TPSODL strengthens power supply to district hq hospital, Jeypore

STATESMAN NEWS SERVICE
Bhubaneswar, 8 October:

TP Southern Odisha Distribution Limited (TPSODL) has further strengthened the power supply system at the District Headquarters Hospital (DHH), Jeypore, by installing and activating a new 1.25 MVA power unit. This comes in addition to

the first 1250 kVA unit set up last year, doubling the hospital's capacity to receive reliable electricity supply.

The newly commissioned setup includes the transformer, along with its control and monitoring systems, which ensures that power remains stable and does not trip during critical treatment.

Speaking on the initiative,

Mr. Amit Kumar Garg, CEO TPSODL said: strengthening the power supply at hospitals like Jeypore DHH reflects our broader commitment to supporting critical public institutions.

TPSODL remains focused on providing safe and continuous supply so that patient care is never disrupted.

Reliable power boost for Jeypore District Headquarters Hospital

PBD BUREAU

BERHAMPUR, OCT 1

TP Southern Odisha Distribution Limited (TPSODL) has further strengthened the power infrastructure at the District Headquarters Hospital (DHH) in Jeypore by installing and commissioning a new 1.25 MVA power unit. This new installation complements the existing 1250 KVA unit set up last year, effectively doubling the hospital's power capacity and ensuring a more reliable electricity supply.

This significant upgrade comes at a crucial time, as the hospital continues to expand its services and witness an increasing number of patients. Reliable power is essential to support uninterrupted medical operations, especially in a facility that

serves a large population across Koraput district and the surrounding rural and hilly regions — areas where access to healthcare often involves long and difficult travel.

The newly commissioned setup includes a transformer along with advanced control and monitoring systems, designed to maintain a stable power supply without tripping during critical treatments. The additional capacity not only reduces the risk of outages but also supports the hospital's future expansion plans by addressing potential electricity load and voltage fluctuation

concerns.

Commenting on the development, Amit Kumar Garg, CEO, TPSODL, said:

"Strengthening the power supply at hospitals like Jeypore DHH reflects our broader commitment to supporting vital public institutions. TPSODL remains focused on delivering safe and uninterrupted power to ensure patient care is never compromised."

The commissioning event was attended by key TPSODL officials including Dnyaneshwar K. S. Chandra (Chief, Technical Services), Manmohan Nath Mishra (Circle Head, Jeypore), Varun Choudhury (Executive Engineer, Jeypore Electrical Division), section heads, and the DHH Jeypore Manager.

Reliable Power Boost for Jeypore District Hospital

Reliable Power Boost: TP Southern Odisha Distribution Limited (TPSODL) has further strengthened the power supply system at the District Headquarters Hospital (DHH), Jeypore, by installing and activating a new 1.25 MVA power unit. This comes in addition to the first 1250 kVA unit set up last year, doubling the hospital's capacity to ensure reliable electricity supply. This upgrade directly supports the hospital's growing needs. With more patients visiting the facility and new medical services being introduced, reliable power is essential for smooth operations. Jeypore District Headquarters Hospital serves a wide population from Kotapar and nearby rural and hilly areas, where travelling the scenic often involves long distances and

difficult routes. The newly commissioned setup includes the transformer, along with its control and monitoring systems, which ensures that power remains stable and does not trip during critical treatment. The additional capacity will also help the hospital expand its facilities in the future without worrying about

electricity load or voltage-related interruptions. It reduces the chances of outages and provides a backup layer of stability during peak hours or emergencies. Speaking on the initiative, Mr. Amit Kumar Garg, CEO TPSODL, said, "strengthening the power supply at hospitals like Jeypore

DHH reflects our broader commitment to supporting critical public institutions. TPSODL remains focused on providing safe and continuous supply so that patients never disrupted. The commissioning was attended by key TPSODL officials, including Shri Dnyaneshwar Ramchandra Chaturvedi (Chief Technical Services), Shri Mammoth Nath Mishra (Circle Head, Jeypore), Shri Naran Choudhury (Executive Engineer, Jeypore Electrical Division), Section Head, and the DHH Jeypore Manager. TPSODL's initiative marks another step towards improving public health infrastructure in Southern Odisha by making hospitals better prepared for emergencies, easing patient load, and ensuring medical services.

जयपुर जिला अस्पताल में टीपीएसओडीएल ने लगाया 1.25 एमवीए पावर यूनिट

जयपुर सेवादाया, भुवनेश्वर : जयपुर जिला मुख्यालय अस्पताल में अब बिजली कटौती या वोल्टेज की समस्या मरीजों के इलाज में बाधा नहीं बनेगी।

टीपी साइट्स अतिरिक्त टिपीओडीएल लिमिटेड (टीपीएसओडीएल) ने अस्पताल में 1.25 एमवीए का पावर यूनिट स्थापित कर बिजली कटौती को और परतकृत कर दिया है। यह यूनिट पिछले साल मार्च, 2025 केवैए यूनिट के

साथ मिलकर अस्पताल की कुल बिजली इलाज को देखभाल करेगा। अस्पताल में बढ़ते मरीज संख्या और नई फिजिकल सेक्टरों के विस्तार को देखते हुए यह काम और महत्व माना जा रहा है। जयपुर जिला अस्पताल कोलाहल सिला उपचार के इन्फेज और फाउंडी इलाजों के इलाजों मरीजों को आवश्यक सेवाएं देता है।

अई मरीज लंबे दूरी तक कर पाने इलाज के लिए भुंजाने हैं, देने में अब उन्हें बिजली कटा की समस्या

का सामना नहीं करना पड़ेगा। नई इलाजों में अत्याधुनिक टुमोसॉर्म, निरंजण और निरदनी उपकरण शामिल हैं, जिसमें बिजली आपूर्ति सुचारु बनी रहनी और उपचार के दौरान टिपिन का कटौती की आवश्यकता नहीं रहनी। यह ही, यह नई इलाजों के अस्पताल की सुविधाओं के विस्तार, जैसे नई जेनेरी, अईवीए यूनिट और अल्ट्रा साउंड के लिए आवश्यक उपकरणों की आवश्यकता में भी मदद करेगा। इस अवसर पर टीपीएसओडीएल

के सीईओ अमित कुमार वर्मा ने कहा कि जयपुर जिला अस्पताल जैसे महत्वपूर्ण सार्वजनिक संस्थानों में बिजली आपूर्ति को परतकृत करना हमारी प्राथमिकता है। 'हमारा उद्देश्य है कि किसी भी परिस्थिति में मरीजों को देखभाल अक्षित न हो और अस्पताल का कामकाज चले।' उन्होंने कहा। कार्यालय कार्यालय में टीपीएसओडीएल के वरिष्ठ अधिकारी लक्ष्मण दामोदर

समर्थिकावे (मुख्य तकनीकी सेवाएं), मयंक नरप मिश्रा (इंजीनियर, जयपुर), अरुण चौधरी (कार्यकारी अधिकारी, जयपुर इलेक्ट्रिकल टिपीओडीएल), विभिन्न सेक्टरों के इन्फेज और कोलाहल जयपुर के इन्फेज उपस्थित थे।

कार्यक्रम के दौरान अस्पताल परिसर में टीपीएसओडीएल टीम का अभार जताते हुए कहा कि इस प्रकार से मरीजों को सेक्टरों की सुविधा में निश्चिंत रूप में सुधार लाया।

टीपीएसओडीएल ने बढ़ाई बिजली आपूर्ति क्षमता

जिला मुख्यालय अस्पताल को मिला भरोसेमंद पावर बूस्ट

नवभारत ब्यूरो। भुवनेश्वर। टीपी सर्जन ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने कोरापुट जिला मुख्यालय अस्पताल, जयपुर की बिजली आपूर्ति प्रणाली को और मजबूत करते हुए एक नया 1.25 एमवीए पावर यूनिट स्थापित और चालू किया है। यह यूनिट पिछले वर्ष लगाए गए पहले 1250 केबीए यूनिट के अतिरिक्त है, जिससे अस्पताल की कुल बिजली क्षमता अब दोगुनी हो गई है। यह कदम अस्पताल की बढ़ती जरूरतों को ध्यान में रखकर उठाया गया है। जयपुर जिला अस्पताल में प्रतिदिन बढ़ी संख्या में मरीज इलाज के लिए पहुंचते हैं, साथ ही यहां नई स्वास्थ्य सेवाएं भी शुरू की जा रही हैं। ऐसे में निर्बाध और स्थिर बिजली आपूर्ति अस्पताल की सुचारू कार्यप्रणाली के लिए बेहद जरूरी है। यह अस्पताल कोरापुट जिले सहित आसपास के ग्रामीण और पहाड़ी इलाकों की बड़ी आबादी को स्वास्थ्य सुविधा प्रदान करता है, जहां से मरीजों को लंबी दूरी तय कर आना पड़ता है। नए सैटअप में ट्रांसफार्मर के साथ नियंत्रण और मॉनिटरिंग सिस्टम भी शामिल है, जो यह सुनिश्चित करेगा कि बिजली आपूर्ति स्थिर बनी रहे और किसी महत्वपूर्ण उपचार के दौरान ट्रिप न हो। अतिरिक्त क्षमता अस्पताल को भविष्य में अपनी सुविधाएं बढ़ाने में भी मदद करेगी, बिना बिजली भार या वोल्टेज की समस्या की चिंता किए।

इस अवसर पर टीपीएसओडीएल के सीईओ अमित कुमार गर्ग ने कहा, जिला अस्पताल जैसी स्वास्थ्य संस्थाओं में बिजली आपूर्ति को सुदृढ़ बनाना हमारी प्रतिबद्धता का हिस्सा है। हमारा उद्देश्य यह सुनिश्चित करना है कि मरीजों की देखभाल कभी भी

