed to delivering dependable and quality electricity to every consumer while supporting the region's agricultural and economic growth."

TPSODL continues to invest in modernizing the power distribution network across Southern Odisha with a focus on safety, renewable energy, and infrastructure development in rural and semi-urban areas.

PRESS RELEASE

TPSODL Receives International Safety Award

Berhampur, May 2026: TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and Govt. of Odisha, has been awarded the prestigious International Safety Award 2026 by the British Safety Council in the “Distinction” category. The recognition highlights the company’s commitment towards maintaining high standards of workplace health, safety, and employee well-being across its operational areas.

The International Safety Award recognises organisations that demonstrate strong safety management practices and proactive efforts in preventing workplace injuries and work-related ill health. TPSODL received the honour for its continued focus on creating a safe working environment and strengthening its culture of safety across all levels of operation.

The award further reflects TPSODL’s emphasis on safe operational practices, regular safety awareness programmes, employee training, field-level monitoring, and adoption of best safety standards in day-to-day operations.

Speaking on the achievement, Amit Kumar Garg, CEO, TPSODL, said, “We are pleased to receive this recognition from the British Safety Council. Safety remains one of the key priorities for TPSODL and we will continue our efforts towards ensuring a safe and healthy workplace for employees and stakeholders.”

TPSODL has been consistently undertaking various initiatives to strengthen workplace safety and promote awareness among employees, field staff, and business associates, reinforcing its commitment towards operational excellence and a culture of zero harm.

TPSODL Receives International Safety Award

Berhampur, (Correspondent):- TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and Govt. of Odisha, has been awarded the prestigious International Safety Award 2026 by the British Safety Council in the "Distinction" category.

The recognition highlights the company's commitment towards maintaining high standards of workplace health, safety, and employee well-being across its operational areas. The International Safety Award recognises organisations that demonstrate strong

safety management practices and proactive efforts in preventing workplace injuries and work-related ill health. TPSODL received the honour for its continued focus on creating a safe working environment and strengthening its culture of safety across all levels of operation.

The award further reflects TPSODL's emphasis on safe operational practices, regular safety awareness programmes, employee training, field-level monitoring, and adoption of best safety standards in day-to-day operations. Speaking on the achievement, Amit

Kumar Garg, CEO, TPSODL, said, "We are pleased to receive this recognition from the British Safety Council. Safety remains one of the key priorities for TPSODL and we will continue our efforts towards ensuring a safe and healthy workplace for employees and stakeholders." TPSODL has been consistently undertaking various initiatives to strengthen workplace safety and promote awareness among employees, field staff, and business associates, reinforcing its commitment towards operational excellence and a culture of zero harm.

BERHAMPUR, MAY 26, 2026

TP Southern Odisha Distribution Limited (TPSODL), a joint venture between Tata Power and the Government of Odisha, has been conferred with the prestigious International Safety Award 2026 by the British Safety Council in the "Distinction" category, recognising the company's strong commitment towards workplace health, safety, and employee well-being across its operational areas.

The globally recognised award honours organisations that demonstrate robust safety management systems and proactive measures in preventing workplace injuries and occupational health risks. TPSODL earned the distinction for its sustained efforts in creating a safe working environment and embedding a strong culture of safety across all levels of operations.

The recognition highlights the utility major's continued focus on implementing safe operational practices, conducting regular safety awareness drives, strengthening employee training programmes, enhancing field-level monitoring, and adopting globally accepted safety standards in its day-to-day operations.

Speaking on the achievement, TPSODL CEO Amit Kumar Garg said, "We are pleased to receive this recognition from the British Safety Council. Safety remains one of the key priorities for TPSODL and we will continue our efforts towards ensuring a safe and healthy workplace for employees and stakeholders."

Over the years, TPSODL has consistently undertaken several initiatives aimed at reinforcing workplace safety and promoting awareness among employees, field staff, and business associates. The latest international recognition further underlines the company's commitment to operational excellence and its vision of fostering a culture of zero harm across its power distribution network in Southern Odisha.