बिजली की कमी से प्रभावित न हो। इस अवसर पर टीपीएसओडीएल के वरिष्ठ अधिकारी - ज्ञानेश्वर रामचंद्र धर्माधिकारी (मुख्य तकनीकी सेवा प्रमुख), मनमथ नाथ मिश्र (सर्कल हेड, जयपुर), श्री वरुण चौधरी (कार्यकारी अभियंता, जयपुर विद्युत प्रभाग), विभिन्न सेक्शन हेड्स और डीएचएच जयपुर के प्रबंधक उपस्थित थे। यह पहल दक्षिण ओडिशा में स्वास्थ्य अवसंरचना को मजबूत बनाने की दिशा में एक और महत्वपूर्ण कदम है, जिससे अस्पताल अब आपात स्थितियों, बढ़ती मरीज संख्या और उन्नत चिकित्सा सेवाओं के लिए बेहतर रूप से तैयार रहेगा।

Synopsis: TP Southern Odisha Distribution Limited (TPSODL) has further strengthened the power supply system at the District Headquarters Hospital (DHH), Jeypore, by installing and activating a new 1.25 MVA power unit. This comes in addition to the first 1250 kVA unit set up last year, doubling the hospital’s capacity to receive reliable electricity supply. This upgrade directly supports the hospital’s growing needs. With more patients visiting the facility and new medical services being introduced, reliable power is essential for smooth operations. Jeypore District Headquarters Hospital serves a wide population from Koraput and nearby rural and hilly areas, where travelling for treatment often involves long distances and difficult routes. The newly commissioned setup includes the transformer, along with its control and monitoring systems, which ensures that power remains stable and does not trip during critical treatment. The additional capacity will also help the hospital expand its facilities in the future without worrying about electricity load or voltage-related interruptions. It reduces the chances of outages and provides a backup layer of stability during peak hours or emergencies. Speaking on the initiative, Mr. Amit Kumar Garg, CEO TPSODL said: strengthening the power supply at hospitals like Jeypore DHH reflects our broader commitment to supporting critical public institutions. TPSODL remains focused on providing safe and continuous supply so that patient care is never disrupted.

Synopsis: TP Southern Odisha Distribution Limited (TPSODL) has further strengthened the power supply system at the District Headquarters Hospital (DHH), Jeypore, by installing and activating a new 1.25 MVA power unit. This comes in addition to the first 1250 kVA unit set up last year, doubling the hospital’s capacity to receive reliable electricity supply. This upgrade directly supports the hospital’s growing needs. With more patients visiting the facility and new medical services being introduced, reliable power is essential for smooth operations. Jeypore District Headquarters Hospital serves a wide population from Koraput and nearby rural and hilly areas, where travelling for treatment often involves long distances and difficult routes. The newly commissioned setup includes the transformer, along with its control and monitoring systems, which ensures that power remains stable and does not trip during critical treatment. The additional capacity will also help the hospital expand its facilities in the future without worrying about electricity load or voltage-related interruptions. It reduces the chances of outages and provides a backup layer of stability during peak hours or emergencies. Speaking on the initiative, Mr. Amit Kumar Garg, CEO TPSODL said: strengthening the power supply at hospitals like Jeypore DHH reflects our broader commitment to supporting critical public institutions. TPSODL remains focused on providing safe and continuous supply so that patient care is never disrupted.

Success of rooftop solar systems in Bhatakumarada

in India's solar journey. The adoption of rooftop solar in Bhatakumarada reflects how rural communities are coming forward to embrace clean energy with enthusiasm and confidence.'

STATESMAN NEWS SERVICE
Berhampur, 21 October:

TP Southern Odisha Distribution Limited (TPSODL) has intensified the adoption of rooftop solar systems under the Utility-Led Aggregation (ULA) Model of the PM Surya Ghar: Muft Bijli Yojana.

As part of this ongoing effort, a 1 kWp Rooftop Solar (RTS) installation at the residence of Prabhakar Behera in Bhatakumarada village, Bhatakumarada GP under Purusottampur Electrical Division, Ganjam district, was successfully commissioned on in the presence of Amit Kumar

Garg, CEO, TPSODL, and senior officials of the company.

Under the scheme, 22 consumers from Bhatakumarada have so far deposited their contribution of ₹8,747 each, while 18 rooftop solar plants (1 kWp each) have already been installed and energised.

Under the ULA model, a 1 kWp rooftop solar plant can generate about 100 units of electricity every month. This helps a household meet its power needs using clean energy. By using solar power, the consumer can save nearly ₹5,000 every year.

Mr Garg said, 'Our vision is to make every household in Southern Odisha a partner

Bhatakumarada village embraces solar power under PM Surya Ghar Yojana

PBD BUREAU

BERHAMPUR, OCT 21

TP Southern Odisha Distribution Limited (TPSODL) has stepped up efforts

to promote rooftop solar adoption in rural areas through the Utility-Led Aggregation (ULA) Model of the PM Surya Ghar: Muft Bijli Yojana.

A notable milestone was achieved with the commissioning of a 1 kWp rooftop solar system at the residence of Prabhakar Behera in Bhatakumarada village, Ganjam district, in the presence of TPSODL CEO Amit Kumar Garg and senior offi-

cial.

So far, 22 consumers in the village have contributed Rs 8,747 each under the scheme. Of these, 18 rooftop solar plants have already been installed and energised, with the rest nearing completion. The initiative aims to reduce dependence on grid power, cut electricity costs, and promote environmental sustainability.

The ULA model ensures cost efficiency, standardised

installations, and timely execution. Each 1 kWp plant can generate about 100 units of electricity per month, helping households save up to Rs 5,000 annually.

"Our vision is to make every household in Southern Odisha a partner in India's solar journey. The adoption of rooftop solar in Bhatakumarada reflects how rural communities are coming forward to embrace clean energy with enthusiasm and confidence. TPSODL will continue to extend all possible support to help consumers benefit from the PM Surya Ghar: Muft Bijli Yojana and move towards energy independence," said CEO Garg.

Solar Spark in Bhatakumarada Village

B e r h a m p u r , (Correspondent): In a major step towards promoting renewable energy and empowering rural households, TP Southern Odisha Distribution Limited (TPSODL) has intensified the adoption of rooftop solar systems under the Utility-Led Aggregation (ULA) Model of the PM Surya Ghar: Muft Bijli Yojana. The initiative aims to make clean energy affordable and accessible for rural consumers, while ensuring quality installation, safety, and l o n g - t e r m sustainability. Through the ULA approach, TPSODL acts as a f a c i l i t a t o r — aggregating consumer demand, managing technical execution, and ensuring seamless commissioning of solar

rooftop systems across villages in Southern Odisha. As part of this ongoing effort, a 1 kWp Rooftop Solar (RTS) installation at the residence of Mr. Prabhakar Behera in Bhatakumarada village, Bhatakumarada GP under Purusottampur Electrical Division, Ganjam district, was s u c c e s s f u l l y commissioned on in the presence of Mr. Amit Kumar Garg, CEO, TPSODL, and senior officials of the company. This installation marks an important milestone for

the village, which is actively embracing solar energy as a reliable and sustainable source of power. Under the scheme, 22 consumers from Bhatakumarada have so far deposited their contribution of ₹8,747 each, while 18 rooftop solar plants (1 kWp each) have already been installed and energised. The remaining systems are under various stages of completion and are expected to be commissioned shortly. Once completed, the entire village will witness a significant

transformation—reducing dependence on grid electricity, lowering power bills, and contributing to a c l e a n e r environment. The ULA model under the PM Surya Ghar Muft Bijli Yojana, has proven to be a game-changer for rural areas. The model ensures economies of scale, standardised installation quality, and faster implementation. Under the ULA model, a 1 kWp rooftop solar plant can generate about 100 units of electricity every month. This helps a household meet its power needs using clean energy. By using solar power, the consumer can save nearly 5,000 every year. It is an easy and smart way to reduce electricity bills and support green energy.

हर घर की छत पर सोलर पैनल टीपीएस ओडीएल ने भाटकुमरडा में शुरू की सौर ऊर्जा पहल

नवभारत व्यूरो। भुवनेश्वर। ग्रामीण परो को सशक्त बनाने और नवीकरणीय ऊर्जा को बढ़ावा देने की दिशा में टीपी सदरन ओडिशा डिस्ट्रीब्यूशन लिमिटेड (टीपीएसओडीएल) ने प्रधानमंत्री सूर्य पर : मुफ्त बिजली योजना के अंतर्गत गृहनिर्माण-सेट एप्लीकेशन मॉडल के तहत छत पर सोलर सिस्टम लगाने की प्रक्रिया को तेज कर दिया है। इस पहल का उद्देश्य ग्रामीण उपभोक्ताओं को स्वच्छ ऊर्जा सुलभ और किफायती बनाना है, साथ ही गुणवत्ता, सुरक्षा और दीर्घकालिक टिकाऊपन सुनिश्चित करना है। इस योजना के तहत टीपीएसओडीएल एक सुविधादाता की भूमिका निभा रहा है— उपभोक्ताओं की मांग को एकांकित करना, तकनीकी कार्यान्वयन का प्रबंधन करना और गांवों में सौर ऊर्जा प्रणालियों का मुद्रांकन कमीशन सुनिश्चित करना। इसी क्रम में, गनजाम जिले के पुरुषोत्तमपुर विद्युत मंडल अंतर्गत भाटकुमरडा ग्राम पंचायत के भटकुमरडा गांव में प्रभाकर बेहरा के आवास पर 1 किलोवाट क्षमता का छत पर सोलर सिस्टम सफलतापूर्वक स्थापित किया गया। इस अवसर पर टीपीएसओडीएल के मुख्य कार्यकारी अधिकारी अमित कुमार गर्ग तथा कंपनी के सैरिफ्ट अधिकारी उपस्थित थे। यह स्थापना गांव के लिए एक महत्वपूर्ण मील का पत्थर

है, जहां ग्रामीण अब स्वच्छ और विश्वसनीय ऊर्जा को उत्साहपूर्वक अपना रहे हैं। योजना के तहत अब तक भटकुमरडा गांव के 22 उपभोक्ताओं ने 8,747 की अपनी हिस्सेदारी जमा की है, जबकि 18 छत पर स्टैलर संयंत्र (प्रत्येक 1 किलोवाट) स्थापित और चालू किए जा चुके हैं। शेष संयंत्र विभिन्न चरणों में हैं और जल्द ही चालू किए जाएंगे। इस परियोजना के पूरा होने पर गांव की बिजली पर निर्भरता कम होगी, बिजली बिलों में कमी आएगी और पर्यावरण को स्वच्छ बनाए रखने में योगदान मिलेगा।

ग्रूलए मॉडल ग्रामीण क्षेत्रों के लिए एक गेम-चेंजर साबित हो रहा है। इस मॉडल से सामूहिक रूप से कार्य करने से लागत घटती है, गुणवत्ता मानक बने रहते हैं और स्थापना प्रक्रिया तेज होती है। 1 किलोवाट का सोलर संयंत्र प्रति माह लगभग 100

यूनिट बिजली उत्पन्न करता है, जिससे एक परिवार अपनी जरूरत की अधिकांश बिजली स्वयं उत्पन्न कर सकता है। सौर ऊर्जा के उपयोग से उपभोक्ता सालाना लगभग 5,000 की बचत कर सकते हैं— यह न केवल आर्थिक रूप से लाभदायक है, बल्कि पर्यावरण संरक्षण की दिशा में भी बड़ा कदम है। इस अवसर पर अमित कुमार गर्ग ने कहा, 'हमारा लक्ष्य एशिया ओडिशा के हर घर को भारत की सौर यात्रा का भागीदार बनाना है। भाटकुमरडा में सौर ऊर्जा को अपनाने की पहल यह दिखाती है कि ग्रामीण समुदाय स्वच्छ ऊर्जा को पूरे उत्साह और विश्वास के साथ अपना रहे हैं। टीपीएसओडीएल उपभोक्ताओं को प्रधानमंत्री सूर्य पर: मुफ्त बिजली योजना से अधिकतम लाभ दिलाने और ऊर्जा आत्मनिर्भरता की दिशा में निरंतर सहयोग करता रहेगा।

Synopsis: In a major step towards promoting renewable energy and empowering rural households, TP Southern Odisha Distribution Limited (TPSODL) has intensified the adoption of rooftop solar systems under the Utility-Led Aggregation (ULA) Model of the PM Surya Ghar: Muft Bijli Yojana. The initiative aims to make clean energy affordable and accessible for rural consumers, while ensuring quality installation, safety, and long-term sustainability. Through the ULA approach, TPSODL acts as a facilitator—aggregating consumer demand, managing technical execution, and ensuring seamless commissioning of solar rooftop systems across villages in Southern Odisha.

As part of this ongoing effort, a 1 kWp Rooftop Solar (RTS) installation at the residence of Mr. Prabhakar Behera in Bhatakumarada village, Bhatakumarada GP under Purusottampur Electrical Division, Ganjam district, was successfully commissioned on in the presence of Mr. Amit Kumar Garg, CEO, TPSODL, and senior officials of the company. This installation marks an important milestone for the village, which is actively embracing solar energy as a reliable and sustainable source of power.

Under the scheme, 22 consumers from Bhatakumarada have so far deposited their contribution of ₹8,747 each, while 18 rooftop solar plants (1 kWp each) have already been installed and energised. The remaining systems are under various stages of completion and are expected to be commissioned shortly. Once completed, the entire village will witness a significant transformation—reducing dependence on grid electricity, lowering power bills, and contributing to a cleaner environment.

Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said, 'Our vision is to make every household in Southern Odisha a partner in India's solar journey. The adoption of rooftop solar in Bhatakumarada reflects how rural communities are coming forward to embrace clean energy with enthusiasm and confidence. TPSODL will continue to extend all possible support to help consumers benefit from the PM Surya Ghar: Muft Bijli Yojana and move towards energy independence.'

Synopsis: In a major step towards promoting renewable energy and empowering rural households, TP Southern Odisha Distribution Limited (TPSODL) has intensified the adoption of rooftop solar systems under the Utility-Led Aggregation (ULA) Model of the PM Surya Ghar: Muft Bijli Yojana. The initiative aims to make clean energy affordable and accessible for rural consumers, while ensuring quality installation, safety, and long-term sustainability. Through the ULA approach, TPSODL acts as a facilitator—aggregating consumer demand, managing technical execution, and ensuring seamless commissioning of solar rooftop systems across villages in Southern Odisha.

As part of this ongoing effort, a 1 kWp Rooftop Solar (RTS) installation at the residence of Mr. Prabhakar Behera in Bhatakumarada village, Bhatakumarada GP under Purusottampur Electrical Division, Ganjam district, was successfully commissioned on in the presence of Mr. Amit Kumar Garg, CEO, TPSODL, and senior officials of the company. This installation marks an important milestone for the village, which is actively embracing solar energy as a reliable and sustainable source of power. Under the scheme, 22 consumers from Bhatakumarada have so far deposited their contribution of ₹8,747 each, while 18 rooftop solar plants (1 kWp each) have already been installed and energised. The remaining systems are under various stages of completion and are expected to be commissioned shortly. Once completed, the entire village will witness a significant transformation—reducing dependence on grid electricity, lowering power bills, and contributing to a cleaner environment.

Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said, 'Our vision is to make every household in Southern Odisha a partner in India's solar journey. The adoption of rooftop solar in Bhatakumarada reflects how rural communities are coming forward to embrace clean energy with enthusiasm and confidence. TPSODL will continue to extend all possible support to help consumers benefit from the PM Surya Ghar: Muft Bijli Yojana and move towards energy independence.'

Engineer cycles to promote green energy awareness

Hrusikesh Mohanty | TNN

Berhampur: A 29-year-old electrical engineer completed a 640-km bicycle journey across southern Odisha to raise awareness about green energy and electrical safety.

Starting from Koraput district's Jeypore on Oct 15, Soumya Ranjan Lenka covered seven districts before reaching Berhampur on Thursday promoting the PM Surya Ghar

TOI

Sahoo completed a 640-km journey across southern Odisha

Muft Bijili Yojana and safety regulations.

During his journey, Lenka, an engineer with Tata Power Southern Odisha Power Distribution Limited (TPSODL), visited schools and communities to spread his message. He used creative methods like self-composed songs and awareness slogans creating awareness among the public. "The govt has stressed on clean and green energy to reduce pollution," said Lenka.

Cycling Sunshine: TPSODL employee's 640 km awareness ride

STATESMAN NEWS SERVICE
Berhampur, 24 October:

Carrying the message of adopting solar energy and adhering to electrical safety norms, Saumya Ranjan Lenka completed a 640-km awareness journey on his bicycle.

Lenka serves as a Team Lead in the Project Department of TPSODL (TP Southern Odisha Distribution Limited). Beyond his professional life, he is an ardent environmentalist, always proactive in protecting the environment and raising awareness among the public through various means.

On 15 October, Saumya Ranjan Lenka embarked on a bicycle journey to spread awareness. Starting from Jeypore in the Koraput district, he peddled through Nabarangpur, Bhawanipatna, Balangit, Boudh, Kandhamal, Bhanjanagar, and Aska, concluding in Berhampur after seven days on 22 October. His primary goal was to promote the adoption of solar energy under the PM Surya Ghar Muft Bijli Yojana and to raise

awareness about adhering to electrical safety regulations.

Lenka said, "We have one Earth, one Sun. We can gift a green and beautiful world to the next generation. To achieve this, we must embrace clean and green energy. Moreover, we must always follow electrical safety guidelines while using electrical appliances. My aim is to extend this awareness campaign across Odisha in the coming days."

During his journey, Lenka reached out to many people and visited various schools to spread his message among children. At the conclusion of

his journey in Berhampur, Lenka also initiated a signature campaign, collecting signatures from numerous people, including students, whom he met along the way.

Appreciating the efforts, TPSODL's Chief Executive Officer, Mr. Amit Kumar Garg, said, "TPSODL has been promoting the use of solar energy across southern Odisha. Saumya Ranjan Lenka's innovative effort not only reflects his role as an employee but also demonstrates the responsibility of a conscious citizen towards the environment."

TPSODL employee completes 640-km ride to promote solar energy and safety

PBD BUREAU

BERHAMPUR, OCT 24

SAUMYA Ranjan Lenka, a Team Lead at TPSODL (TP Southern Odisha Distribution Limited), completed a 640-km cycling journey across southern Odisha to promote solar energy and electrical safety. Starting from Jeypore in the Koraput district on October 15, he traversed Nabarangpur, Bhawanipatna, Balangir, and other towns, reaching Berhampur on October 22. The campaign focused on the adoption of solar energy under the PM Surya Ghar Muft Bijli Yojana and electrical safety guidelines.

As an environmentalist, Lenka used the ride to engage with the public, visiting schools and communities to spread awareness through slogans and self-composed songs. He also launched a signature campaign, collecting

support from students and locals along the way.

Lenka emphasized the importance of clean energy and safety, stating, "We can gift a green world to the next generation by embracing solar energy and following electrical safety norms."

Appreciating the efforts, TPSODL CEO Amit Kumar Garg said, "Saumya Ranjan Lenka's innovative effort not only reflects his role as an employee but also demonstrates the responsibility of a conscious citizen towards the environment. TPSODL remains committed to promoting solar energy and ensuring consumer safety."

ପ୍ରୋଜେକ୍ଟ ବିଭାଗରେ ଟିମ୍ ଶିର୍ଷ ଭାବରେ କର୍ମଧାରୀ। ତାଙ୍କ କର୍ମନିର୍ବାହୀ ଭାବେ ବ୍ୟତୀତ ସେ ପରିବେଶପ୍ରେମୀ ଭାବେ ପରିଚିତ। ଅକ୍ଟୋବର ୧୫ରେ ସୌର ଗଞ୍ଜଳ ସାଲକେଇରେ ସଚେତନତା ଯତ୍ନା ଆରମ୍ଭ କରିଥିଲେ। କୋରାପୁଟ ଜିଲ୍ଲାର ଜୟପୁର ଠାରୁ ଆରମ୍ଭ କରିଥିବା ଏହି ଯତ୍ନା ନବରଙ୍ଗପୁର, ଭବାନୀପାଟଣା, ବାଲଙ୍ଗିର,

ବୌଦ୍ଧ, କନ୍ଧାମାଳ, ଭଞ୍ଜନଗର, ଆସ୍କା ବେଳ ୨୨ ତାରିଖରେ ହୁହୁପୁରରେ ଶେଷ ହୋଇଛି। ଟିପିଏସ୍ ଗ୍ରୁପ୍ସ ଘର ମୁକ୍ତ ବିଦ୍ୟୁତ୍ ଯୋଜନାରେ ସମ୍ପୂର୍ଣ୍ଣ ହେଇ ସୌର ଶକ୍ତିକୁ ଆପଣେଇବା ଏବଂ ବିଦ୍ୟୁତ୍ ସୁରକ୍ଷା ନିୟମ ମନିଷା ସହିତ ଏଥିପ୍ରତି ଲୋକଙ୍କୁ ସଚେତନ କରିବା ଥିବା ତାଙ୍କର ମୁଖ୍ୟ ଉଦ୍ଦେଶ୍ୟ। ସୌର ଗଞ୍ଜଳ କହିଛନ୍ତି, ଆମର ଗୋଟିଏ ପୃଥିବୀ, ଗୋଟିଏ ସୂର୍ଯ୍ୟ ଏବଂ ଗୋଟିଏ ଗ୍ରାହ, ହେଲେ ଆମେ ପରବର୍ତ୍ତୀ ପିଢ଼ିକୁ ସବୁଜ ଓ ସୁବର ପୃଥିବୀ ରପହରା ବେଳ ପରିବା।

ଏଥିପାଇଁ ଆମକୁ ସବୁଜ ଏବଂ ସ୍ୱଚ୍ଛ ଶକ୍ତିର ବ୍ୟବହାର କରିବାକୁ ହେବ। ଏ ବ୍ୟାପକରେ ବ୍ୟାପାର ମୁଖ୍ୟ କର୍ମନିର୍ବାହୀ ଅଧିକାରୀ ଅମିତ କୁମାର ଗର୍ଗ କହିଛନ୍ତି, ଟିପିଏସ୍‌ଓଡିଏଲ୍ ଦକ୍ଷିଣ ଓଡ଼ିଶାରେ ସୌର ଶକ୍ତିର ବ୍ୟବହାରକୁ ପ୍ରୋତ୍ସାହିତ କରିଆସୁଛି। ସୌର ଗଞ୍ଜଳଙ୍କ ଅଭିଳାଷ ପ୍ରୟାସ ଜଣେ ସଚେତନ ନାଗରିକର ପରିବେଶ ପ୍ରତି ଥିବା କର୍ତ୍ତବ୍ୟକୁ ଦର୍ଶାଇଥାଏ।

Synopsis: Carrying the message of adopting solar energy and adhering to electrical safety norms, Saumya Ranjan Lenka completed a 640-km awareness journey. Shri Lenka serves as a Team Lead in the Project Department of TPSODL (TP Southern Odisha Distribution Limited). Beyond his professional life, he is an ardent environmentalist, always proactive in protecting the environment and raising awareness among the public through various means.

As part of this initiative, on October 15, Shri Saumya Ranjan Lenka embarked on a bicycle journey to spread awareness. Starting from Jeypore in the Koraput district, the journey passed through Nabarangpur, Bhawanipatna, Balangir, Boudh, Kandhamal, Bhanjanagar, and Aska, concluding in Berhampur after seven days on 22nd October. His primary goal was to promote the adoption of solar energy under the PM Surya Ghar Muft Bijli Yojana and to raise awareness about adhering to electrical safety regulations.

Speaking about the initiative, Shri Lenka said, "We have one Earth, one Sun. We can gift a green and beautiful world to the next generation. To achieve this, we must embrace clean and green energy. Moreover, we must always follow electrical safety guidelines while using electrical appliances. My aim is to extend this awareness campaign across Odisha in the coming days."

During his journey, Shri Lenka reached out to many people and visited various schools to spread his message among children. He shared awareness slogans and sang self-composed songs about safety to create awareness among the public.

Synopsis: Carrying the message of adopting solar energy and adhering to electrical safety norms, Saumya Ranjan Lenka completed a 640-km awareness journey. Shri Lenka serves as a Team Lead in the Project Department of TPSODL (TP Southern Odisha Distribution Limited). Beyond his professional life, he is an ardent environmentalist, always proactive in protecting the environment and raising awareness among the public through various means.

As part of this initiative, on October 15, Shri Saumya Ranjan Lenka embarked on a bicycle journey to spread awareness. Starting from Jeypore in the Koraput district, the journey passed through Nabarangpur, Bhawanipatna, Balangir, Boudh, Kandhamal, Bhanjanagar, and Aska, concluding in Berhampur after seven days on 22nd October. His primary goal was to promote the adoption of solar energy under the PM Surya Ghar Muft Bijli Yojana and to raise awareness about adhering to electrical safety regulations.

Speaking about the initiative, Shri Lenka said, "We have one Earth, one Sun. We can gift a green and beautiful world to the next generation. To achieve this, we must embrace clean and green energy. Moreover, we must always follow electrical safety guidelines while using electrical appliances. My aim is to extend this awareness campaign across Odisha in the coming days."

During his journey, Shri Lenka reached out to many people and visited various schools to spread his message among children. He shared awareness slogans and sang self-composed songs about safety to create awareness among the public.

At the conclusion of his journey in Berhampur, Shri Lenka also initiated a signature campaign, collecting signatures from numerous people, including students, whom he met along the way.

Appreciating the efforts, TPSODL's Chief Executive Officer, Mr Amit Kumar Garg, said, "TPSODL has been promoting the use of solar energy across southern Odisha. Saumya Ranjan Lenka's innovative effort not only reflects his role as an employee but also demonstrates the responsibility of a conscious citizen towards the environment. TPSODL remains committed to promoting solar energy and ensuring consumer safety."

Synopsis: Carrying the message of adopting solar energy and adhering to electrical safety norms, Saumya Ranjan Lenka completed a 640-km awareness journey. Shri Lenka serves as a Team Lead in the Project Department of TPSODL (TP Southern Odisha Distribution Limited). Beyond his professional life, he is an ardent environmentalist, always proactive in protecting the environment and raising awareness among the public through various means.

As part of this initiative, on October 15, Shri Saumya Ranjan Lenka embarked on a bicycle journey to spread awareness. Starting from Jeypore in the Koraput district, the journey passed through Nabarangpur, Bhawanipatna, Balangir, Boudh, Kandhamal, Bhanjanagar, and Aska, concluding in Berhampur after seven days on 22nd October. His primary goal was to promote the adoption of solar energy under the PM Surya Ghar Muft Bijli Yojana and to raise awareness about adhering to electrical safety regulations.

Speaking about the initiative, Shri Lenka said, "We have one Earth, one Sun. We can gift a green and beautiful world to the next generation. To achieve this, we must embrace clean and green energy. Moreover, we must always follow electrical safety guidelines while using electrical appliances. My aim is to extend this awareness campaign across Odisha in the coming days."

During his journey, Shri Lenka reached out to many people and visited various schools to spread his message among children. He shared awareness slogans and sang self-composed songs about safety to create awareness among the public.

At the conclusion of his journey in Berhampur, Shri Lenka also initiated a signature campaign, collecting signatures from numerous people, including students, whom he met along the way.

Appreciating the efforts, TPSODL's Chief Executive Officer, Mr Amit Kumar Garg, said, "TPSODL has been promoting the use of solar energy across southern Odisha. Saumya Ranjan Lenka's innovative effort not only reflects his role as an employee but also demonstrates the responsibility of a conscious citizen towards the environment. TPSODL remains committed to promoting solar energy and ensuring consumer safety."

Synopsis: Carrying the message of adopting solar energy and adhering to electrical safety norms, Saumya Ranjan Lenka completed a 640-km awareness journey. Shri Lenka serves as a Team Lead in the Project Department of TPSODL (TP Southern Odisha Distribution Limited). Beyond his professional life, he is an ardent environmentalist, always proactive in protecting the environment and raising awareness among the public through various means.

As part of this initiative, on October 15, Shri Saumya Ranjan Lenka embarked on a bicycle journey to spread awareness. Starting from Jeypore in the Koraput district, the journey passed through Nabarangpur, Bhawanipatna, Balangir, Boudh, Kandhamal, Bhanjanagar, and Aska, concluding in Berhampur after seven days on 22nd October. His primary goal was to promote the adoption of solar energy under the PM Surya Ghar Muft Bijli Yojana and to raise awareness about adhering to electrical safety regulations.

Speaking about the initiative, Shri Lenka said, "We have one Earth, one Sun. We can gift a green and beautiful world to the next generation. To achieve this, we must embrace clean and green energy. Moreover, we must always follow electrical safety guidelines while using electrical appliances. My aim is to extend this awareness campaign across Odisha in the coming days."

During his journey, Shri Lenka reached out to many people and visited various schools to spread his message among children. He shared awareness slogans and sang self-composed songs about safety to create awareness among the public.

At the conclusion of his journey in Berhampur, Shri Lenka also initiated a signature campaign, collecting signatures from numerous people, including students, whom he met along the way.

Appreciating the efforts, TPSODL's Chief Executive Officer, Mr Amit Kumar Garg, said, "TPSODL has been promoting the use of solar energy across southern Odisha. Saumya Ranjan Lenka's innovative effort not only reflects his role as an employee but also demonstrates the responsibility of a conscious citizen towards the environment. TPSODL remains committed to promoting solar energy and ensuring consumer safety."

TP prepares to ensure steady power supply

EXPRESS NEWS SERVICE
@ Bhubaneswar

WITH cyclone Montha forming over the Bay of Bengal and 15 districts in coastal and southern regions of the state likely to be impacted by the changed weather condition, Tata Power has rolled out an extensive preparedness and response plan to ensure continuity of power supply and safety of consumers.

The company has activated its comprehensive business continuity and disaster management plan (BCDMP), reinforcing coordination mechanisms and emergency readiness in collaboration with state authorities and disaster management agencies. The distribution utilities of Tata Power have completed preventive maintenance of all primary and distribution substations while securing adequate stocks of critical equipment, including transformers, switchgear, poles and conductors. Specially trained quick-response teams have been strategically positioned across all divisions to enable swift restoration in case of power disruptions, said TPCODL CEO Arvind Singh.

As large parts of southern Odisha served by TPSODL have been given red alert, CEO of the utility Amit Kumar Garg said a centralised power system control centre at Berhampur and decentralised control centres at Jeypore, Rayagada and Bhanjanagar have been made fully functional.

TPSODL gears up for cyclonic storm

STATESMAN NEWS SERVICE
Berhampur, 25 October:

With Cyclone Montha building over the Bay of Bengal, TP Southern Odisha Distribution Limited (TPSODL) has rolled out an extensive preparedness and response plan to ensure continuity of power supply and safety of consumers across southern Odisha.

The company has activated its comprehensive Business Continuity and Disaster Management Plan (BCDMP).

As part of its proactive measures, TPSODL has completed preventive maintenance at both primary and distribution substations, while securing critical spare

parts, transformers, switchgear, poles, and conductors for emergency deployment. Specialized quick-response teams have been positioned across all divisions to handle power restoration swiftly in case of disruption. The company has also conducted mock drills to assess field readiness and inter-departmental coordination, said a release issued by the discom on Saturday.

TPSODL has established a 24x7 Centralised Power System Control Centre (PSCC) at Berhampur. In addition, Decentralised Area Power System Control Centres (APSCCs) at Jeypore, Rayagada, and Bhanjanagar are fully functional for localized HkV feeder control and field coordination.

Six mobile distribution substations have been kept on standby for rapid

redeployment in affected zones. Two tower wagons have been deployed for tree-cutting and clearing operations. In addition, 25 ASKA lights and 19 DG sets have been positioned at each division to support restoration work during low-light conditions.

Mr. Amit Kumar Garg, CEO of TPSODL, said, our teams have activated all necessary protocols to safeguard critical infrastructure and maintain power reliability. We are working closely with government agencies and disaster-management teams to minimize any potential damage.

It has also issued a safety advisory to consumers.

TPSODL preps ahead of cyclone ‘Montha’

AGENCIES

Berhampur, Oct 25: As India Meteorological Department (IMD) has issued Red warning of extremely heavy rainfall in parts of south Odisha in view of Cyclone Montha, TP Southern Odisha Distribution Limited (TPSODL) is gearing up with a response plan to ensure contin-

uous power supply and safety of consumers across the region.

The company has activated its comprehensive Business Continuity and Disaster Management Plan (BCDMP) reinforcing coordination mechanisms and emergency readiness in collaboration with state authorities and disaster management agencies. TPSODL

has already completed preventive maintenance at primary and distribution substations, securing critical spare parts, transformers, switchgear, poles and conductors for emergency deployment. Specialised quick-response teams have been positioned across all divisions to handle power restoration swiftly in case of disruption.

TPSODL activates disaster management plan as Cyclone Montha intensifies

PBD BUREAU

BERHAMPUR, OCT 25

WITH Cyclone Montha intensifying over the Bay of Bengal, TP Southern Odisha Distribution Limited (TPSODL) has activated its Business Continuity and Disaster Management Plan to ensure uninterrupted power supply and consumer safety across southern Odisha. The company is coordinating closely with state authorities and disaster management agencies to strengthen emergency preparedness.

Preventive maintenance has been completed at substations, and essential materials like transformers, poles, and con-

(A Joint Venture of Tata Power and Government of Odisha)

ductors have been stocked for emergency deployment. Quick-response teams are stationed across all divisions. A 24x7 Centralised Power System Control Centre at Berhampur and Decentralised Centres at Jeypore, Rayagada, and Bhanjanagar are monitoring power networks with uninterrupted backup.

Six mobile substations, 16 transit stores, tower wagons, ASKA lights, and DG sets are on standby for swift restoration. About

5,925 personnel, along with additional vehicles and manpower, are deployed for on-ground operations.

Consumers will receive real-time outage alerts via SMS, while satellite phones have been provided to ensure communication during network failures.

TPSODL CEO Amit Kumar Garg said the company's priority is to safeguard infrastructure and maintain service reliability. Consumers can report emergencies through helpline numbers 1912 or 1800-2026 and are urged to follow safety guidelines during the cyclone.

TPSODL Gears Up for Cyclone 'Montha' with Robust Preparedness Plan

■ TPSODL activates Business Continuity and Disaster Plan

■ Six mobile substations ready for rapid deployment

■ 5925 personnel deployed across southern Odisha region

■ 24x7 Power Control Centres ensure continuous monitoring

■ 16 transit stores established for emergency materials

Berhampur, (DMS): With Cyclone Montha brewing over the Bay of Bengal, TP Southern Odisha Distribution Limited (TPSODL) has rolled out an extensive preparedness and response plan to ensure continuity of power supply and safety of consumers across southern Odisha. The company has activated its comprehensive Business Continuity and Disaster Management Plan (BCDMP), reinforcing coordination mechanisms and emergency readiness in collaboration with state authorities and disaster management agencies.

As part of its proactive measures, TPSODL has completed preventive maintenance at both primary and distribution substations, while securing critical spare parts,

transformers, switchgear, poles, and conductors for emergency deployment. Specialized quick-response teams have been positioned across all divisions to handle power restoration swiftly in case of disruption. The company has also conducted mock drills to assess field readiness and inter-departmental coordination.

To maintain real-time monitoring and seamless power management, TPSODL has established a 24x7 Centralised Power System Control Centre (PSCC) at Berhampur for continuous operation and monitoring of 33 kV feeders, primary substations, and 11 kV networks. In addition, Decentralised Area Power System Control Centres (APSCCs) at Jeypore, Rayagada, and Bhanjanagar are fully functional for localized 11 kV feeder control and field coordination. The company has ensured 24x7 power backup at these control centres for uninterrupted supervision during the cyclone.

Six mobile distribution substations have been kept on standby for rapid redeployment in affected zones. Alongside its five main stores, TPSODL has set up 16 transit stores across the region to ensure the availability of emergency materials like LT-ABC cables, poles, and conductors at the section level. Two tower wagons have been deployed for tree-cutting and clearing operations. In addition, 25 ASKA lights and 19 DG sets have been positioned at each division to support restoration work during low-light conditions.

The company has also implemented SMS alerts of outages

across six circles to keep consumers informed about power interruptions and restoration updates in real time. Satellite phones have been provided to the CEO, PSCC, and Circle Heads to ensure continuous communication even if conventional networks fail. Around 5,925 personnel are on ground duty, supported by additional manpower, vehicles, and mobile units for emergency response.

Mr. Amit Kumar Garg, CEO of TPSODL, said, "With Cyclone Montha forming over the Bay of Bengal, our teams have activated all necessary protocols to safeguard critical infrastructure and maintain power reliability. We are working closely with government agencies and disaster-management teams to minimize any potential damage. Our foremost priority is the safety and service continuity for our consumers, and we urge everyone to follow the safety guidelines shared by the company."

Consumers can report any electricity-related emergency through TPSODL's 24x7 toll-free helpline numbers: 1912 or 1800-2026. Division-wise emergency control rooms have been activated based on alerts received from the India Meteorological Department (IMD), and Feeder Champions have been assigned for all 33 kV and 11 kV critical feeders to ensure immediate maintenance and restoration action.

Through this structured and multi-layered preparedness approach, TPSODL remains committed to ensuring uninterrupted service, minimizing cyclone-related risks, and standing by the people of southern Odisha during this critical period.

Synopsis: With Cyclone Montha building over the Bay of Bengal, TP Southern Odisha Distribution Limited (TPSODL) has rolled out an extensive preparedness and response plan to ensure continuity of power supply and safety of consumers across southern Odisha. The company has activated its comprehensive Business Continuity and Disaster Management Plan (BCDMP), reinforcing coordination mechanisms and emergency readiness in collaboration with state authorities and disaster management agencies.

As part of its proactive measures, TPSODL has completed preventive maintenance at both primary and distribution substations, while securing critical spare parts, transformers, switchgear, poles, and conductors for emergency deployment. Specialized quick-response teams have been positioned across all divisions to handle power restoration swiftly in case of disruption. The company has also conducted mock drills to assess field readiness and inter-departmental coordination.

To maintain real-time monitoring and seamless power management, TPSODL has established a 24x7 Centralised Power System Control Centre (PSCC) at Berhampur for continuous operation and monitoring of 33 kV feeders, primary substations, and 11 kV networks. In addition, Decentralised Area Power System Control Centres (APSCCs) at Jeypore, Rayagada, and Bhanjanagar are fully functional for localized 11 kV feeder control and field coordination. The company has ensured 24x7 power backup at these control centres for uninterrupted supervision during the cyclone.

Six mobile distribution substations have been kept on standby for rapid redeployment in affected zones. Alongside its five main stores, TPSODL has set up 16 transit stores across the region to ensure the availability of emergency materials like LT-ABC cables, poles, and conductors at the section level. Two tower wagons have been deployed for tree-cutting and clearing operations. In addition, 25 ASKA lights and 19 DG sets have been positioned at each division to support restoration work during low-light conditions.

Synopsis: With Cyclone Montha building over the Bay of Bengal, TP Southern Odisha Distribution Limited (TPSODL) has rolled out an extensive preparedness and response plan to ensure continuity of power supply and safety of consumers across southern Odisha. The company has activated its comprehensive Business Continuity and Disaster Management Plan (BCDMP), reinforcing coordination mechanisms and emergency readiness in collaboration with state authorities and disaster management agencies.

As part of its proactive measures, TPSODL has completed preventive maintenance at both primary and distribution substations, while securing critical spare parts, transformers, switchgear, poles, and conductors for emergency deployment. Specialized quick-response teams have been positioned across all divisions to handle power restoration swiftly in case of disruption. The company has also conducted mock drills to assess field readiness and inter-departmental coordination.

To maintain real-time monitoring and seamless power management, TPSODL has established a 24x7 Centralised Power System Control Centre (PSCC) at Berhampur for continuous operation and monitoring of 33 kV feeders, primary substations, and 11 kV networks. In addition, Decentralised Area Power System Control Centres (APSCCs) at Jeypore, Rayagada, and Bhanjanagar are fully functional for localized 11 kV feeder control and field coordination. The company has ensured 24x7 power backup at these control centres for uninterrupted supervision during the cyclone.

Six mobile distribution substations have been kept on standby for rapid redeployment in affected zones. Alongside its five main stores, TPSODL has set up 16 transit stores across the region to ensure the availability of emergency materials like LT-ABC cables, poles, and conductors at the section level. Two tower wagons have been deployed for tree-cutting and clearing operations. In addition, 25 ASKA lights and 19 DG sets have been positioned at each division to support restoration work during low-light conditions.

Fresh landslides disrupt life in 3 districts

EXPRESS NEWS SERVICE
© Berhampur

HEAVY rains triggered by cyclone Montha caused fresh landslides in Ganjam, Gajapati and Kandhamal districts, disrupting road connectivity and damaging property in hilly areas.

In Ganjam, a landslide occurred near Raipat on Tuesday night, blocking Tadaika Sahi-Ankuli road and disrupting connectivity to more than 20 villages. The Charabada ghat was also blocked due to the incident. While debris at Charabada has already been cleared, the Raipat road stretch is expected to be reopened soon. Similarly, a landslide occurred at Khariguda ghat in Ranaba panchayat in Kandhamal's Raikia block on Wednesday morning. Large rocks fell on the front door of the house of one Uday Gouda in the region. Although Gouda and his family was inside at the time, they escaped unhurt.

Another major landslide was reported along the Shankuda-Khiliganda ghat road under Gajapati's Raigada block in the morning, cutting off road connectivity to Bonda and Khilngi villages under S Kardasingh

A section of the Shankuda-Khiliganda ghat road after the landslide | *careers*

panchayat. Sources said a stretch of the road has been buried under the debris.

On being informed, officials rushed to the site and launched an operation to clear the debris. A similar landslide had occurred on the same stretch on Tuesday. To prevent any mishap, residents taking shelter in relief camps have been advised not to return home until the roads are fully restored.

Meanwhile, the water level of Bansadhara river, which flows through Kasinagar, remained below the danger

mark. Against the danger level of 54.80 m, the river was flowing at 53.98 m on Wednesday morning. However, the overflowing Gumma canal led to waterlogging in Khinga and Bada Khinga villages under Ranipontha panchayat.

Meanwhile, TPSODEL restored electricity to over 9.5 lakh of the total 9.88,253 consumers within just 18 hours of the cyclone's impact. Power supply to all medical colleges, district headquarters hospitals, community and primary health centres, was restored on a priority basis. A total of

Addl BDO, revenue assistant face action for neglecting duty

Berhampur: The Ganjam administration on Wednesday took disciplinary action against additional block development officer (ABDO) of Aska Sushant Kumar Behera and Sheragada senior revenue assistant Sadananda Behera on charges of dereliction of duty after they were found absent from their headquarters during the inspection of collector V Keerthi Vasan. The ABDO has been asked to furnish a show-cause explanation, while Behera was placed under suspension. Notably, as part of its measures to ensure zero casualties, the district administration had instructed government staff to remain present at their respective headquarters until further notice. However, the duo was found absent during the collector's inspection on Tuesday.

ENS

5,925 skilled personnel have been deployed round the clock across Ganjam, Gajapati, Koraput, Rayagada, Malkangiri, Kandhamal, Nabarangpur and Boudh districts.

TPSODL restores power to 98% consumers within 18 hrs of cyclone Montha

STATESMAN NEWS SERVICE

Berhampur, 29 October:

Cyclone Montha brought intense rain and gusty winds across several districts of Southern Odisha, resulting in temporary disruption of electricity supply in many areas under TPSODL. The discom was quick to restore electricity supply to more than 9.5 lakh consumers out of the total 9,88,253 affected in 18 hours of the cyclone.

The power infrastructure faced damages across the network, including 33 kV and 11 kV feeders, substations and distribution transformers. However, due to the swift action of the restoration teams, 100% of the affected 33 kV feeders have already been revived, ensuring rapid

stabilization of the main power backbone.

At the distribution level, 99 percent of the 11 kV feeders have been normalized and 32,344 distribution transformers have been restored out of 33,535 impacted, reflecting a nearly complete revival of electricity supply across urban, semi-urban, and rural areas — most of it achieved within a record 18-hour period, said a release issued by the discom.

Power restoration for healthcare facilities has been completed on war footing. Drinking water supply infrastructure too has been fully energized under the Public Health Engineering Department (PHD), while restoration under Rural Water Supply and Sanitation (RWSS)

has reached 99%, helping maintain water security in the aftermath of the storm.

At least 5,925 skilled personnel have been working round the clock across Ganjam, Gajapati, Koraput, Rayagada, Malkangiri, Kandhamal, Nabarangpur, and Boudh districts.

Mr. Amit Garg, CEO, TPSODL said, "Our teams have worked tirelessly on the ground, braving adverse weather and challenging conditions to ensure timely restoration of essential services. Achieving more than 98% consumer restoration and 100% revival of critical infrastructure within just 18 hours reflects TPSODL's strong preparedness, technical expertise, and unwavering commitment."

TPSODL restores 98pc power in Southern Odisha within 18 hours after Cyclone Montha

PBD BUREAU

BERHAMPUR, OCT 29

CYCLONE Montha disrupted electricity across Southern Odisha, affecting nearly 9.9 lakh consumers under TP Southern Odisha Distribution Limited (TPSODL). Demonstrating exceptional preparedness and swift response, TPSODL restored power to over 9.5 lakh consumers – 98 per cent – within just 18 hours of the

cyclone’s peak.

Despite extensive damage to 33 kV and 11 kV feeders, substations, and transformers, all 33 kV feeders and primary substations were revived within hours. Ninety-nine percent of 11 kV feeders and 32,344 of the 33,535 affected transformers are back in service, ensuring near-complete restoration across urban and rural areas.

Essential public services received top priority: all

medical facilities and 100 per cent of Public Health Engineering Department water systems were fully energized, while Rural Water Supply restoration reached 99 per cent.

Over 5,900 personnel worked tirelessly across eight districts – supported by generators, control rooms, and rapid-response teams – to restore power in difficult terrains.

CEO Amit Garg commended the teams for their dedication, citing TPSODL’s technical strength and commitment to Southern Odisha’s people. The company remains on high alert with safety monitoring and urges citizens to report hazards via helpline 18002026 or 1912.

98% Consumers Restored post Cyclone Montha within 18 hours record time

Berhampur, : Cyclone Montha brought intense rain and gusty winds across several districts of Southern Odisha, resulting in temporary disruption of electricity supply in many areas under TP Southern Odisha Distribution Limited (TPSODL). Rising to the challenge with remarkable preparedness and rapid field response, TPSODL has successfully restored electricity supply to more than 9 lakh 50 thousand consumers out of the 9,88,253 affected, achieving a major milestone of 98% restoration within just 18 hours of the cyclone's peak impact. The power infrastructure faced damages across the network, including 33

kV and 11 kV feeders, substations and distribution transformers. However, due to the swift action of the restoration teams, 100% of the affected 33 kV feeders have already been revived, ensuring rapid stabilization of the main power backbone. Restoration efforts at primary substations are also completed with 100 % already operational. At the distribution level, 99 percent of the 11 kV feeders have been normalized and 32,344 distribution

transformers have been restored out of 33,535 impacted, reflecting a nearly complete revival of electricity supply across urban, semi-urban, and rural areas — most of it achieved within a record 18-hour period. Ensuring continuity of essential public services remained the foremost priority for TPSODL. Power restoration for healthcare facilities has been completed on war footing, enabling 100% revival of Medical Colleges, District Headquarters Hospitals, Community

Health Centres, and Primary Health Centres. This ensured uninterrupted access to emergency and critical care services throughout the cyclone period. Drinking water supply infrastructure too has been fully energized under the Public Health Engineering Department (PHD), while restoration under Rural Water Supply and Sanitation (RWSS) has reached 99%, helping maintain water security in the aftermath of the storm. A massive manpower deployment of 5,925 skilled personnel has been working round the clock across Ganjam, Gajapati, Koraput, Rayagada, Malkangiri, Kandhamal, Nabarangpur, and

Boudh districts. These teams, supported by mobile power generators and rapid response units, continue to operate in difficult terrains and weather-affected zones to ensure the remaining pockets are restored at the earliest. TPSODL has kept its centralized and district-level control rooms in continuous operation to coordinate field efforts and support public safety needs. Speaking on the accelerated progress, Mr. Amit Garg, CEO, TPSODL said, "Our teams have worked tirelessly on the ground, braving adverse weather and challenging conditions to ensure timely restoration of essential services."

Cyclone Montha: TPSODL shows rapid response

TPSODL (Tribal Power Supply Operation and Distribution Limited) has successfully restored electricity supply to over 10 lakh 50 thousand consumers out of the 18.5 lakh affected at Berhampur region within 18 hours of the cyclone's passage. The project

involved over 1000 power lines and 11 220 substations and distribution transformers. However, due to the well action of the maintenance team, 80% of the affected 22 KV substations have already been restored, ensuring rapid restoration of the power supply. In addition, the restoration efforts at primary substations are also completed with 90% substations operational. In the distribution level, 80 percent of the 11 KV feeders have been restored and 12,500 distribution transformers have been repaired out of 25,000 required, reflecting a nearly

complete revival of electricity supply across urban, semi urban, and rural areas. The project was a model of how good teamwork, courtesy of essential public services, restored the power supply for TPSODL. Power restoration for suburban

locations has been completed by the team, making TPSODL one of the best performing utility companies in Odisha. The team includes staff from various health centers and primary health centers. The amount of work done is a testament to the

dedication of the cyclone period. Despite heavy supply restoration has been fully completed under the Tribal Health Engineering Organization (THEO) with assistance under Tribal Health Supply and Distribution (THSD) launched with helping maintain water security in the aftermath of the work.

A relative response deployment of 1,500 skilled personnel has been deployed to the state across Cuttack, Cuttack, Bargarh, Bargarh, Malkangiri, Kandhamal, Subarnapur, and Boudh districts. This team, supported

by mobile power generators and rapid response units, worked in tandem to address various and complex affected areas in a timely manner. TPSODL's strong preparation, technical expertise, and unwavering commitment to the people of Odisha (THSD) has enabled us to not only restore power but also ensure the safety and well-being of the affected population. TPSODL's strong preparation, technical expertise, and unwavering commitment to the people of Odisha (THSD) has enabled us to not only restore power but also ensure the safety and well-being of the affected population. Rapid Response, Rapid Restoration: TPSODL Leads the Way in S. Odisha

DNV of Berhampur

Cyclone Mocha brought intense rain and gusty winds across several districts of Southern Odisha, resulting in temporary disruption of electricity supply in many areas under TP Southern Odisha Distribution Limited (TPSODL). Rising to the challenge with remarkable preparedness and rapid field response, TPSODL has successfully restored electricity supply to more than 9 lakh 50 thousand consumers out of the 9,08,253 affected, achieving a major milestone of 88% restoration within just 18 hours of the cyclone's peak impact.

The power infrastructure faced damages across the network, including 23 KV and 11 KV feeders, substations and distribution transformers. However, due to the swift action of the restoration teams, 100% of the affected 35 KV feeders have already been restored, ensuring rapid stabilisation of the main power backbone. Restoration efforts at primary substations are also completed with 100% already operational. At the distribution level, 99 percent of the 11 KV feeders have been normalised and 32,344 distribution transformers have been insured out of 33,535 impacted, reflecting a nearly complete revival of electricity supply across urban, semi-urban, and rural areas

— most of it achieved within a record 18-hour period.

Ensuring continuity of essential public services remained the foremost priority for TPSODL. Power restoration for healthcare facilities has been completed on war footing, enabling 100% revival of Medical Colleges, District Headquarters Hospitals, Community Health Centres, and Primary Health Centres. This ensured uninterrupted access to emergency and critical care services throughout the cyclone period. Drinking water supply infrastructure too has been fully engaged under the Public Health Engineering Department (PHED), while restoration under Rural Water Supply and Sanitation (RWSS) has reached 88%, helping maintain water security in the aftermath of the storm.

A massive manpower deployment of 5,925 skilled personnel has been working round the clock across Ganjam, Gajapati, Kaptai, Rayagada, Malkangiri, Kandhamal, Sonepur, and Boudh districts. These teams, supported by mobile power generators and rapid response units, continue to operate in difficult terrains and weather-affected zones to ensure the remaining pockets are restored at the earliest. TPSODL has kept its centralised and district-level control rooms in continuous operation.

चक्रवात मॉनथा के बाद दक्षिण ओडिशा में टीपीएसओडीएल ने की 98% बिजली बहाली

टीपीएसओडीएल ने मात्र 18 घंटे में 9.5 लाख उपभोक्ताओं को जोड़ा पुनः ग्रिड से; 100 प्रतिशत आवश्यक सेवाएं हुईं चालू

भुवनेश्वर। चक्रवात मॉनथा के प्रचंड प्रभाव से दक्षिण ओडिशा के कई जिलों में तेल बरिश और तूफानी हवाओं के कारण बिजली आपूर्ति बाधित हो गई थी। लेकिन टाटा पावर-संचालित टीपीएसओडीएल ने असाधारण तत्परता और लचीले फोल्ड प्रतिक्रिया के साथ मात्र 18 घंटे में 98 प्रतिशत उपभोक्ताओं को पुनः बिजली आपूर्ति कर एक उल्लेखनीय उपलब्धि हासिल की है। कंपनी के अनुसार, चक्रवात से प्रभावित 9,88,253 उपभोक्ताओं में से 9.5 लाख से अधिक उपभोक्ताओं को आपूर्ति बहाल की जा चुकी है। नेटवर्क में 33 केवी और 11 केवी फीडर, सबस्टेशन और डिस्ट्रीब्यूशन ट्रांसफार्मर सहित कई स्तरों पर नुकसान हुआ था। इनके सफाई, 100 प्रतिशत 33 केवी फीडर और सभी प्राथमिक सबस्टेशन को बहाल कर लिया गया है। साथ ही, 99 प्रतिशत 11 केवी फीडर और 33,535 में से 32,344 ट्रांसफार्मर पुनः

सक्रिय किए जा चुके हैं। टीपीएसओडीएल ने बताया कि स्वास्थ्य सेवाओं और पेयजल आपूर्ति को प्राथमिकता देते हुए लचीले कार्रवाई की गई। सभी चिकित्सा महाविद्यालय, जिला मुख्यालय अस्पताल, सानुदरिण स्वस्थ केंद्र और प्राथमिक स्वास्थ्य केंद्रों में बिजली पूरी तरह बहाल की जा चुकी है। वहीं, सार्वजनिक स्वास्थ्य अभियंत्रण विभाग के अंतर्गत पेयजल परियोजनाएं 100 प्रतिशत और शान्ति जलापूर्ति एवं सवच्छता योजनाएं 99 प्रतिशत बहाल हो चुकी हैं। गंजाय, गजपति, कोरपुट, रायगड़ा, बालाकांगीरी,

कंपमाल, नवरंगपुर और बौध जिलों में 5,925 प्रतिशत कार्यों को बड़ी टीम लगातार काम कर रही है। मौजूदा जनरेटर और सैफ्ट रिपॉस यूनिट्स के माध्यम से टोम कतिन परिस्थितियों में भी बहाली कार्य जारी रखे हुए हैं। टीपीएसओडीएल के सीईओ अमित गर्ग ने कहा, लचकदार टीमों ने विपरीत मौसम में भी दिन-रात मेहनत कर 18 घंटे के भीतर 98 प्रतिशत उपभोक्ताओं और 100 प्रतिशत आवश्यक सेवाओं की बिजली बहाली सुनिश्चित की। यह हमारी तत्परता और तकनीकी क्षमता का प्रमाण है।

ସମସ୍ତଙ୍କୁ ସୁରକ୍ଷା ଦେବା ପାଇଁ ଟାଟା ପାୱାର ଲେଡ୍ ସାଉଥ ଓଡିଶା ଡିସ୍କମ୍ (TPSODL) କର୍ମଚାରୀମାନେ ଉତ୍ତମ ସେବା ପ୍ରଦାନ କରିଛନ୍ତି। ଟାଟା ପାୱାର ଲେଡ୍ ସାଉଥ ଓଡିଶା ଡିସ୍କମ୍ (TPSODL) କର୍ମଚାରୀମାନେ ଉତ୍ତମ ସେବା ପ୍ରଦାନ କରିଛନ୍ତି। ଟାଟା ପାୱାର ଲେଡ୍ ସାଉଥ ଓଡିଶା ଡିସ୍କମ୍ (TPSODL) କର୍ମଚାରୀମାନେ ଉତ୍ତମ ସେବା ପ୍ରଦାନ କରିଛନ୍ତି। ଟାଟା ପାୱାର ଲେଡ୍ ସାଉଥ ଓଡିଶା ଡିସ୍କମ୍ (TPSODL) କର୍ମଚାରୀମାନେ ଉତ୍ତମ ସେବା ପ୍ରଦାନ କରିଛନ୍ତି।

Synopsis: Cyclone Montha brought intense rain and gusty winds across several districts of Southern Odisha, resulting in temporary disruption of electricity supply in many areas under Tata Power Southern Odisha Distribution Limited (TPSODL). Rising to the challenge with remarkable preparedness and rapid field response, TPSODL has successfully restored electricity supply to more than 9 lakh 50 thousand consumers out of the 9,88,253 affected, achieving a major milestone of 98% restoration within just 18 hours of the cyclone’s peak impact. The power infrastructure faced damages across the network, including 33 kV and 11 kV feeders, substations and distribution transformers. However, due to the swift action of the restoration teams, 100% of the affected 33 kV feeders have already been revived, ensuring rapid stabilization of the main power backbone. Restoration efforts at primary substations are also completed with 100 % already operational. At the distribution level, 99 percent of the 11 kV feeders have been normalized and 32,344 distribution transformers have been restored out of 33,535 impacted, reflecting a nearly complete revival of electricity supply across urban, semi-urban, and rural areas — most of it achieved within a record 18-hour period.

Ensuring continuity of essential public services remained the foremost priority for TPSODL. Power restoration for healthcare facilities has been completed on war footing, enabling 100% revival of Medical Colleges, District Headquarters Hospitals, Community Health Centres, and Primary Health Centres. This ensured uninterrupted access to emergency and critical care services throughout the cyclone period. Drinking water supply infrastructure too has been fully energized under the Public Health Engineering Department (PHD), while restoration under Rural Water Supply and Sanitation (RWSS) has reached 99%, helping maintain water security in the aftermath of the storm. A massive manpower deployment of 5,925 skilled personnel has been working round the clock across Ganjam, Gajapati, Koraput, Rayagada, Malkangiri, Kandhamal, Nabarangpur, and Boudh districts. These teams, supported by mobile power generators and rapid response units, continue to operate in difficult terrains and weather-affected zones to ensure the remaining pockets are restored at the earliest. TPSODL has kept its centralized and district-level control rooms in continuous operation to coordinate field efforts and support public safety needs.

Synopsis: Cyclone Montha brought intense rain and gusty winds across several districts of Southern Odisha, resulting in temporary disruption of electricity supply in many areas under Tata Power Southern Odisha Distribution Limited (TPSODL). Rising to the challenge with remarkable preparedness and rapid field response, TPSODL has successfully restored electricity supply to more than 9 lakh 50 thousand consumers out of the 9,88,253 affected, achieving a major milestone of 98% restoration within just 18 hours of the cyclone’s peak impact. The power infrastructure faced damages across the network, including 33 kV and 11 kV feeders, substations and distribution transformers. However, due to the swift action of the restoration teams, 100% of the affected 33 kV feeders have already been revived, ensuring rapid stabilization of the main power backbone. Restoration efforts at primary substations are also completed with 100 % already operational. At the distribution level, 99 percent of the 11 kV feeders have been normalized and 32,344 distribution transformers have been restored out of 33,535 impacted, reflecting a nearly complete revival of electricity supply across urban, semi-urban, and rural areas — most of it achieved within a record 18-hour period.

Ensuring continuity of essential public services remained the foremost priority for TPSODL. Power restoration for healthcare facilities has been completed on war footing, enabling 100% revival of Medical Colleges, District Headquarters Hospitals, Community Health Centres, and Primary Health Centres. This ensured uninterrupted access to emergency and critical care services throughout the cyclone period. Drinking water supply infrastructure too has been fully energized under the Public Health Engineering Department (PHD), while restoration under Rural Water Supply and Sanitation (RWSS) has reached 99%, helping maintain water security in the aftermath of the storm. A massive manpower deployment of 5,925 skilled personnel has been working round the clock across Ganjam, Gajapati, Koraput, Rayagada, Malkangiri, Kandhamal, Nabarangpur, and Boudh districts. These teams, supported by mobile power generators and rapid response units, continue to operate in difficult terrains and weather-affected zones to ensure the remaining pockets are restored at the earliest. TPSODL has kept its centralized and district-level control rooms in continuous operation to coordinate field efforts and support public safety needs.

TPSODL Celebrates Vigilance Awareness Month with Integrity Walkathon in Berhampur

Berhampur. (Correspondent): Tata Power Southern Odisha Distribution Limited (TPSODL) organised a Walkathon today in Berhampur as part of the observance of Vigilance Awareness Month 2025, reinforcing its commitment to integrity, transparency and ethical governance. The event saw enthusiastic participation from employees across various departments along with members of the local community, united under the mission of a corruption-free society. The Walkathon was graced by the presence and active

participation of Mr. Amit Kumar Garg, CEO, TPSODL, senior officials and colleagues. Participants marched through key locations of the city wearing specially designed T-shirts, carrying banners and placards, and distributing pamphlets

to spread awareness on the importance of honesty, accountability and ethical behaviour in daily life. This year's Vigilance Awareness Month theme – "Vigilance - Our Shared Responsibility" – guided TPSODL's initiatives aimed at strengthening public

trust and responsible conduct across society. Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said: 'Integrity is the foundation of progress. At TPSODL, we believe that transparency and accountability must

reflect in every action we take. During Vigilance Awareness Month, we reaffirm our commitment to a culture of zero tolerance for corruption and inspire citizens to stand united for a fair, ethical and developed India. The observance of Vigilance Awareness Month 2025 commenced with the integrity pledge administered to all employees on October 27, 2025. To further connect with the community at large, TPSODL sent a vigilance awareness SMS to all consumers, including a link to take the e-pledge against corruption. In line with its outreach focus,

TPSODL has planned Nakkad Nataks, Vigilance Awareness lectures in Gram Panchayats and extensive engagements across Schools and Colleges to encourage the younger generation to uphold honesty and moral values. These activities aim to ensure widespread awareness and empower citizens to actively contribute to eradicating corrupt practices. The entire initiative, including the Walkathon and month-long programmes, is coordinated by Wing Commander Manoj Kumar (Retd), Head - Security & Vigilance, TPSODL.

Synopsis: TP Southern Odisha Distribution Limited (TPSODL) organised a Walkathon today in Berhampur as part of the observance of Vigilance Awareness Month 2025, reinforcing its commitment to integrity, transparency and ethical governance. The event saw enthusiastic participation from employees across various departments along with members of the local community, united under the mission of a corruption-free society. The Walkathon was graced by the presence and active participation of Mr. Amit Kumar Garg, CEO, TPSODL, senior officials and colleagues. Participants marched through key locations of the city wearing specially designed T-shirts, carrying banners and placards, and distributing pamphlets to spread awareness on the importance of honesty, accountability and ethical behaviour in daily life. This year's Vigilance Awareness Month theme — "Vigilance – Our Shared Responsibility" — guided TPSODL's initiatives aimed at strengthening public trust and responsible conduct across society. Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said: 'Integrity is the foundation of progress. At TPSODL, we believe that transparency and accountability must reflect in every action we take. During Vigilance Awareness Month, we reaffirm our commitment to a culture of zero tolerance for corruption and inspire citizens to stand united for a fair, ethical and developed India.' The observance of Vigilance Awareness Month 2025 commenced with the integrity pledge administered to all employees on October 27, 2025. To further connect with the community at large, TPSODL sent a vigilance awareness SMS to all consumers, including a link to take the e-pledge against corruption.

Synopsis: TP Southern Odisha Distribution Limited (TPSODL) organised a Walkathon today in Berhampur as part of the observance of Vigilance Awareness Month 2025, reinforcing its commitment to integrity, transparency and ethical governance. The event saw enthusiastic participation from employees across various departments along with members of the local community, united under the mission of a corruption-free society. The Walkathon was graced by the presence and active participation of Mr. Amit Kumar Garg, CEO, TPSODL, senior officials and colleagues. Participants marched through key locations of the city wearing specially designed T-shirts, carrying banners and placards, and distributing pamphlets to spread awareness on the importance of honesty, accountability and ethical behaviour in daily life. This year's Vigilance Awareness Month theme — "Vigilance – Our Shared Responsibility" — guided TPSODL's initiatives aimed at strengthening public trust and responsible conduct across society. Speaking on the occasion, Mr. Amit Kumar Garg, CEO, TPSODL, said: 'Integrity is the foundation of progress. At TPSODL, we believe that transparency and accountability must reflect in every action we take. During Vigilance Awareness Month, we reaffirm our commitment to a culture of zero tolerance for corruption and inspire citizens to stand united for a fair, ethical and developed India.' The observance of Vigilance Awareness Month 2025 commenced with the integrity pledge administered to all employees on October 27, 2025. To further connect with the community at large, TPSODL sent a vigilance awareness SMS to all consumers, including a link to take the e-pledge against corruption.
